

Being included
means
everything

Funerals give family and friends the opportunity to connect with one another and celebrate the special people in their lives who have passed.

One Room Streaming enables people to view a funeral service using the Internet, either live or later, at convenient times and across different time zones.

What is One Room?

One Room is a system that records and also streams funeral services live, allowing people to view funeral services remotely – giving friends and family the opportunity for a private farewell at any time and any place.

The technology is purpose-built for funerals and provides a simple, reliable and high-quality digital platform for family and friends to connect to the service using a Mac, PC, smartphone, iPad/tablet or IP-enabled TV.

How do I request to use One Room?

Request the service from your funeral director or celebrant.

How does One Room work?

A funeral service can be viewed live or at any time following the service, either directly from the email invitation or from the One Room website, using a private access code:

The funeral director schedules the webcast with One Room

The family organiser receives an email invitation to the service

The organiser forwards the invitation to others or passes on the log in details

With one click inside the email, the service can be viewed

Recording can be downloaded for private storage
