

Is a smart thermostat right for you?

As temperatures begin to drop, there's no better time to upgrade the thermostat in your home than now. With a smart thermostat you can set your heating system to turn on only during the hours you're home to enjoy it for significant cost savings. Also, don't forget to check for rebates and save.

4 Reasons Why We Love Smart Thermostats

#1 Lower your energy bill

Heating and cooling your home accounts over half of your bill. A smart thermostat can adjust the temperature when you're away or sleeping.

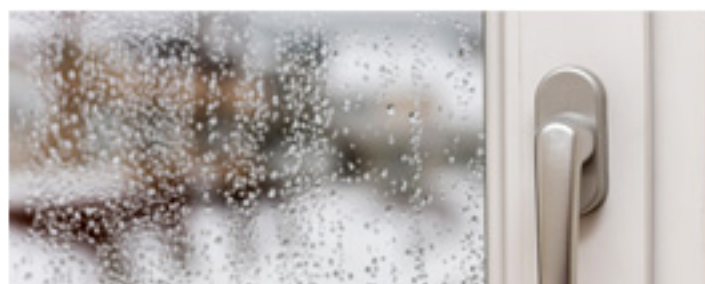

#2 Comfort control from anywhere

Control your home's heating and air conditioning settings from anywhere at any time using your smartphone, tablet or computer.

#3 Learns your preferences

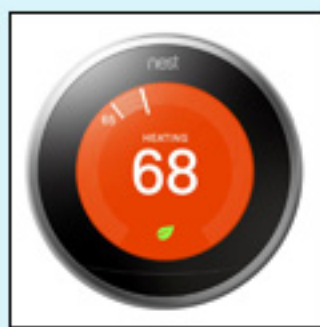

A smart thermostat learns what temperature you like and builds a schedule around yours. It adapts as your life and seasons change.

#4 Has dynamic sensor capabilities

Different features follow your activity, manage humidity, and keep an eye on the weather to provide a custom climate for your home.
