HEALTHY HOMES SECTION**

LEAD PROFESSIONAL REVIEW

Background

Since forming in 1999, the Healthy Homes Section (HHS) has offered the regulated community a no-cost, on-site or record review consultation service to assist professionals in staying compliant with the requirements of their lead certifications. Called a “Lead Professional Review”, this service allows you to ask questions and have your reports or worksite reviewed to ensure your work complies with the Michigan Lead Abatement Act and rules.

Enforcement Risk

The goal of the Lead Professional Review is to assist lead professionals and contractors to be compliant. Necessarily, this means identifying what you are doing right and wrong. Issues raised during the Lead Professional Review are free from enforcement risk, provided that the individual or firm makes the changes necessary to bring their work into compliance. A Lead Professional Review may not be requested once HHS becomes aware of compliance issues, has initiated an investigation, or as a means to excuse prior significant violations or willful disregard of the requirements.

How to Request a Lead Professional Review

Requesting a Lead Professional Review is as simple as filling out and submitting the form below to HHS by mail, fax or e-mail. Once received, someone from HHS will contact you to arrange a visit. Note that Lead Professional Reviews are subject to the availability of HHS staff to provide and may sometimes take additional time to schedule, please plan accordingly.
