to 75. These are reported to be doing good work and the progeny is superior to the local stock.

Besides 34 bulls are being reared and about 2 dozen will be shortly available for issue in the Left Bank.

Failure of rains in last year caused wholesale famine of intense character in the Thar division where 3 to 4 lacs of cattle population is estimated to have succumbed. This has brought about a shortage of stud bulls in the desert itself. Steps will be taken to distribute during next cold weather 2 to 3 dozen bulls in the desert proper to revive the breed.

The zamindar in Sind is, however, averse to maintain the bull at his ^{own} cost because the benefit of such a bull goes to the Haris and other villagers, moreover, he does not like to be fettered with maintaining service registers and so forth. Therefore it is very necessary to find out via-media. Co-operative Societies have not so far taken advantage of this system and I propose that the propaganda staff under the Registrar, of Co-operative Societies in Sind might carry on propaganda all over Sind, in favour of maintaining breeding bulls by the Societies themselves.
