Search any terms or value in your data sheet.
- Version management**
Automatic versioning
- Reporting**
Get report about view and download data

Problems

Datasheets are very labor intensive documents and a painstaking task.

- Nearly all of the current design software that is used to create data sheets is complicated to use and requires extensive employee training.
- Data sheets often need to be edited to update them, and that can be time consuming and expensive. Editing a data sheet normally requires graphic designer to update the design to fit the new edits.
- When a company needs to make a universal change to all of their data sheets, such as when they want to change their logo, change their corporate colors, change their corporate font, change their address, etc., they have to spent hours. If a company has hundreds or even thousands of data sheets, this can cost a fortune.
- Having to install and maintain software, and then purchase an upgrade when the new version is released.

Solutions

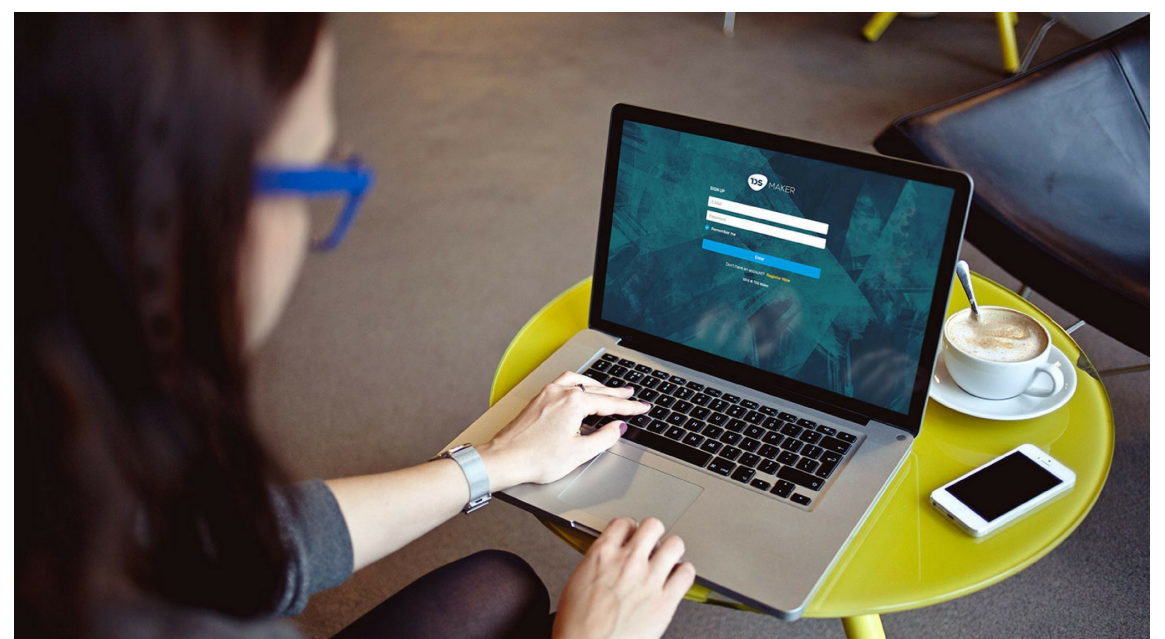

TDSmaker provided end-to-end solution for data sheets.

- TDSmaker is so simple to use, businesses do not have to pay for expensive employee training, and they can quickly and easily create professional data sheets with their in-house writer(s).
- With TDSmaker, editing a data sheet is fast and easy, and does not require hiring a graphic designer. This can easily reduce a company's cost to update a data sheet by at least a couple hundred dollars.
- TDSmaker solves this problem with our universal updater which allows a business to edit and update all of their data sheets at one time. Edit template and publish, that's all. All data sheet created from updated template will be updated automatically. This will save a company a tremendous amount of time and money.
- TDSmaker is 100% cloud based so you do not need to install or maintain any software, and you always have access to the latest version of the software.

What are your benefits compared to Microsoft Office programs?

TDSmaker allows you to edit your text, images, icons. etc. on the sheet without disrupting template design and layout. This is incredibly easy! It's easy-to-use compared to other software and much cheaper than others.

We know that it's not simple to keep template's format and branding by using Microsoft Office programs. Also, the updating of datasheets takes much more time with Microsoft Office, but use TDSmaker and update all datasheets automatically by editing the template design.
