

DESIGN * CREATE * SHARE * MANAGE DATASHEETS

- TDSMaker is a SaaS product to design and create datasheets.
- Because TDSMaker is a cloud based data sheet creation and management system it reduces the time and cost taken to create and edit data sheets by over 85%
- Depending in the number of products and company organisational structure creating datasheet for a new product publishing time varies from 1 hour to 1 week

TDSmaker provides;

- A clean, professional look
- Free templates in multiple languages
- Easy to use interface - no training required!
- No need to hire a graphic designer. Your creative instinct can take the reins.
- Integration with your current website for automatic updates
- Data tracking for viewed and downloaded datasheets
- Accessing and sharing your data sheets with just one click

MAKER

Manage Your Datasheets Efficiently with TDSmaker

Save up to 90% of your time and reduce costs

DATASHEET

Save up to 90% of your time and reduce costs

TDSmaker is a datasheet generation software solution that serves all kinds of businesses, from small startups to large business conglomerates. Any type of business that requires the use of datasheets will find this software solution very useful.

The platform is perhaps one of the world's most user-friendly document management solutions. It effectively bridges the gap between marketing and research and development by bringing together design and datasheet editor tools in a single robust software suite.

This is the software solution marketing departments and agencies can utilize to create and edit professional datasheets. Compared to the desktop design programs some businesses are currently using, TDSmaker is a lot simpler and more practical yet very efficient and robust.

How TDSmaker works

TDSmaker is a web-based datasheet solution developed for product engineers and businesses in various industries. It is a datasheet design, creation and management software with ERP (enterprise resource planning) and CRM (customer relationship management) integration capabilities, as well as web and mobile device accessibility.

The software solution was developed and optimized for creating datasheets, providing distributors, producers and service providers a tool that allows them to share their products and/or service information to their target customers. TDSmaker is one of the most useful software solutions for engineers and marketing specialist.

Keeping consistency is one of the most common issues for the average datasheet creator and marketing specialist.

TDSmaker provides the tools and features that allow them to sustain brand consistency and minimize data errors.

Speaking of features, TDSmaker offers quite a few that help businesses create professional datasheets, including customizable templates, document templates, data transformation, performance reports, summary reports, customizable branding, content library, website integration, email integration, image editing, search functionality, template creation, automatic formatting, collaboration tools and a drag-and drop interface.

TDSmaker also provides management tools for versions, design, content, permissions and template management.

The benefits of the TDSmaker

Ease-of-use is probably one of the biggest advantages TDSmaker has to offer its users. It is arguably much easier to use and master compared to the desktop-based design software solutions that some marketing agencies and businesses use to create datasheets, such as Adobe Framemaker, Microsoft Office and Quark.

TDSmaker is so user-friendly the learning curve is virtually non-existent. If you are adept at using Microsoft Office and all those desktop software products, you should be able to use this software solution with relative ease. There is essentially no special training required to effectively use this product.

Create professional-looking datasheets using TDSmaker's pre-designed templates

TDSmaker offers a library of free pre-designed templates that allow you to create professional datasheets with ease, covering a wide variety of categories, including software, electronics, chemistry, hardware, security and more. Additionally, users can automatically edit or update their datasheet by revising the template with just one click. You don't have to be technologically savvy to properly update your existing datasheets. That is how simple to use this software solution is.

It's a cloud-based software solution, so there's essentially no installation required for use

One of the biggest drawbacks with third-party programs is the need to install them into your system. Software solutions like Quark or Adobe Framemaker have to be installed and registered before you can use them.

Since TDSmaker is a cloud-based datasheet solution, users don't have to install anything, except maybe for plug-ins that allow you to integrate the solution with other services. A cloud-based solution requires less effort for implementation and is arguably more convenient.

Manage permissions more effectively

Get total control over your datasheets by having the ability to assign permissions to selected users, allowing or prohibiting from accessing, changing or editing your templates and datasheets.

Acquire comprehensive reports about your datasheets

With TDSmaker, users have the capability to track data for viewed and/or downloaded datasheets. You can generate custom reports easily, allowing you to quickly analyze and evaluate most viewed datasheets through email or by website visitors, provided of course the user has integrated your website with the document management solution.

Integrate TDSmaker with websites and/or CRM software solutions

With TDSmaker, it's quick and easy to integrate your datasheets with your existing delivery channels, CRM solutions and your current business website. You can automatically publish new datasheets or revise/update old ones. No coding or technical expertise necessary.

There are more enterprise solutions available

If you are looking for more enterprise solutions, TDSmaker has a few in store. For instance, you can get your PDF files or export your datasheets as HTML and integrate them seamlessly to your business website. Manage your process and minimize your time-consumption on datasheets more effectively with workflow features.

TDSmaker also allows you to integrate your WordPress account with the software platform. Finally, the project management feature allows for easier and more convenient transition from manually designed datasheets to the TDSmaker platform.

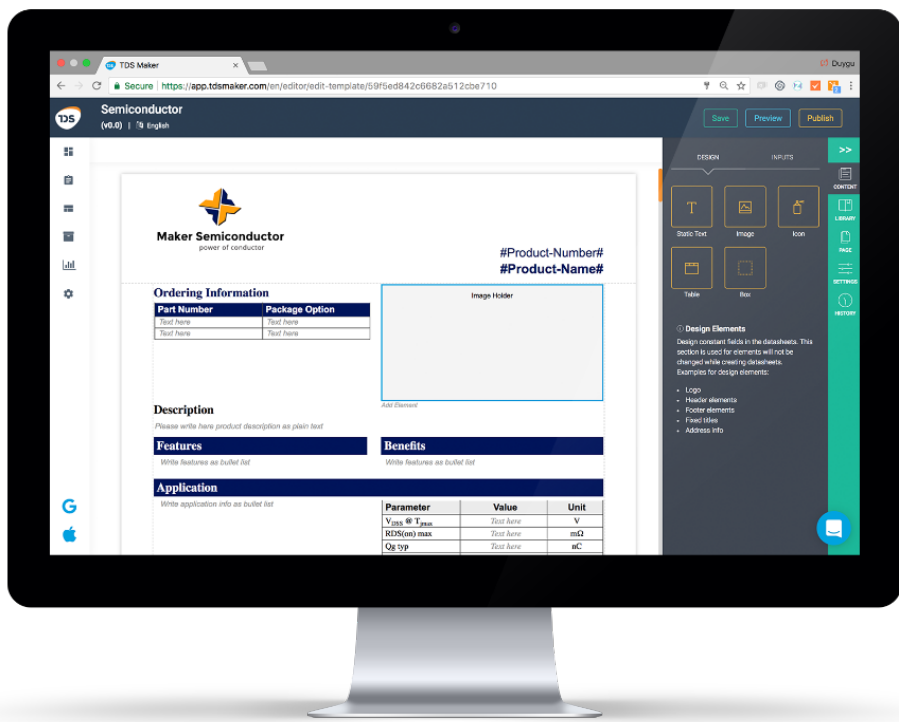

Briefly;

TDSmaker is a great document management software solution that you can immediately try out for free, if you're still not sold on its true capabilities.

It allows you to create professional-looking datasheets that you can seamlessly integrate to your business website. It is easy to use, has zero learning curve and highly functional.

If you need a reliable software solution to help you manage all your datasheets in less time, TDSmaker is what you're looking for.

How much does TDSmaker cost?

TDSmaker offers five pricing plans for you to choose from: Freemium, Standard, Professional, Premium and Ultimate. Pricing is based on the number of users, templates, datasheets and storage capacity. All plans come with the following features:

- Template Library
- Translation
- Mobile App
- API

Free Trial: Available for free - 14 days

- Includes all feature of Standard plan.

Standard: \$49 per month (annual billing) or \$529 per year

- Two users
- Five templates
- 100 datasheets
- 0.5 GB storage

Professional: \$219 per month (monthly billing) or \$2.350 per year

- Unlimited users
- 20 templates
- 5000 datasheets
- 1 GB storage

Enterprise: Contact for getting a quote

- Unlimited users
- Unlimited templates
- Project Management support
- 10 free template designs with your branding or free transfer of your datasheet templates
- Free support for integrating TDSmaker with your website

Contact us directly if you want to learn more about the pricing plans or if you need custom pricing for your business.

Plastic Compound

2909

TECHNICAL SPECIFICATIONS

Main features	Performance	Test standard
Thickness	1.60 mm +/- 5%	DIN EN 1849-2
Tensile properties		
- Maximum tensile force	>= 1500 N/50 mm	DIN EN 12311-2
- Maximum tensile strength	>= 13 %	DIN EN 12311-2
Resistance to tear (nail shank)	>= 220 N	DIN EN 12310-2
Straightness	<= 50 mm	DIN EN 1848-2
Flatness	<= 10 mm	DIN EN 1848-2
Water tightness to liquid water (60 kPa / 24 h)	passed	DIN EN 1928 B
Durability against aging	tight at 60 kPa	-
Durability against chemicals	tight at 60 kPa	DIN EN 1296
Resistance to impact (hight=300 mm) (24 h / 20 kg)	tight	DIN EN 12730 B
Resistance to static load	passed	DIN EN 12317-2
Dimensional change after heat storage (60 ° C / 10 min)	<= 0.5 %	DIN EN 1107-2
Behavior when folding in the cold (-10 ° C)	good	DIN EN 495-5
Visible defects	passed	DIN EN 1850-2

CHARACTERISTICS

- stabilized against UV-rays
- cold resistant and resistant to weathering
- weldable
- free of heavy metals and physiological unobjectionable according to EN 71/3
- antimicrobial equipment
- resistant to all usual chemicals for water treatment in swimming pools (according to the chemical instructions), at water temperature max. 32 degrees
- not resistant to tar, bitumen, oil, fuel and other solvents
- not resistant in direct contact to other plastics, f. e. polystyrene

STORAGE AND PACKING

Cast and protected against sun, rain, snow and ice at temperatures between + 5 ° C and + 25 ° C. The processing should be carried out at temperatures above + 10 ° C.

LEGAL

The user / processor has to check the product for its suitability for the intended application. The user / processor is solely responsible for the appropriate and correct application, use and processing of the product. We guarantee the perfect quality of our products according to our General Conditions of Sale and Delivery. All information corresponds to our current knowledge. In order to safeguard the warranty claims, we must ensure that our contractual partner informs our customers about our care and cleaning instructions.
