

Stripe Is Here! Get Ready to Get Paid Even Faster!

SlickPie has some quite exciting news to announce – our Stripe integration beta testing is done and it's now available for everyone to enjoy!

For those who aren't quite familiar with this tool yet, [Stripe](#) is a company that allows businesses and individuals to accept online payments. The software is similar to [PayPal](#), which is another global big player in the online payments scenario and is already a SlickPie integration. The goal is to provide faster and user-friendly possibilities for people to focus on running their businesses instead of worrying about money transfer obstacles, which are eliminated by the easy payment options offered by such tools.

Why Stripe is so awesome for your business

There are many ways you can use the combo SlickPie + Stripe to improve your business finances. For instance, you can receive instant payments online right after each sale is made. That is such a priceless convenience for business owners to have peace of mind about getting paid every time their customers are ready to pay. No more waiting and worrying about being available 24/7 to collect payments, no more uncomfortable situations facing lousy excuses, no more time being wasted, from now on you can get paid anywhere, anytime.

Stripe even accepts payments through credit cards to increase the channels for your business to get paid faster, meaning your customers will be able to pay you with a single click of a button with no unnecessary efforts or headaches whatsoever. By reducing the barriers for people to pay you, you increase the chances that the payment will be done in time and extra channels are one of the key factors when it comes to making the paying experience easier.

Also, businesses can track all sales made through Stripe, which grants an outstanding enhancement in accessing specific sales information whenever is needed. Plus, it's also possible to track the amounts that Stripe owes your business, as well as any fees that the program may be charging you. These tracking resources make possible for business owners to keep a keen eye on their business financial health while providing real-time feedback for them to make faster decisions.

Security is another huge plus with Stripe. The platform uses encrypted data in all its transactions, which means it's impossible for outsiders to access the information being shared. Still, the credit card data entered into the payment forms are never sent to your server, the data is directly sent to Stripe. This means that no credit card data would ever be in possession of any third parties.

Stripe is one of the best integrations any small business could use along with online accounting software. The tool is secure, simple, straight-forward, and truly help your company to get paid faster. It follows all the standards and benefits that are in SlickPie's blood, which makes this a perfect match and the greatest beneficiaries of it are the users.

Implementing Stripe is another way for SlickPie to say that users will always get the best for their business from software. Innovation is what SlickPie is built upon, and making your business to get paid faster is our model. Don't waste another second and try Stripe in SlickPie right now! Just follow these quick steps to get you up and going in no time <https://help.slickpie.com/hc/en-us/articles/211345289-Adding-Stripe!>
