# Vinegar...Your Natural Health Insurance

*“Vinegar is an organic molecule that may have  
played a role in the formation of life.”*

~ *Associated Press*

## Will's Challenges

Will was at the top of his game before the stroke. An ordinary person living life as best he could. Sound like someone you know? If he'd had more facts about one thing though, maybe life would not have gone sideways.

An actor-musician, he made work his *raison d'être*. Days filled with auditions, which always brought on stress. But he sang to manage it. The added stress his body endured seemed usual. It wasn't.

That night...his music stopped. The light that illuminated his path dimmed. When an artery bursts in your brain, things are never the same.

After the stroke came the uphill climb to recovery. And now another blow. His doctor diagnosed Stage Four Kidney Disease, saying in time he'd have Stage Five and need dialysis. This meant that, on top of recovering from the stroke, Will faced the looming threat of this arduous procedure.

“How do you know?” He asked Dr. Bell.

“Statistics. Only rare cases don't progress,” Dr. Bell stated. “You'll need a fistula in your arm so we can connect you to the dialysis machine”.

Will didn't do “status quo” well. He needed to be that “rare case”. Soon he got the fistula in his arm - then trolled online for alternative treatments.

That night, he bought some apple cider vinegar. Drank one tablespoon before bed and again next morning. Three months on Dr. Bell analyzed his blood again. She was speechless because Will's kidneys were regaining function. She had no idea how, but told Will to keep doing whatever he was doing!

### **Building Blocks**

Scientists researching vinegar agree on one thing. That vinegar mixed with ammonia creates a simple amino acid - one of the building blocks of proteins and DNA, essential for life.

Let me explain. Various acids are needed in our stomachs to maintain good PH level. We achieve this through diet. We need enough acidity for good digestion, but not so much that we get ill. It's a fine balance.

Vinegar contains 4 to 7 percent acetic acid, a known healing property. PubMed reports it lowers blood pressure. Another study published by ACS Publications suggests acetic acid bacteria are essential to building blocks in brain tissue.

Science is slowly revealing the multiple benefits of vinegar. The molecule in vinegar that helps sustain life may help us live longer, healthier lives.

### **Natural Health Insurance**

We all know people who struggle with chronic illness. Digestive problems, for example, are common. Vinegar can help in many cases. It can restore our PH balance to get rid of or prevent digestive and other chronic problems. Research suggests we can even prevent cancer with vinegar. ([pubmed.com](http://pubmed.com))

More proven health benefits of vinegar:

- Aids digestion because your stomach needs high acid levels (in vinegar) to digest food.
- Impacts blood glucose levels, insulin release, and metabolism, so helps with diabetes.
- Treats and even overcomes infections with antimicrobial properties.
- Lowers high blood pressure by regulating water content in tissues.

Many more health benefits of vinegar have been researched across the globe and documented by author Emily Thacker. Her 168-page xxxxx Book will give you over 1000

simple natural remedies, recipes, and tips for a healthy life. You and your family will benefit for years to come!

You'll want to follow the steps in this special edition to help you live a healthier life and save money too! Learn how to:

- Manage your weight by eating sensibly, without the usual restrictions of "dieting". (p. 82)
- Disinfect, clean, and get rid of mold and mildew around your home or office. (p. 120)
- Fight various kinds of disease. (p. 32)
- Support your immune system. (p. 33)
- Ease or even get rid of arthritic pain. (p. 31)
- ...and so much more!

### **Good News**

Five years have passed since that near-fatal stroke. Here's the thing. Before the stroke Will thought he was controlling his high blood pressure through diet. He wasn't. Maybe if he'd had The xxxxxx Book he'd have known how to lower his blood pressure naturally.

Here's the best news. Will's made great strides in recovery, which he attributes to vinegar. Now in Stage Two, his kidneys can handle many foods that he couldn't have during Stage Four Kidney Disease. Will is so confident in the healing power of vinegar he plans to have that fiscula removed!

### **Hurry to Get Your Copy Now**

To prepare yourself for an emergency health crisis like Will's or any other, fill out this postage paid order form and drop it in the mail. Simple as apple pie! We'll send your book right out to you. If you act now you will not pay the regular cost of \$24.99, but only \$12.49. That's a 50% savings! But only until this edition is gone. And they are selling fast. So act now before you lose the chance to save 50% on this amazing book.

I personally guarantee you'll be happy with The xxxxx Book. But if you are not happy for any reason, drop it in the mail and return it to us within one week of receipt. We will promptly refund not only the money you paid for the book, but the postage you paid to return it.
