Build your future today with ePROMIS Construction ERP

Running a profitable business in the construction sector was never easy. Today's environment for construction companies is tougher than ever before. Intense competition in the market compels companies to survive on tight margins and complete construction projects faster. As information are generated from different locations, companies around the globe find invoicing, billing, document management etc. to be time consuming and inaccurate.

ePROMIS Construction ERP is specifically designed to help organizations position themselves for opportunity in today's construction market. **ePROMIS** ERP comprises financial, procure to pay, inventory, project and job costing, plant,

human capital management and payroll, and customer relationship management modules to automate key processes of your business enabling you to minimize your costs and optimize resources without compromising the quality.

Turn every project into a success story

There are numerous unknowns in the execution of your construction projects. To maximize efficiency, minimize risk, control costs and provide a complete transparency to the project stakeholders, it is necessary to manage the entire construction processes in a single system of records. ePROMIS Construction ERP solution provides a comprehensive set of integrated components to cover the complete contract lifecycle.

Increasing Your Business Confidence

“

ePROMIS is a strong and powerful construction ERP software solution available in the market. ePROMIS Solutions understands the global construction market than anyone else and continuously strive to improve their systems, in line with changing business environment.”

Husni Omran
Finance Manager
Axal Arabia Construction

Operational excellence, combined with greater efficiency, is key to success in this highly competitive construction market. Your ability to meet time and budget goals is your competitive advantage. The flexibility and adaptability of ePROMIS ERP enable you to meet business challenges and respond to the changing market environment.

Improving Information Availability and Internal Communications

“

ePROMIS Business Suite helps attain a unified management of construction accounting, financial transactions, payroll, human resource, projects, work schedule, customers, and service operations into one database, eliminating all chances of manual error and duplicate data.”

Shafiq Azam
Director - Finance
Western Banoona Group

Whether they are your project managers, consultants, executives or team members, all the stakeholders of your project need access to project-oriented information which are relevant to them. Lack of a centralized system scatters your project-related data in various departments, spreadsheets, files, and standalone software, making it difficult to access information when required.

ePROMIS Construction ERP provides you with web-based, user -friendly, centralized interface collaborating all project-oriented information from your sites, machinery, estimating, sales, accounts, procurement, human resource and other departments. Information availability for various roles can be specified using Role Based Access Controls, providing the managers and team members with the right information to do their jobs better.

Simplifying and Streamlining Financial Operations

“

The modules – General Ledger, Accounts Payable, Accounts Receivable, Job Costing, Payroll, Procurement and Inventory of ePROMIS ERP have their best merits to be very flexible in approach. The comprehensive set of MIS reporting suit our requirement that may not usually be met by most ready-to-use ERP software systems.”

Rajesh Kumar Krishna
Executive Director & Chairman
Beaver Gulf Group

Modern construction and contracting companies require more than a conventional accounting software to manage complex finances. To focus on your project-based accounting requirements such as cash and accrual accounting, balance sheet, payroll accounting, and cash management, you need a solution that can transform your financial data into business insights.

ePROMIS ERP has the ability to manage multiple currencies, flexible transaction options, automatic bank reconciliations, financial intelligence reporting, LC management and global trade compliance. Gain a complete visibility over all financial aspects of every project with the help of comprehensive financial dashboards and extensive reports.

Maximizing Project Visibility and Control

Gaining an instant snapshot of project performance is critical in each of your construction projects. Better project visibility leads to better decision making, with a positive impact on your bottom line.

Transform the raw data into meaningful and useful visualizations with **ePROMIS** Business Intelligence. Built-in financial and operational BI tools of **ePROMIS** ERP allow businesses to gain control and visibility to all aspects of every project. Achieve financial and operational excellence in your construction projects by monitoring performance and job profitability, tracking percentage of job completion, workforce productivity, and managing customer and subcontractor relationships.

Optimizing Resources and Mitigating Budget Overrun

“

ePROMIS ERP eliminates all obstacles in resource scheduling and optimization. For example, now with a few keystrokes, we gain complete information on our equipment and machinery, such as their location, condition, maintenance history and availability. ”

Ahamed Malick Khalil
Manager - Plant & Machinery
Al Nuaimi Group

Construction companies across the globe strive for excellence in delivering projects on time and on budget to prevent project delay and cost overrun. Automation of construction management can help companies increase project profitability by controlling costs, optimizing resources and eliminating non value-added efforts.

ePROMIS Construction ERP enables you manage projects more tightly while monitoring budget allocations, cost to complete, customer billing, cash receipts and all other factors that affects your cash flow. Obtain a smart way to schedule, optimize resources for your projects, and minimize the cost and risk associated to their usage.

Managing and Empowering Your Workforce

“

Before implementing ePROMIS ERP, it was hard for us to know the expiration dates of passports, visas, labor cards, and other employee documents. Now, with ePROMIS we get alerts and notifications on all employee documents which are close to their expiry dates.”

Mohamed Abdulfattah Shabara
Manager - HR & Legal Affairs
Ali Mousa & Sons Holding

Your employees are the key assets to your construction business. Construction specific human capital management system of ePROMIS ERP software instills contemporary best practices in your HR processes, accelerating organizational growth and employee engagements, reducing costs and increasing productivity.

From early stages of recruitment process to the exit interview, ePROMIS brings together all your employee records into one centralized database allowing you to access all employee-related information, perform efficient employee management, and generate accurate HR reports. Employee Self Service system of ePROMIS ERP empowers your employees with the freedom to access their personal information, payroll details, and send documents for approval, helping them to take more responsibility for their jobs and development.

It's more than just a software

Real-time Information

Today's dynamic market demands companies to have real-time data On the Go. With an added advantage of being a fully-integrated system, ePROMIS ERP helps the managers gain information from all project sites and relevant departments on a real-time basis.

Mobility

ePROMIS ERP runs on smartphones and tablets with dedicated applications, allowing you and your team members to gain precise project and service information straight away on a secured centralized hub.

Electronic Approval System

Electronic Approval System (EAS) of ePROMIS ERP allows the users to electronically send documents for approval. The system works according to the nature of the processes and delegation of authorities, helping the organization to eliminate clerical errors, accelerate approval processes, improve interdepartmental communication, and to establish a clear workflow hierarchy.

Run a Green business (DAS, DMS)

ePROMIS ERP helps you create an environment-friendly paperless office by eliminating all your printing and filing requirements. Document Attachment System (DAS) allows you to electronically attach all relevant documents to your transactions. Document Management System (DMS) ensures all your documents are secure and available according to Role-based Access Control.

Accountability in Workspace

The powerful audit trail system keeps record of everything accomplished in ePROMIS ERP software from requests for information and internal email communications, to approval of change orders and daily reports, holding all your team members accountable for their work.

Choose Your Deployment Option

ePROMIS' technology deployment program not only simplifies the whole software deployment process but also gives you the freedom to select the way that works best for you. ePROMIS customers can choose deployment platform from on premise, hosted, and cloud technologies to drive their business forward.

Business Intelligence

Built-in business intelligence capabilities of ePROMIS ERP provide a clear picture of how your financial and operational performances affect your business growth and goals. Improve your decision-making skills and judgements by tracking the percentage of job completion, Work in Progress, and monitoring performance and job profitability.

Customizable to Fit Your Organization

Your business is unique with its own systems, structures, and ways of working. Through ePROMIS' customization services, organizations gain the rewards of solutions tailor-made to suit their unique requirements
