(c) Improved methods of ghee manufacture and ghee industry-

The commodity of 'pure ghee' is the essence for public Health. But pure 'ghee' is found to be getting scarce even in villages and rural areas where due to deterioration in cattle and consequent low milk yield, the industry is receiving a set back. Liquid milk is in demand near towns whereas rural areas entirely depend upon ghee making. The methods under which ghee is made by the Bania dealers and is adulterated require ~~to be~~ ^{low} investigated; the cattle breeder and Hari who produce butter and sell it to the dealer at a very cheap rate, require to be taught to prepare clean ghee at home and sell it under system of co-operative organisation to big markets and towns where better prices can be realized.

There are no ~~such~~ societies on co-operative lines for ~~for~~ Cattle Breeding, ghee making and milk production and require to be organised in a few progressive centres to start with. The Co-operative Department might consider such Schemes and the Live Stock Department will be prepared to render assistance and advice.
