Live Stock Research Station.NOTE BY THE DIRECTOR OF AGRICULTURE, SIND

Dr. F. Ware, Animal Husbandry Commissioner to the Government of India, who visited Sind recently considers establishment of a full fledged Live Stock Research Station as the most urgent requirement of the province. He says "Sind is one of the most interesting of the provinces to those concerned in livestock work for it is the home of several very good breeds of cattle, buffaloes, sheep and goats, quite apart from the facility to transport animals and it behoves us at this very critical stage in the history of Sind to make suitable provision for the extension and if possible, the further development of these breeds, which have come through extraordinary hard times in the past and therefore contain some of the desirable characteristics for animals in a country like India, such as hardiness, good draught qualities and ability to produce such important articles as milk, ghee, wool etc."

There can be no two opinions on this point and I consider establishment of this station as an immediate necessity where herds of pedigree animals could be kept and large scale experiments carried out.

These experiments would comprise scientific breeding to produce the type of sires most useful to the province and eventually to distribute his seed for artificial insemination work in the districts, the economics of feeding of milch cattle, draught cattle, and other species with the local fodders, and experiments in disease control and the production of disease resistant strains.

For this purpose, the Willington Cattle Farm at Malir is well suited for development as Livestock Research Station. It is of sufficient size, it is easy of access and with a little additional expense sufficient land can be brought under irrigation to grow a good variety of crops. The Research Station, Sakran will
