

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. PARSONS, FLETCHER & Co.,

Printing Ink Makers,

GRAVEL LANE, SOUTHWARK, LONDON, S.E.

PARSONS, FLETCHER & Co.

Have devoted for many years their best energies to the further improvement of their first-class INKS; and from the testimonies of the most eminent English Wood Engravers to the brilliancy of their Best Ink, as well as from the estimation in which their Inks in general are held by the leading Printers at home and abroad,

PARSONS, FLETCHER & Co.

flatter themselves that for Depth of Colour, Clearness of Impression, and Ease in Working, their Inks now stand unrivalled.

The *Art Journal* says:—"The Ink used for printing this Journal is manufactured by Messrs. PARSONS, FLETCHER & Co., and combines the essential qualities of depth of colour and clearness of impression for which their Inks have long been favourably known."

THE continued and increasing demand for this work having rapidly exhausted the second year's issue there is no need for any remarks as to the necessity for such a publication; but it may be as well, for the sake of the large number of new subscribers, to state in a concise manner the general intention of the contents of the book.

In addition to the Trade Returns, Tariffs, Populations, &c., the present volume contains full particulars (with Rates and times of transit) of the Steam and other Communications to the various places treated of, wherever anything like a regular mode of conveyance or correspondence exists.

The average time of transit by Sailing Vessels is also given with, where possible, the average rates of Passage Money.

The leading Merchants and Traders of all classes, that are likely to be of any use to Manufacturers and all engaged in commerce on this side, are fully enumerated.

Concise descriptions of each Country and Town are furnished with a view more particularly to show their commercial capabilities and peculiarities.

The principal Products, and details as to the articles of which the Trade Returns chiefly consist will also be found; and tables of the local weights and measures.

All the London Agents to each of the Banks are named, so that the Merchant is enabled to see to whom to apply where financial information or assistance is needed in connection with any particular town or city.

The work, as previously stated, is not intended to supersede any of the excellent annual local Directories, but to give a concise book of reference to every English, Foreign, and Colonial Merchant; and no effort has been, or will be, spared to render it as perfect as possible.

The number of Towns and Cities represented has again been considerably increased, and still more would have been included but for the principle by which the Proprietors have all along been actuated, viz.—never to give any information that is not, as far as all possible care and labour can make it, perfectly reliable. With the next publication, however, still further progress will be made, and other improvements added.

The Proprietors take this occasion of thanking all their Friends and Agents who have so ably assisted them in the compilation of the work. They would especially name the compilers of the valuable “Annals of Indian Administration,” who placed the whole of their valuable statistics at the service of the Proprietors.

ADDENDA ET CORRIGENDA.

The portion of the work relating to India, China and other countries affected by the Suez Canal, went to press before it had really become a route to those parts of the world, and some time must now elapse before it is fully developed. The following information may, however, be of value :—

The average time of transit to India *via* Suez Canal, is about 45 days.

The average time of transit to Hong Kong, &c., is about 50 days, to Singapore and the Straits about 42 days.

In the next Edition every possible particular will be furnished.

Page 225—

Under Sierra Leone, line 5, for "West Indian," read "West African."

The portion of the work relating to Java will be found at the end of the book, as it arrived too late for insertion in its proper order.

INDIA.

India lies between north latitude $8^{\circ} 4'$ and 36° , east longitude $66^{\circ} 44'$ and $90^{\circ} 30'$, with 11,260 miles of external boundary. Its greatest length is about 1,800 miles; its greatest breadth about the same. It consists of the British Territory, the Feudatory States, and the Independent States. The control of the whole civil and military government of British India is vested in a Governor-General and Councillors. In the Presidencies and Provinces, the Government is administered by Governors or Commissioners, subject in all respects to the orders of the Governor-General. The Native States are tributary to the British Government, but, in most cases, their rulers are supreme in their own dominions. Nepaul and Bhootan are wholly independent States. The French hold small portions at Chandernagore, Pondicherry and elsewhere, about 200 miles in extent, and the Portuguese, Goa, Damaun and Diu, all within the limits of the Bombay Presidency, in extent over 1,100 square miles. As India extends through 28° of latitude, and is greatly varied in respect of elevation, it necessarily presents much variety of climate. The heat in the plains from May to August is often intense, while the temperature of some of the more elevated districts, during the same period, is delightfully cool. Under the rapid extension of railways, the almost inexhaustible resources of the country are being steadily developed, and a field is being opened of the widest extent for commercial enterprise.

VICEBOY AND GOVERNOR-GENERAL—The Right Hon. the Earl of Mayo, K.P., LL.D., &c.

EXTENT OF INDIA, 1,556,836 square miles.

EXTENT OF BRITISH INDIA, 960,046 square miles without Feudatory States.

BENGAL.

The Lower Provinces of Bengal are nearly identical with the old Provinces of Bengal, Behar and Orissa. They extend from Arracan to the north-east frontier of Upper Assam, thence to the boundary of Gorruckpore in the north-west provinces, and southwards to the northern limits of the Madras Presidency. The seasons are divided into the hot, the rainy, and the cold. The hot weather lasts from the middle of March to the middle of June, the rains from thence to October, and the remainder of the twelvemonths is called the cold weather. The Ganges, with its tributaries, forms the great highway for most of the commerce of the country. The Eastern Bengal Railway runs from Calcutta, and the East India Railway, the largest line in India, is open to Delhi, a distance of 1,018 miles.

LIEUT.-GOVERNOR—The Hon. William Grey.

EXTENT, 240,462 square miles.

POPULATION, 38,501,283 (in the Hooghly district 900 to a square mile).

PRINCIPAL TOWNS.

Calcutta, Dacca, Patna with its military station, Dinapore, Serampore. Principal ports—Calcutta, Chittagong, Balasore and Cuttack.

PRINCIPAL PRODUCTS.

Vegetable—Rice, Poppies, Indigo, Cotton, Sugar-cane, Mulberry, Tobacco, Hemp and Flax, Oil-seeds, Ginger, Teak, Mahogany, Satin-wood, Ebony, &c. Mineral—Nitre, Coal, Iron, Limestone, &c.

TRADE RETURNS.

Last Return of IMPORTS for one Year, £18,976,850.

Consisting principally of Cotton, Woollen and Hardware Goods, Machinery, Manufactured Metals, Glass, Books, Wines, Spirits, Beer, Provisions, Salt, Apparel, Timber, Fruits, &c.

Last Return of EXPORTS for one Year, £17,797,428.

Consisting principally of Opium, Rice, and other Grains, Cotton, Indigo and other Dyes, Raw Silk and Silk Goods, Oil seeds, Sugar, Saltpetre, Jute, Hides, &c.

The countries chiefly traded with are the United Kingdom, France, and China. A great deal of commerce is also carried on with Bombay.

CALCUTTA.

Calcutta, the capital of Bengal, the seat of the Supreme Government of India and of the Lower Provinces, stands on the left bank of the Hooghly, about 100 miles from the sea. The native portion consists of dirty streets and mean houses, while the European, from its splendid edifices, receives the name of the "City of Palaces." The suburbs are extensive and laid out in parks, in which reside the wealthier inhabitants. Public buildings abound as well as educational, benevolent, religious and scientific institutions, commercial companies, corporations, and factories. Through Calcutta passes all the produce of Bengal, and its merchants are among the wealthiest in the world. Railways connect it with other parts of India, telegraphs with all parts of India, steamers and clippers, with other parts of Asia, as well as with all parts of the world.

POPULATION (including the densely peopled suburbs) about 1,000,000.

BRITISH INDIAN MONEY, WEIGHTS AND MEASURES.

The standard of British India is silver. The gold coin is the Mohur = 16 Rupees. The gold Mohur and the current Rupee are each equal in weight to 180 grains Troy.

Sicca Rupees, though referred to in the money market, are not issued; 100 Sicca Rupees = 106 r. 10 a. 8 p. current Rupees. Sicca Rupees may be changed to current by adding $\frac{1}{16}$, and current Rupees into Sicca by subtracting $\frac{1}{16}$.

Bazar Weight—

16 Chittacks = 1 Seer, or 2 lbs. 0 oz. 13 drs.
40 Seers = 1 Maund, or 82 lbs. 2 ozs. 3 drs.

100 Bazar Maunds = 110 Factory Maunds.
 $1\frac{1}{2}$ Factory Maunds = 1 cwt.

Factory Weight—

16 Chittacks = 1 Seer, or 1 lb. 13 oz. 14 drs.
40 Seers = 1 Maund or 74 lbs. 10 ozs. 11 drs.

The Indian Maund = $82\frac{1}{2}$ lbs. Avoirdupois.

BRITISH INDIAN MONEY.

1 Pie	£0 0 0 $\frac{1}{2}$	16 Annas = 1 Rupee	£0 2 0
3 Pie = 1 Pice	0 0 0 $\frac{1}{2}$	16 Rupees = 1 Gold Mohur.. .. .	1 12 0
4 Pice or 12 Pie = 1 Anna.. .. .	0 0 1 $\frac{1}{2}$		

N.B. The par value of the Rupee is 2s., but it may range sometimes according to the fluctuations of the money market, from 1s. 9d. to 2s. 2d.

BRITISH INDIAN WEIGHTS.

The Tola, weighing 180 grains Troy, is the unit, and from it upwards are derived the heavy weights, viz., Chuttack, Seer and Maund, and by its subdivision the small or Jewellers' weights, viz., Mashas, Ruttees and Dháns, thus:—

1 Dhán or Grain	= $\frac{1}{32}$ gr. Troy	= $\frac{1}{177}$ Avoirdupois.
4 Dháns	= 1 Ruttee	= $\frac{1}{44}$ "
8 Ruttees	= 1 Masha	= $\frac{1}{55}$ "
12 Mashas	= 1 Tola	= $\frac{1}{177}$ "
5 Tolas	= 1 Chuttack	= 1 oz. $17\frac{1}{2}$ dwts.
16 Chuttacks	= 1 Seer	= $2\frac{1}{2}$ lbs.
40 Seers	= 1 Mun	= 100 lbs.

N.B. The Maund = 100 English Troy pounds, and 35 Seers = 72 lbs. Avoirdupois.

INDIAN CLOTH MEASURE.

3 Jans	= 1 Ungli	= $\frac{3}{4}$ inch.	8 Girahs	= 1 Hath	= 18 inches.
3 Unglis	= 1 Girah	= $2\frac{1}{4}$ inches.	2 Haths	= 1 Guz	= 1 yard.

The Guz is reckoned 24 to 36 inches in different localities.

LINEAL MEASURE.

1 Hath	= 18 inches.
4 Haths	= 1 Danda = 2 yards.
2,000 Dandas	= 1 Cass = 4,000 yards = $2\frac{1}{4}$ miles nearly.
The Cass or Bengal mile	= 1 mile, 1 furlong, 3 poles, $3\frac{1}{2}$ yards English, but it differs in various places.

BENGAL SQUARE OR LAND MEASURE.

1 Chittack	=	45 square feet or	5 square yards.
16 Chittacks	= 1 Cottah	= 720 "	80 "
20 Cottahs	= 1 Beegah	= 14,400 "	1,600 "
$3\frac{1}{4}$ Beegahs	= 1 Acre.		

The Beegah varies in almost every district.

BENGAL LIQUID MEASURE.

5 Sicca Rupees' weight	= 1 Chuttack	4 Powahs	= 1 Seer.
4 Chuttacks	= 1 Powah.	40 Seers	= 1 Maund

DACCA.

Dacca stands on one of the branches of the Ganges, and extends for six miles along the river. For some time it was the seat of the Mahometan Government of Bengal, and, till lately, was famous for its muslins, which possessed singular fineness and beauty; it has still some manufactures, but its muslins have been superseded by the cheaper fabrics of England. The Safflower comes from this neighbourhood, and the Indigo generally is of a good marketable quality.

BOMBAY AND SINDH.

The Bombay Presidency is formed by a long narrow strip of country, of irregular breadth, stretching along the western shores of India. From north to south it measures about 700 miles, embracing an area, including Sindh and the subject territories, of 140,827 square miles. The roads in this Presidency are bad, but there are more than 700 miles of railway in operation. Sindh, familiarly called "Little Egypt," comprises the lower course and delta of the Indus. Its great feature is its river. The climate is remarkably dry and sultry. The Sindhians are tall, handsome and well made. The manufactures are important, and trade is rapidly increasing.

GOVERNOR—The Right Hon. Sir W. R. S. V. Fitzgerald, G.C.S.I.

COMMISSIONER OF SINDH—Colonel Sir W. L. Merewether, K.C.S.I.

EXTENT, 140,827 square miles.

POPULATION, about 13,533,912.

PRINCIPAL TOWNS.

Bombay, Kurrachee, Poonah, Hyderabad, Sukkur, Shikarpoor.

PRINCIPAL PRODUCTS.

Cotton, Rice, Indigo, Sugar, Pepper, Teak, Wool, Saltpetre, Salt, Coffee, Seeds.

TRADE RETURNS.

Last Return of IMPORTS for one Year, £19,372,955.

Consisting principally of Piece Goods, Woollen Goods, Yarns, Coals, Arms, Cabinet-ware, Drugs, Glass, Jewellery, Ales, Wines.

Last Return of EXPORTS for one Year, £21,883,946.

Consisting principally of Cotton, Spices, Hemp, Seeds, Hides, Saltpetre, Gum, Oils, Grain, Cocoa-nut Oil.

BOMBAY.

Bombay, the capital of the Presidency, is situated at the south eastern extremity of the island of the same name, which is now connected with the mainland by causeways and by the Bombay and Baroda and Great Indian Peninsular Railways. Its harbour is the largest and safest in India, with every requisite for a great sea port. It is easy of access, affords excellent anchorage, is sheltered, capacious, and admirably adapted for docks. The commerce is of great extent and importance; its merchants are among the wealthiest in India. All the Outward and Homeward Mails between England and India now pass through Bombay, from which trunk lines of railway radiate throughout the Indian Peninsula. Bombay trades chiefly with Great Britain, China, Persia, the Arabian Gulf, Africa, France and America. Steamers carrying mails and passengers ply regularly from Bombay to Suez, Point-de-Galle, the Persian Gulf and all the coast ports round to Calcutta.

POPULATION, about 816,562.

3 Pie = 1 Paisa or $\frac{1}{4}$ Anna	0 0 0 $\frac{3}{4}$	16 Rupees = 1 Gold Mohur ..	1 12 0
12 Pie = 1 Anna	0 0 1 $\frac{1}{2}$	100,000 Rupees = 1 Lakh ..	10,000 0 0
16 Annas = 1 Rupee	0 2 0	100 Lakhs = 1 Kroe ..	1,000,000 0 0

In Bombay, accounts are kept sometimes by the old system of Rupees, Quarters and Raes, 1 anna being equal to 25 Raes.

WEIGHTS.

In Bombay the following are the Local Weights in use:—

4 Dhan or Yav	= 1 Raktica or Gunj	2·1267	Grains Troy	0·1182	Tola.
8 Raktica	= 1 Masha	17·0139	" "	·09452	"
4 Masha	= 1 Tank	2·4889	Drachms Avoirdupois	·37809	"
72 Tank, or 30 Pa'is	= 1 Ser	11 $\frac{1}{2}$ oz.	"	27 $\frac{1}{2}$	"
40 Sers	= 1 Maund	28 lbs.	"	1088 $\frac{1}{2}$	"
20 Maunds	= 1 Khandi	560	"	6·8056	Imperial Mán.

The Khandi for Cotton is 28 Maunds or 784 lbs. Avoirdupois or 7 cwt.

The "Pukka Ser" is 1 $\frac{1}{2}$ lb. Avoirdupois or 72·59 Tolas. At Panwel the Ser weighs 72·83 Tolas.

The British Indian or Imperial Ser and Maund are 2·9387755 Bombay Sers and Maunds or 2 $\frac{2}{5}$ and 82 $\frac{2}{5}$ lbs. respectively; and the Bombay Maund is 0·3402778 Imperial Maund.

The Bombay Ser weighs 317·51485 Grammes, and the Maund 12·700594 Kilogrammes.

LINEAL MEASURE.

The Gaz or unit of Lineal Measure not only differs in different provinces of India, but also, like the Ser, in the same province for different purposes. The English yard, however, is rapidly becoming the only standard unit, especially where English education has obtained a firm footing.

3 Jau	= 1 Angli	$\frac{1}{2}$ inch.
4 Angli	= 1 Muthi	3 inches
12 Angli	= 1 Big Hath of Bilisht ..	9 "
2 Big Hath or 24 Angli	= 1 Hath or cubit	18 "
2 Hath	= 1 Gaz or yard	3 feet
4 Hath	= 1 Danda or Bam	2 yards or 1·8287 Metres.
2,000 Danda	= 1 Kos or Kros	4,000 " or 3657·5 "
4 Kros	= 1 Yojan	9 $\frac{1}{2}$ m. or 14630 "

In Bombay the Half Hath is called Vent; and the measuring rod or Kathi for land, according to Jervia, is 9·3644 feet.

POONA.

Poona is the chief town of a district of the same name, situated near the confluence of the Moota and Moola, in a treeless plain 2,000 feet above the sea. It is a well-built place, and contains the former residence of the Peishwas, whose capital the city was, a College, and many public buildings. Poona is an important military post, and its cantonment one of the largest and best arranged in India.

POPULATION, about 80,000.

119 miles from Bombay by Great Indian Peninsular Railway.

MADRAS.

The Madras Presidency extends from Cape Comorin, in latitude $8^{\circ} 4'$ north, to the northern extremity of Ganjam, in latitude $20^{\circ} 18'$, and from east longitude $74^{\circ} 9'$ to $85^{\circ} 16'$. It is nearly as large as Spain. The greater part of its trade is with the United Kingdom, the rest with Bombay, Calcutta, and other Indian ports, Ceylon, the Straits, France, Mauritius, Australia and America. In respect of climate it is the hottest part of India. About 700 miles of railway are open for traffic. Education and the condition of the agricultural classes are here as in other parts of India rapidly improving.

GOVERNOR—The Right Hon. Lord Napier, K.T.

EXTENT, 124,277 square miles.

MADRAS.

Madras, situated on the coast in $80^{\circ} 16'$ east longitude, and $13^{\circ} 5'$ north latitude, is the seat of British Government in Southern India. It is connected with the western coast by rail, and another railway is in progress, joining it with Bombay. Steamers leave regularly for England with the mails and passengers,

and for every maritime town of importance between Rangoon and Kurrachee. It has a considerable trade with Britain, Calcutta, Burmah, the Straits, America, and the Mauritius. It is 640 miles from Bombay, and 885 from Calcutta.

POPULATION, about 720,000.

20 Maunds ..	= 1 Khandi ..	500 lb. "	6.0764 Imperial Maunds.

The Madras Maund is 0.303819 British Indian Maunds, and the British Indian or Imperial Maund is 3.2914286 Madras Maunds; 1 Bombay Maund = 1.12 Madras Maunds and 1 Madras Maund = 0.892857 Bombay Maund. The Madras Maund is sometimes stated at 30lbs. Troy or 0.3 British-Indian-Maund = 24.6857143 lbs. Avoirdupois, which makes the Pollum exactly 3 Tolas and the Khandi 6 British-Indian Maunds.

The Mangelin for Pearls is 6 grains. 18 Madras Chows = 55 Bombay Chows.

The Pagoda Weight = 52.56 grains.

The Weights and Measures recognised by Government are as follows:—

Weights.	Avoirdupois	lbs.	ozs.	drs.	Weights.	Avoirdupois	lbs.	ozs.	drs.
180 Grains = 1 Tola	0	0	6.58		40 Pollums = 1 Viss	3	1	5.94	
3 Tolas = 1 Pollum	0	1	3.75		8 Viss = 1 Maund	24	10	11.54	

1 Drachm Avoirdupois = 27.342 Grains. 1 Ounce Avoirdupois = 437 $\frac{1}{2}$ Grains.

The Maund is generally spoken of as 25 lbs. Avoirdupois.

LAND MEASURE.

1 Munnee or Ground (60 feet by 40 feet) = 2,400 square feet.

24 Grounds..... = 57,600 square feet or 1 Cawnie.†

or

1 Kole or Rod = 24 feet.

1 square Kole or Gooles = 576 square feet.

100 Gooles = 57,600 square feet or 1 Cawnie.†

In some districts the Cawnie is divided into Annas or sixteenths, each Anna being 3,600 square feet, or a square of 60 feet each way.

The Gooles is often called Coolee or Goontah.

Since an Acre is 43,560 square feet or 4,840 square yards, and a Cawnie is 57,600 square feet or 6,400 square yards, it follows that

1 Cawnie = 1.322,316 Acre.

1 Acre = 0.75,625 Cawnie.

And 640 Acres or 484 Cawnies = 1 square mile.

1 Beegah of N.W. Provinces = 3,025 square yards or 1 Acre = 1.6 Beegahs.

* This arrangement is suspended for the present, but will be resumed, it is expected shortly.

† See also pp. 11 and 12, for general explanation.

‡ In a map drawn to a scale of 80 yards to an inch, a square inch is just 1 Cawnie, for the square root of 6400 = 80, whilst that of 4840 = 69.57.

NORTH WEST PROVINCES.

These Provinces stretch from Bengal proper on the east, to the Punjab on the west, and from Bundelkund, Central India, and Rajpootana on the south to Nepaul, Oudh, and Thibet on the north. The Divisions are five in number, viz., Meerut, Rohilkund, Agra, Allahabad, and Benares. Vegetable products are many, but hardly any minerals are found. The climate is subject to great extremes. The population is dense; temples and holy places in these provinces are more numerous than in any other parts of India. Education is good, and there are colleges at Agra, Bareilly, and Benares. The roads are many and excellent. Water carriage is abundant in almost every district. A railway runs through the heart of the country from Benares to Delhi, and a system of telegraphs unites all the large towns.

LIEUTENANT-GOVERNOR—The Hon. Sir W. Muir, K.C.S.I.

EXTENT, 83,369 square miles.

POPULATION, about 30,110,615.

PRINCIPAL TOWNS.

Agra, Allahabad, Bareilly, Benares, Cawnpore, Delhi, Meerut, Mirzapore.

PRINCIPAL PRODUCTS.

Indigo, Opium, Barley, Wheat, Flax, Sugar, Cotton, Saltpetre, Tobacco, Rice, Hemp, Tea, &c.

A G R A .

Agra, on the south bank of the Jumna, was formerly the favourite residence of the Mogul Emperors, and till lately the seat of the Government of the North West Provinces. It has a fine fort, built of red granite, several buildings of historic note, many public edifices, and large private residences. In the neighbourhood is the world-renowned Taj Mahal.

POPULATION, about 76,600.

PUNJAB.

The Punjab extends from the river Jumna on the east to the Soliman mountains on the west, and from Cashmere on the north to Rajpootana and Sindh on the south. It is governed by a Lieut.-Governor, and each division is placed under a Commissioner. There are two colleges, one at Lahore and another at Delhi, which prepare their pupils for the Calcutta University examinations. More has been done in the Punjab for female education than in all the rest of India. The people are principally employed in agriculture, but the manufactures are important and considerable. It possesses great facilities of transit, in its many

navigable rivers. The roads are good, the canals numerous. Railways are fast progressing, and when complete will form an irregular arc from Mooltan to Delhi, taking in Lahore, Umritsur, Umballa, Meerut, &c.

LIEUTENANT-GOVERNOR—The Hon. Sir D. F. McLeod, K.C.S.I.

EXTENT, 95,768 square miles.

POPULATION, about 17,593,946.

PRINCIPAL TOWNS.

Delhi, Lahore, Mooltan, Peshawur, Simla, Umritsur.

PRINCIPAL PRODUCTS.

Salt, Alum, Sulphur, Nitre, Coal, Iron, Gold, Sugar-cane, Palm, Orange and other fruit-trees, Grain-crops, Opium, Indigo, Tobacco, Tea, Silk and Cotton fabrics, Carpets, Shawls, Warlike-arms, Tow, Furs, and Feathers, Gums and Resins, Horns and Hides, Oil, Rice, Spices, &c.

DELHI.

Delhi stands on the west bank of the Jumna, and was the capital of the Mogul Emperors. Formerly it occupied an area of twenty square miles, but now great part is covered with ruins. The present city contains several splendid palaces and mosques; the Imperial Palace is about a mile in circuit. In the width and cleanliness of its streets, Delhi appears like an European town.

POPULATION, about 160,000.

1,018 miles from Calcutta by East Indian Railway; 868 from Bombay.

ODUH.

Oudh is situated in the centre of the great Sub-Himalayan valley drained by the Ganges and its tribu-
 taries. There are few portions of India that surpass it in productiveness. The trade is very considerable;
 European Wines and stores of all sorts, Piece Goods, Yarn and Hardware, are imported from Calcutta, Salt
 and Cotton from the North West Provinces, Cattle, Copper, Iron, and Spices from Nepaul. The inland
 trade is assisted by annual fairs, the largest of which is held at Khyrabad.

BRITISH BURMAH.

The three maritime provinces of India beyond the Ganges, comprising the ancient kingdoms of Pegu and Arakan, with the long line of sea coast called Tenasserim, were united under one local administration in January 1862, and called British Burmah. The commerce of British Burmah is carried on chiefly with Great Britain, Calcutta, Madras, Bombay, the Straits, Ceylon, and the Nicobars. Its value increases every year, the Exports exceeding the Imports in value. The chief pursuit is agriculture, and the soil is exuberantly fertile. In the large towns the chief occupations are making common pottery, gold and silver work, making idols, gilding and varnishing. Water affords the chief means of communication in British Burmah. All the towns are situated on navigable rivers, and roads are less needed. There are no railroads, but steamers constantly ply between the chief ports and those of India. Telegraphic communication exists between the principal places and Calcutta. At the principal sea ports, Europeans and Foreign Asiatics have settled in considerable numbers. Their knowledge, enterprise and capital have opened markets for the Timber, Rice, Petroleum and other products of the country, which could not have been done under native government.

CHIEF COMMISSIONER, Major-General Albert Fytche, C.S.I.

EXTENT, 90,070 square miles.

POPULATION, about 2,392,311.

PRINCIPAL TOWNS.

CHINA.

This large and important country occupies a great part of eastern Asia. It consists of an elevated region in the north, an alluvial plain in the centre, and in the south, a region alternately undulating and interspersed with valleys and mountains. The coast line is estimated at 2,500 miles in length, with many good harbours. In China, the winters are colder and the summers hotter than in the same parallels of western Europe. The vegetable productions belong principally to the temperate zone. The Chinese have attained great eminence in the manufacture of Silk and Porcelain, of Cotton and Lacquered Wares, and they excel in the art of Carving, Embroidery, Dyeing, &c. The internal traffic is enormous, great part being carried on by means of the rivers. The population is very dense, and, in consequence, the ground is well cultivated. Since the opening of the Treaty Ports, commerce has steadily increased.

EXTENT OF CHINA PROPER about 1,300,000 square miles.

POPULATION FROM 350,000,000, to 400,000,000.

PORTS OPEN TO FOREIGN TRADE.

Canton, Swatow, Amoy, Formosan Ports, Foochow, Ningpo, Shanghai, Chinkiang, Kewkiang, Hankow, Chefoo, Tientsin, Hong Kong (British Colony), Macao (Portuguese Colony).

PRINCIPAL PRODUCTS.

Bamboo, Camphor, Rice, Cotton, Wheat, Barley, Millet, Tobacco, Tea, Silk, Sugar, Cassia, Musk, Gema, Copper, Tin, Lead, Mercury, Arsenic, Iron, Porcelain Clay, &c.

TRADE RETURNS.

Return of IMPORTS from foreign ports, for 1868, £23,707,071.

Consisting principally of Spun Cotton and Woollen Cloths, Calicoes, Chintzes, Opium and Cotton from India, Metals, Beer, Ale, Coals, Hardware, Lead and Shot, Arms and Ammunition, &c.

Return of EXPORTS to foreign ports, for 1868, £23,038,244. 6s. 8d.

Consisting principally of Tea, Silk, Silk Piece Goods, Cassia Lignea, Rhubarb, Camphor, Aniseed, Essential Oils, Nankeen, Porcelain, Lacquered Wares, Ivory and Ornamental Work, Canes or Sticks, Mats and Matting, &c.

N.B. The above figures show the total value of foreign trade with China, for 1868, including the re-exports.

Deducting these the foreign trade with China in the year 1868 amounted to about £46,666,666. 13s. 4d. sterling, and of that trade the share of Great Britain amounted to no less than 108 millions of Taels, £36,000,000, or nearly 63 per cent. of the whole.

* STEAM COMMUNICATION WITH CHINA.

CHINESE WEIGHTS AND MEASURES.

COINS.

In Canton accounts are kept in Taels, Mace, Candarines, and Cash. The Tael is equal to 10 Mace, 100 Candarines, or 1,000 Cash. The only money made in China is called Cash, and is cast, not coined, and is used only for small payments. It is composed of six parts, of copper and four of lead. It is round, with a square hole in the middle, marked on one side, and slightly raised at the edges. These pieces are carried on a string of wire.

Foreign Coins also circulate here, especially Spanish Dollars, which are cut into very exact pieces, but afterwards weighed, and merchants generally carry scales, not much unlike the plan of the English steelyard.

* Full particulars will be found under each Port.

The Tael, once reckoned as 6s. 8d. sterling, varies in value, generally in proportion to the price paid per ounce in London for Spanish Dollars. The value may be calculated as pence by multiplying it by 1·208. Thus, if the Dollar be 60d. per ounce, the Tael will be $60 \times 1\cdot208 = 72\cdot48d$.

Silver ingots are used as money, but Gold is considered as merchandise.

WEIGHTS.

Gold and Silver are weighed by Catty of 16 Taels, each Tael being equal to 10 Mace, 100 Candarines, or 1,000 Cash. 100 Taels = 120 ozs. 16 dwts. Troy, and so a Tael = 579·8 English grains, or 37·566 Grammes.

Table of Principal Weights for Merchandise:—

	lbs.	ozs.	dwts.	lbs.	ozs.
1 Tael weighs Avoirdupois	0	1	5·333	0	1 $\frac{1}{2}$
16 Taels or 1 Catty	1	5	5·333	1 $\frac{1}{2}$	0
100 Catties or 1 Picul	133	5	5·333	133 $\frac{1}{2}$	0

The Picul weighs 162 lbs. 8 dwts. 13 grs. Troy, or 60·472 Kilogrammes.

In China dry goods and liquids are sold by weight. An English cargo is delivered according to English weights, which are then turned into Chinese Piculs and Catties.

LONG MEASURE.

The unite is the Coved or Cobre, divided into 10 Puntos, and equals 14·625 English inches, or 0·3713 metres.

There are four different measures according to the foot, viz.—

	Eng. Inches.	Metres.
The foot of the Mathematical Tribunal	= 13·125	= 0·333
The Builders' foot	= 12·7	= 0·3228
The Tailors' and Tradesmen's foot	= 13·33	= 0·3383
The Engineers' foot	= 12·65	= 0·2211

The Li = 180 fathoms, each 10 feet of the last-mentioned length, thus the Li = 1·897 $\frac{1}{2}$ English feet; 192 $\frac{1}{2}$ Lis = a mean degree of the meridian nearly; but, by European missionaries, the degree is made to measure 200 Lis, each Li = 1·826 English feet, thus making a degree = 69·166 miles = 11·131 Myriamètres.

* CUSTOMS' TARIFF.

EXPLANATION OF WEIGHTS AND MEASURES AND MONEYS USED IN THIS TABLE.

1 Tael = 6s. 8d.	} Subject to the fluctuations of the Money Market.
10 Mace = 1 Tael	
10 Candarine = 1 Mace	
10 Cash = 1 Candarine	
A Picul of 100 Catties = 133 $\frac{1}{2}$ lbs. Avoir.	
A Chang = about 3 $\frac{1}{2}$ yards.

RULES, &c.

EXEMPTIONS.—Gold and Silver Bullion, Foreign Coins, Flour, Indian Meal, Sago, Biscuits, Preserved Meats and Vegetables, Cheese, Butter, Confectionery, Foreign Clothing, Jewellery, Plated-ware, Perfumery, Soap of all kinds, Charcoal, Firewood, Candles (Foreign), Tobacco (Foreign), Cigars (Foreign), Wine, Beer, Spirits, Household Stores, Ship's Stores, Personal Baggage, Stationery, Carpeting, Druggery, Cutlery, Foreign Medicines, Glass, and Crystal Ware.

Articles not in the list of duty-free goods, pay an *ad valorem* duty of 5 per cent., calculated on their market value.

CONTRABAND GOODS.—Import and Export trade is alike prohibited in the following articles:—Gunpowder, Shot, Cannon, Fowling Pieces, Rifles, Muskets, Pistols, and all Munitions and Implements of War, and Salt.

Saltpetre, Sulphur, Brimstone, and Spelter, being Munitions of War, shall not be imported by British subjects, save at the requisition of the Chinese Government, or for sale to Chinese duly authorised to purchase them. No permit to land them will be issued until the Customs have proof that the necessary authority has been given to the purchaser.

HONG KONG.

Hong Kong is an island off the coast of China, east of the entrance of the Canton river, now forming a British Colony. On the north side is the capital, Victoria, laid out in streets and terraces on the steep declivity of Victoria Peak, with many fine public buildings and picturesque dwellings surrounded with gardens. On the south coast is the town of Stanley. The commerce is inferior to that of some treaty ports of China, but as a British Colony it is most important in its political and defensive position, and is the headquarters of the military, naval, and mercantile establishments. It became a British possession by treaty with the Chinese in 1843. The climate is hot during the summer (the mean temperature of July being 88°), but a considerable degree of cold is experienced during the opposite season of the year; and sudden changes in the condition of the air are not infrequent.

GOVERNOR—His Excellency Sir R. G. Macdonnell, C.B.

EXTENT, above 32 square miles.

POPULATION, 125,000.

TRADE RETURNS.

As the Port of Hong Kong is entirely free from every impost, no Export or Import Duties being leviable, and there being no charges even for lights or tonnage dues, direct information as to the value of the trade cannot be furnished. It is, however, not wholly impossible to gauge the magnitude of the operations conducted within the confined limits of this small island, and the following estimate of the trade done has been compiled on the report of sales effected daily, as given in the Morning Paper published in the Colony, which reports being exposed to the whole mercantile community, are subjected to a tolerably severe test; and, when it is added that the names of both the vendor and the vendee are published, their peculiar accuracy for all statistical purposes can hardly be doubted.

* Total Annual Return Sales of the Hong Kong Market for 1868, £6,127,695. 0s. 9d.

Consisting principally of Opium Cotton, Yarn, Grey Shirtings, T. Cloths, Long Ells, Spanish Stripes, Lastings, Camlets, Coals, Rice, Iron, Lead, Sugar, Beeswax, Ship Chandlery, Hardware, &c.

SHANGHAI.

Shanghai is a seaport town and foreign settlement of China, the chief emporium now open for European commerce. It stands on a level, highly-cultivated plain, and is enclosed by a wall five miles in circuit. It has some flourishing manufactures of flowered Silks and Muslins of a peculiar kind, and of Iron Wares, Glass, Paper, Artificial Flowers, and Wares in Ivory, Bone, Gold and Silver. It is an important entrepôt of the commerce between the North and South Provinces of China. An extensive internal communication by water facilitates its trade with all the north half of China, and it is stated to have a direct trade with the countries of Central Asia. Its coasting trade is very extensive. The foreign settlement is situated outside the walls to the north and east, and is divided into the British, French and American concessions. The British is the most important, and stately edifices are occupied by the principal mercantile firms.

POPULATION, 450,000.

CANTON.

Canton is a city and seaport of China on the left bank of the Canton or Pearl river, about 70 miles from its mouth, in the China sea. The manufactures are various and extensive, and the shops are fitted with articles of Chinese workmanship. Until 1843, all the legitimate foreign trade of China was conducted at Canton. Since then, the opening of the northern ports has seriously checked the trade of the southern emporium, especially those on the Yang-tse river, whence the greater part of the Teas are exported, which were formerly shipped from Canton. Tea is the great article of foreign export; next Silk and Silk Piece Goods, Precious Metals, Cassia, Sugar, Porcelain, and other articles.

POPULATION, 1,245,000.

TRADE RETURNS.

Return of IMPORTS from foreign ports for 1868, £2,349,914. 6s. 8d.

Consisting principally of Raw Cotton, Cotton Yarn, Shirtings, Camlets, Lastings, Long Ells, Spanish Stripes and other Cloths, Iron, Lead, Spelter, Steel, Copper, Tin-plates, Biche-de-Mer, Cochineal, Ebony, Ivory, Flints, Cloves, Gambier, Gum, Hides, Pepper, Rattans, Sandal-wood, Japan-wood, Window-glass, Salt, Saltpetre, Rice and Opium.

Return of EXPORTS to foreign ports for 1868, £3,765,588.

Consisting principally of Tea, Raw Silk, Silk Piece Goods, Nankeens, Alum, Cassia, Bamboo and Rattan-ware, Camphor, China-ware, Ivory-ware, Fireworks, Paper, Furniture, Lacquered Ware, Vermilion, Oil, Tobacco, Medicines, Matting, Preserved Fruits.

FOOCHOW.

Foochow is one of the treaty ports opened for foreign commerce on the Min river, 25 miles from its mouth. The city has a main street, with residences for the public functionaries. Large quantities of cotton goods and well-dyed blue cloths are manufactured here, and porcelain in great abundance. Near it are extensive lead-mines; and the black tea district being within 70 miles, tea is procured here cheaper than in Canton. A commerce is carried on with the maritime provinces of China, with the Loo-Choo Islands and Japan. It exports Timber, Tea, Paper, Bamboo, Sugar, Spices, &c.; and its imports comprise Eastern Straits produce, European manufactures, and a variety of other goods.

POPULATION about 600,000.

MACAO.

Macao is a seaport town and settlement of the Portuguese in China, seventy miles S.S.E. of Canton. The principal inhabitants are Chinese, and there are Portuguese, English, Americans, &c. The trade of Macao was formerly restricted to the Portuguese and Spanish shipping, but now it is chiefly English and American. The settlement has no export product itself. The Portuguese authorities and others form a Senate, a Governor and Council, but the government of native inhabitants is substantially vested in a Chinese Mandarin. It was granted to the Portuguese, subject to an annual rent, by the Chinese Emperor in 1856, in return for assistance against pirates. In 1863 the payment of this tribute was rescinded, and the land conceded by treaty to Portugal, but jurisdiction over the Chinese inhabitants retained.

GOVERNOR—Almirante Antonio Sergio de Souza.

POPULATION, 57,000 Chinese, and 4,000 Eurasians.

70 miles S.S.E. from Canton.

TRADE RETURNS.

Macao being a free port no trade returns are issued.

STEAM COMMUNICATION.

From Hong Kong to Macao daily, by HONG KONG, CANTON AND MACAO STEAMBOAT COMPANY. Time of transit $3\frac{1}{4}$ hours.

The average time of voyage from England by sailing vessels is about 3 months with, and from 4 to 5 against, the monsoon. Fares £50 to £70.

JAPAN.

This Empire of Eastern Asia comprises the islands Nippon, Kinsin, and Sikok, with the dependencies Yesso, the south part of Tarakai or Saghalien, and many smaller islands. The interior remains quite unexplored by Europeans. The climate is so varied that almost every province has different products; it is in general mild and healthy. The products are in great variety, and in manufactures the Japanese equal the Chinese. By the treaty of Yeddo, 1858, the ports of Hakodadi, Yokohama, and Nagasaki were opened to British Commerce.

EXTENT about 160,000 square miles.

PORTS OPEN TO FOREIGN TRADE.

Hakodadi, Nagasaki, Yokohama, Hiogo.

POPULATION from 35,000,000 to 40,000,000.

PRINCIPAL PRODUCTS.

Cotton, Rice, Barley, Wheat, Tea, Tobacco, Silk, Hemp, Ginger, Gold, Silver, Iron, Lead, Tin, Copper, Diamonds, Coal, Lime, Sulphur, Salt, Amber, &c.

TRADE RETURNS.

Last Return of IMPORTS from foreign ports for one Year, £3,313,795. 12s. 7d.

Consisting principally of Apparel and Haberdashery, Beer and Ale, Cotton Yarn, Cottons entered by the yard, Lead and Shot, Linens entered by the yard, Machinery and Millwork, Perfumery, Soap, British Spirits, Woollens entered by the yard, &c.

Last Return of EXPORTS to foreign ports for one Year, £4,512,780. 12s. 5d.

Consisting principally of Camphor, Raw Cotton, Galls, Japanned or Lacquered Ware, Oil, train or blubber, Rags and other materials for Paper, Seeds, rape, Silk, raw, Tea, Tobacco, Wax, Vegetables, &c.

COINS, WEIGHTS AND MEASURES.

COINS.

The coins now in circulation in Japan may be enumerated as follows:—

- The Bu or Ichibu (silver) = 2·3 Momme (133·95 grs.) = 1s. 4d. $\frac{1}{100}$ sterling
- The Iahu (silver) = 1·15 Momme (29·12 grs.) = $\frac{1}{2}$ Ichibu.
- The Nishu or 2-Shu piece (silver gilt) = 2 Shus = $\frac{1}{2}$ Ichibu.
- The Nibu or 2-Bu piece (gold and silver mixed) = 1·6 Momme (93·184 grs.)
- The Rio or Kobang (gold) = ·88 Momme (51·25 grs.) = 5s. 6d.
- The Zeni or Mongseng (iron) = $\frac{1}{100}$ Ichibu.
- The Hachi Mongseng or 8 Mongseng (iron and copper).
- The Tempo or Hiyaku-Mongseng or 100 Mongseng (copper).

In addition to, and alongside of, the regular coined currency of Japan, there exists another uncoined and irregular currency. It consists of irregularly-shaped pieces of silver of small fineness, varying considerably in size, bearing a small Government stamp, but passing according to weight.

Accounts are kept on both systems of currency, varying according to place and occupation, as well as according to the subject to which the accounts refer.

In accordance with the 6th Article of the Convention, concluded June 25th, 1866, with foreign powers, arrangements have been made for issuing a new silver coin, equal to 4 Ichibus of circular shape, to replace the gold Rio or Kobang. It is probable a single coin will be selected as the standard of value instead of making gold and silver both a legal tender.

WEIGHTS MEASURES AND CURRENCY OF JAPAN.

The system of notation in Japan is decimal, and most, though not all, of the weights and measures bear a decimal proportion to each other. In the coinage the decimal system has been neglected for one which, though less convenient, is more natural; the silver coins have been halved and quartered; the copper have been doubled and re-doubled. But even here the decimal has been called in, as if to preserve the calculator from the difficulties of the other system, imperfectly developed; 96 is allowed to pass for the square of 10.

The two lines in parentheses express the equivalent in Japanese weights of certain well-known Chinese weights which are much in use among foreigners in Japan. They have no existence as pure Japanese weights, any more than Hiakume, Quamme and two or three others, which appear in most foreign works containing Japanese tables of weights and measures.

The following table shows the approximate value in Japanese weights of the various denominations of the English Avoirdupois and Troy scales:—

AVOIRDUPOIS.

1 Drachm.. .. .	=	·4695 Momme.	1 Hundredweight	=	13461· Momme.
1 Ounce	=	7·5117 „	1 Ton	=	269220 „
1 Pound	=	120·187 „			

TROY.

1 Grain	=	·01717 Momme.	1 Ounce.. .. .	=	8·242 Momme.
1 Pennyweight	=	·4121 „	1 Pound.. .. .	=	98·1 „

MEASURES.

The following is a Table of the Japanese Long Measure, or Carpenters' Measure as it is often called, with the English values of each division.

1 Ring	=	·011954 inches, or	·000996 feet.
10 Ring = 1 Bu	=	·11954 „	·00996 „
10 Bu = 1 Sung	=	1·1954 „	·09962 „
10 Sung = 1 Shaku	=	11·954 „	·9962 „
6 Shaku = 1 Keng	=		5·9772 „
60 Keng = 1 Choo	=		358·636 „
36 Choo = 1 Ri	=	12910·9 feet or ..	2·4452468 miles.

Below are the Japanese equivalents of the principal English measures.

1 Inch	=	·08378 Shakus
1 Foot	=	1·003362 „
1 Yard	=	3·016086 „
1 Pole	=	16·588473 „
1 Furlong	=	663·539 „
1 Mile	=	5308·312 „
1 Geographical Mile	=	6119·304 „
1 Degree	=	367158 „ or 28 330111 Ri.

CLOTH MEASURE.

10 Bu = 1 Sung = very nearly 2½ inches.	10 Shaku = 1 djoo. = very nearly 12½ yards.
10 Sung = 1 Shaku = very nearly 1¼ foot.	

SUPERFICIAL MEASURE.

The integer of this measure is the Kanedjaku, or the metal shaku, with which we have already had to deal. Its multiples, and the value of each, are as follows:—

1 Square Shaku	=	·99244 square feet.
36 Shaku = 1 Tsubo	=	35·72784 „
30 Tsubo = 1 Se	=	107·184 „
10 Se = 1 Tang	=	1071·84 „
10 Tang = 1 Choo	=	10718·4 „ or nearly ¼ of an acre.

Below are given the values, in Japanese measurement, of the principal English measures.

1 Square Foot	=	1·010748 Square Shaku	·028070 Tsubo.
1 Square Yard	=	9·09675 „	·25268 „
1 Square Pole	=	295·6443 „	8·2123 „
1 Rood	=		305·75 „
1 Acre	=		1223 „
1 Square Mile	=		782725 „

The following table gives all the Japanese measures of capacity, with their corresponding Chinese names, and their respective values in English cubic and Imperial liquid measurement:—

10 Sai	=	1 Shiyaku (Choh) =	1·1075 cubic inches.	
10 Skiyaku	=	1 Ngoō (Koh) =	11·075 „	or 3195 pints.
10 Ngoō	=	1 Shoō (Shing) =	110·75 „	or 3·195 „
10 Shoō	=	1 To (Tau) =	1107·5 „	or 3·9942 gallons.
10 To	=	1 Kōku =	6·409 cubic feet	or 4·9928 bushels.

EASTERN ARCHIPELAGO, &c.

The name of Straits Settlements is given to the British Possessions of Singapore, Malacca, Penang or Prince of Wales Island, and Province of Wellesley. The chief trade is with Great Britain, and it has increased very rapidly. In 1867 the Government passed from that of India to the Colonial Office.

GOVERNOR OF STRAITS SETTLEMENTS, comprising Singapore, Malacca, Penang or Prince of Wales Island, and the Province of Wellesley—

Major-General, H. St. George Ord, R.E., C.B.

EXTENT of Straits Settlement 1,500 square miles.

POPULATION, about 280,000.

SINGAPORE.

This town consists of an island off the south extremity of the Malay peninsula, separated from the mainland by a strait, which in one part is only a quarter of a mile. The climate is healthy, the mean temperature being 80° 6'. It is valuable, principally, as a depôt for the British and Indian trade with the islands of the Eastern seas. It exports Teak, Tin, Pepper, Gutta Percha, Sago, Rice, Coffee, Sugar, Caoutchouc, and imports Cottons, Woollens, Arms, Iron, Copper, Linens, Coals, Hardwares, Apparel, &c. The capital is well built, and consists of Malay, Chinese and European quarters. It has convenient quays.

POPULATION, 80,000.

AUSTRALIA.

Australia, though strictly an island, is usually described as a continent, owing to its vast extent. It is situated between the Pacific and Indian Oceans, to the south east of Asia. The population is rapidly increasing and will soon reach two millions. Its productions are various, and its climate is not unhealthy. The Australian seasons are the reverse of those of Great Britain, autumn beginning about the 22nd of March, winter about June 22nd (the shortest day), spring about September the 23rd, and summer about December the 22nd (the longest day).

EXTENT, 2,582,072 square miles.

Australia consists of the following Colonies:—

<i>Victoria</i>	Capital Melbourne	<i>Queensland</i>	Capital Brisbane
<i>New South Wales</i>	„ Sydney	<i>Western Australia</i>	„ Perth
<i>South Australia</i>	„ Adelaide		

POPULATION, about 1,852,080.

PRINCIPAL PRODUCTS.

Maize, Wheat, Flax, Tobacco, Indigo, Vines, Olives, Sugar, Cotton, Gold, Copper, Iron, Coal, Silver, Mercury, Tin, Zinc, Antimony, Wool, &c.

VICTORIA.

Victoria is situated on the south-east corner of Australia. Formerly it was called the “Port Phillip District,” and belonged to New South Wales, but in 1851 it was separated. It is the most populous and most progressive of the colonies of Australia. Its climate is healthy. Nearly 300 miles of railway have been completed. Wool was the staple commodity before the discovery of gold, which at once attracted a crowd of emigrants, which has ever since continued, though naturally not in so large numbers as at first. Agriculture is being successfully practised, and the best machinery is being introduced. The government is vested in a Governor appointed by the Crown, an Executive Council, a Parliament consisting of a Legislative Council and Legislative Assembly.

GOVERNOR AND COMMANDER-IN-CHIEF—Viscount Canterbury, K.C.B.

EXTENT, 86,832 square miles.

POPULATION, about 723,840.

PRINCIPAL TOWNS.

Melbourne, Geelong, Ballarat, Sandhurst, Beechworth, Castlemaine, Portland, Kyneton.

NEW SOUTH WALES.

This British Colony is situated on the east of Australia, with South Australia on the west, and on the south the river Murray, and the Colony of Victoria and Queensland on the north. Two immense territories, Victoria and Queensland, have been detached from it, yet it has more than doubled its population in fifteen years. The climate is salubrious and agreeable; the mean temperature at Sydney is about 61°, the hottest month is January, and July the coldest. The great staple is Wool, and lately it has immensely increased. It also produces, gold, silver, coal, iron, copper, cotton, and tobacco. The government is vested in a Governor, appointed by the Crown, and an Executive Council, nominated by him, a Legislative Council, and a Legislative Assembly.

GOVERNOR AND COMMANDER-IN-CHIEF AND VICE-ADMIRAL OF NEW SOUTH WALES—His Excellency the Earl of Belmore.

EXTENT, about 325,000 square miles.

PRINCIPAL TOWNS.

Sydney, Bathurst, Braidwood, Goulburn, Maitland, Newcastle, Paramatta.

POPULATION, about 500,000.

PRINCIPAL PRODUCTS.

Gold, Coal, Iron, Copper, Tin, Lead, Platina, Wheat, Indian Corn, Barley, Oats, Potatoes, Tobacco, Wine, Wool, Hides, Tallow, &c.

TRADE RETURNS.

Last Return of IMPORTS for One Year, £6,599,804.

Consisting principally of Gold, Leather, manufactured, Sugar, unrefined, Flour and Bread, Tea, Apparel and Slops, Wheat, Hardware, Wine, Woollens, Tobacco, Iron and Steel, &c.

Last Return of EXPORTS for one Year, £6,880,715.

Consisting principally of Gold, Wool, Coal, Tea, Hides and Skins, Gold-dust, Flour and Bread, Spirits, Sugar, &c.

SYDNEY.

This town, the capital of New South Wales, is built on the southern shores of Port Jackson, seven miles from the entrance to the harbour. It is the oldest city in Australia, being founded in 1788, by Capt. Phillip. The harbour is quite land-locked, with deep water to the edge of its rocky shores. It is a handsome city, with numerous public buildings, banks, warehouses, and elegant private residences. It has a mayor, a municipality, a famous university, colleges, a grammar school, an observatory, and a museum. Its commerce and importance are much owing to the gold discoveries.

POPULATION, about 120,000.

* NEWCASTLE.

This is one of the leading towns of New South Wales, and of a district which is rapidly becoming the great coal field of the Southern Hemisphere. It is situated about 75 miles from Sydney, with which town there is daily communication by steamer. Besides the valuable coal mines (the production of which has about doubled in five years), agriculture is extensively pursued, and altogether this is one of the most flourishing seats of colonisation. The population of the town itself is about 12,000. It should be mentioned that there is railway communication with several of the towns in the neighbourhood.

SOUTH AUSTRALIA.

This British Colony has advanced greatly in population and wealth, though it has had to encounter great changes. It was colonized in 1836. It is specially adapted for agricultural purposes, and its principal export is wool. It possesses some valuable copper mines, the largest being the Burra-Burra mine. The climate is healthy, similar to that of Victoria. The government is vested in a Governor with an Executive Council, a Legislative Council and Legislative Assembly.

GOVERNOR-IN-CHIEF AND CAPTAIN-GENERAL—His Excellency Right Hon. Sir James Fergusson, Bart.

QUEENSLAND.

This is the most extensive and the youngest of the Australian colonies, occupying the north-eastern portion of Australia. It was formerly known as the Moreton Bay District, and formed part of New South Wales, but in 1859, it was proclaimed a distinct colony. Its seaboard is well suited for maritime commerce, having many splendid bays, among which is Moreton Bay, 65 miles by 20. It produces cotton, sugar and tobacco; also wool, which, as yet, is the staple production; gold, copper, and coal have already been discovered. Cattle and sheep are plentiful. The climate is warm, but healthy, and closely resembling that of Madeira, with a mean annual temperature of 68° at Brisbane. The government, as in other colonies, is vested in a Governor and two Houses of Legislature.

GOVERNOR—Major S. W. Blackall.

EXTENT—678,000 square miles.

POPULATION—about 107,427.

PRINCIPAL TOWNS.

Brisbane (the capital), Ipswich, Toowoomba, Drayton, Warwick, Dalby, Gayndah, Maryborough, Rockhampton, Gladstone, Roma, Bowen, Leyburn, Mackay, Somerville.

BRISBANE.

Brisbane, the capital of Queensland, unlike many colonial towns, possesses a site unsurpassed for beauty and utility by any in the Australias. It is situated 22 miles from the mouth of the river of that name, a noble stream flowing into Moreton Bay. In Brisbane the head offices of the various departments of Government are located. The principal commerce of the country is here carried on.

IPSWICH.

This town of Queensland is situated on the Brisbane river, at the head of the Moreton Bay navigation. It is an important town of the colony, and contains the terminal station of the Darling Downs Railways, which are opening up the pastoral country to the west and south. It is the centre of the principal agricultural and cotton producing district in Queensland, and is surrounded by extensive coal fields. It is the commercial depôt for nearly all the wool and cotton grown in the southern or principal portion of the colony.

POPULATION (Town and District) 16,000.

STEAM COMMUNICATION.

By Steamer daily to Brisbane, a distance of about 20 miles.

WESTERN AUSTRALIA.

This colony, better known by its former name of "Swan River Settlement," is situated on the west side of Australia. Only a small portion of it, the south-east angle is occupied, about 600 miles from north to south with an average breadth of 150 miles. It is the oldest of our Australian colonies, having been founded in 1829, and for many years advanced but slowly, though the climate is as healthy as in other portions of the continent. It is now, however, beginning to make progress. After the cessation of transportation to Tasmania, this colony was, by the consent of the more prominent colonists, made a penal settlement, but it will not be long so. There is a scarcity of labour. The land is fertile, especially in the northern division. Magnetic Iron Ore, Lead, Copper and Zinc, are found, and also Coal. The government is vested in a Governor and an Executive Council, and also a Legislative Council.

GOVERNOR—His Excellency Frederick Aloysius Weld, Esq.

EXTENT, 978,000 square miles.

POPULATION, about 28,500.

PRINCIPAL TOWNS.

Perth, Freemantle, Guildford, York, Northam, Newcastle, Albany, Vasse, Bunbury, Australind, Augusta, Mandurah, Geraldton, Lynton.

PERTH.

The city of Perth, the capital of Western Australia, is about 450 miles by sea from King George's Sound, 1,850 from Adelaide, and 2,250 miles from Melbourne. Its position is well chosen, not only on account of its beauty, but for the more solid advantages which it possesses. It has an unlimited supply of good water, and perfect drainage. The town is regular, with excellent houses of brick and stone, surrounded by large verandahs and neat gardens, with various places of worship, a government house, court house, hotels, public offices and inns.

POPULATION, about 4,500.

NEW ZEALAND.

This is a British Colony in the South Pacific, and consists of three islands, respectively called the North, Middle, and Southern or Stewart's Island; the last named is of comparatively insignificant size, and for purposes of government is annexed to Southland, the southernmost province of New Zealand. The products of New Zealand are both valuable and varied. In the Northern and Middle Islands, gold has been found in large quantities, while coal of the best kind has been for a long time mined, and used in the colony. The forests of New Zealand are proverbial for the quantity and quality of the timber obtained from them. The climate equals if it does not exceed in salubrity any of the Australasian colonies, chiefly on account of its equable nature.

GOVERNOR—His Excellency Sir George Ferguson Bowen, K.C.B.

EXTENT, 106,259 square miles.

New Zealand is divided into the following nine Provinces, each of which is governed by a Provincial Council and an elected Superintendent:—

<i>Auckland</i>	Capital Auckland	<i>Otago</i>	Capital Dunedin
<i>Canterbury</i>	Christchurch	<i>Southland</i>	Invercargill
<i>Hawkes Bay</i>	Napier	<i>Taranaki</i>	New Plymouth
<i>Marlborough</i>	Picton	<i>Wellington</i>	Wellington
<i>Nelson</i>	Nelson		

POPULATION (including 40,000 Natives) about 300,000.

AUCKLAND.

This is the Northern Province of the North Island, and in dimensions is about half the size of England. The climate is warmer than in other parts. In it are pine forests, Lake Taupo, the largest of New Zealand lakes, and numerous hot springs and chalybeate waters. There are great facilities for water carriage, and the harbours are well sheltered.

SUPERINTENDENT—His Honour Thomas Barmatye Gillies.

AUCKLAND.

Auckland, the capital of the province, occupies a commanding position on the Southern shore of the Eastern Harbour. It is possessed of good wharf accommodation, and ships of the largest tonnage are able to lie alongside the main wharf, and obtain quick discharge. The town itself is situated in a natural basin, and is well laid out in numerous streets, in which are large warehouses and shops. There are numerous churches, chapels, and institutions. The recent discoveries of gold so close to it, and in such large quantities, have added greatly to the importance of this flourishing town.

POPULATION, about 13,000.

STEAM COMMUNICATION.

Steam communication between Sydney and Auckland at least once a month, sometimes more frequently. Fares—Saloon, from 12 guineas.

Average time of transit 8 days.

There is steam communication to the different ports of New Zealand, fares varying according to distance.

The passage from London is performed by Clipper Ships in 90 days. Fares—Saloon Cabin, 50 guineas and upwards; Second Cabin, 30 guineas; Third Cabin (intermediate) £18, enclosed berths; Third Cabin, £16, open berths.

CANTERBURY.

The Province of Canterbury is situated in the centre of the Middle Island, and is bounded on the east and west by the sea, on the south by Otago, and on the north by Nelson. It is level on the east, and rises to elevated mountains on the west, the higher ranges of which are under perpetual snow. The country on the coast is rough, and often sandy for a mile inland, and immediately inside this is a belt of rich alluvial land, varying from 5 to 20 miles in breadth. Two millions of acres are adapted for agriculture, of this about 400,000 acres have been purchased. The settlement was founded in 1850, by chiefly English persons, members of the Church of England. It may be looked upon as the great wool producing and agricultural province of New Zealand. Labour and enterprise have been well remunerated, and there is a promising field for the employment of capital or labour. The climate is neither very hot nor very cold, remarkably healthy, and entirely adapted to the English constitution and habits.

SUPERINTENDENT—His Honour William Sefton Moorehouse.

EXTENT, 15,000,000 square acres.

POPULATION, about 65,000.

CHRISTCHURCH.

This is the capital of Canterbury, on the banks of the Avon, about 9 miles from Lyttelton. Here are the principal Government offices, the Council Chamber, the land and survey offices, the supreme court, immigration barracks, banks, the college, the bishop's residence, &c. There are three newspapers. People are building good houses, the streets are macadamised, and lighted with gas.

POPULATION, about 8,000.

COMMUNICATION.

By Rail with Port Lyttelton, 6 miles distant.
