WEST INDIES.

The islands of the West Indian Archipelago include three principal divisions—the Greater Antilles, the lesser Antilles, and the Bahama Islands. The total area of the Archipelago is probably not less than 90,000 square miles, and the population about 3,000,000. The climate of the whole is strictly tropical, but the influence of the surrounding seas moderates the otherwise intense heats of the torrid zone. The only alternation of seasons known in the West Indies is that from drought to moisture. The climate is generally healthy between the months of November and June, but during the great rains various diseases, and especially fevers, are of frequent prevalence. The vegetable productions are rich and abundant, the staple productions being sugar, rum, molasses, and coffee, besides cocoa, tobacco, cotton, spices, &c.

JAMAICA.

This is one of the Great Antilles, and the principal of the British West India Islands, in the Carribean Sea. It is 150 miles in length, and 40 in average breadth. Earthquakes are frequent, and occasionally hurricanes. The island is well watered. Minerals are numerous and abundant. Ores of iron, copper, lead, zinc, cobalt, and manganese, with limestone, marble gypsum, are found, as also lithographic stone, and traces of coal. The vegetable products are maize, rice, the plantain, banana, cinnamon, fine woods, and artificial grasses, sugar, coffee, arrowroot, &c. Jamaica has three principal ports, Kingston, Montego Bay, and Falmouth. The government is vested in a Governor, a Council and a Legislative Assembly. It is an Episcopal Sec. The seat of government is Kingston.

* These Returns are for British West Indies only.

Most of them are mere coral rocks, but some are of tolerable size. The principal are New Providence, Capital Naassau, and San Salvador. Labour is deficient for the successful culture of cotton. MEDITERRANEAN.

GIBRALTAR.

This is a strongly fortified seaport town and garrison, belonging to Great Britain, near the south extremity of Spain, on a rocky promontory 3 miles in length and three-quarters of a mile in average breadth. The anchorage is not very good, and the bay is much exposed especially to the South West winds, which do great harm to the shipping. Snow and ice are not common, but in winter the cold is very great. The town of Gibraltar is built on the west side, which shelves down to the bay, and consists of three parallel streets, the buildings of which are English and Spanish. It is an Episcopal See; the laws of England prevail, and it is under the control of the Secretary of State for the Colonies. It was made a free port in 1704, and its trade is considerable.

MALTA.

This dependency of Great Britain is situated in the Mediterranean, about 56 miles from Sicily. It possesses one of the finest harbours in the world. The soil is artificial, and only 8 to 10 inches deep. It is cultivated with great care, and yields abundant crops. The fruits, such as Oranges, Olives, Figs, are excellent and abundant. The climate is more like Africa than Europe. Variations are frequent in temperature, the sirocco, which blows in spring and autumn, is very debilitating. Frost and snow are not known. The manufactures are Stone Carving, Cabinet Work, and Jewellery. The government is vested in the Commandant of the Garrison, and a Council of 16 members. It is a valuable possession of Great Britain, as it is on the route to India, and possesses strong fortifications. Its principal town is Valetta.

* J A V A .

Java lies to the S.E. of Sumatra, being separated from it by the Straits of Sunda, on which stands the capital, Batavia. The government is carried on by the Dutch in an oppressive, but very profitable manner. Native labour is monopolised, and, though arbitrarily bought at a low price, its productions are sold at home at high prices by the monopoliser, the Government. Coffee, for instance, sells in Europe at a profit of 200 per cent. on the cost price. Nearly the whole trade is carried on with Holland, though the amount of English imports is increasing. The country is divided into twenty-two districts, administered by Residents, subject to the Governor-General, who enjoys nearly irresponsible power. The whole internal system of regulation is strict; passports are universally required; salt and opium are Government monopolies. Though the climate is fiercely hot, the population is comparatively dense; and, forced as the natives are to diligent labour, they make the naturally fertile land team with rich and varied productions. The scenery is very beautiful; lofty mountains, many of them capped with volcanic peaks, look down on broad forests, interspersed with coffee, rice and indigo plantations.

CUSTOMS' TARIFF.

EXPLANATION OF MONEY AND WEIGHTS USED IN TABLE.

1 Dutch Guilder or Florin = 1s. 8d.
1 „ Pond = 1.09 lbs. Avoirdupois.
Dutch Vat = 22.0097 gallons.

With the exception of the nomenclature the Dutch weights and measures have been assimilated to the French metrical system.

Apothecaries' Weight is same as that of Great Britain.

Importers are recommended to read the Tariff carefully, that they may ascertain correctly the exact rates for their goods. Same considerable latitude, it will be seen, is left to the Custom House officers, and the Governor-General may decide to what rate miscellaneous articles are to be subject. The rates are shown for the years 1866 to 1868, and 1869 to 1872, for the sake of comparison.

QUEEN INSURANCE COMPANY.

QUEEN INSURANCE BUILDINGS, DALE STREET, LIVERPOOL, AND 60, GRACECHURCH STREET, LONDON, E.C.

CHAIRMAN OF THE COMPANY—BERNARD HALL, Esq.
DEPUTY-CHAIRMEN—WILLIAM HIND, Esq., and PATRICK HUNTER, Esq.
LONDON CHAIRMAN—PETER McLAGAN, Esq., M.P.

It has been well remarked, that intending Assurers ought to satisfy themselves thoroughly in regard to a Company's real and available resources, before committing themselves to so serious a thing as a Life Contract with it.

The following facts will enable Policy-holders and the Public to judge for themselves as to the sound and secure position of the Queen Insurance Company; and the Directors feel that in giving the fullest publicity to its affairs, they are taking a course calculated to increase the confidence and support which the Company has already extensively enjoyed.

The Life Accumulation Fund, close of Quinquennium, 31st December, 1868, stood at £110,153

While the Actuarial Investigation, based upon a 8 per cent. net Premium valuation, showed the sum of £83,545 to be sufficient to cover all the Life engagements of the Company; but the Directors, for their further satisfaction and that of the Policy-holders, requested SAMUEL BROWN, Esq., President of the Institute of Actuaries, to examine into and Certify the Investigation that had been made by the Company's own Actuary, who reported that "Assuming the investments are first-class, and have been so selected as to be able always to realise the amount at which they stood on 31st December, 1868, the surplus of £26,609, ascertained to exist in the Life Fund on 31st December, 1868, indicates a state of soundness and prosperity, with every probability of its continuing hereafter."

A record of the Valuations, in detail, is kept at the Chief Office for reference, which may be inspected when desired by any Policy-holder or Shareholder.

To render the present Statement more complete, the Directors add the following information in regard to the Funds and Securities of the Company.

The Authorised Capital is	£2,000,000
The Capital actually Subscribed	1,798,000
The Paid-up Capital	179,800
The Fire Reserve Fund	80,000
The Funds of the Company, after making provision for all Outstanding, Adjusted or Unadjusted Claims and Accounts, at the close of the year, were	885,894

£128,870 of the above sum was invested in the real Property of the Company.

£105,680 Advanced on Landed Securities and Real Estate, subject to from 3 to 6 months' notice.

£45,195 Invested in Securities sanctioned by Acts of Parliament, viz.: In the Bonds of Local Boards and Corporations, of the Mersey Docks and Harbour Board, and of the London and North Western Railway Company.

*£34,306 in United States Government Bonds, Interest and Principal payable in Gold.

*£20,906 in Canadian Government Bonds and Stock.

£7,730 Advanced on the values of the Company's Life Policies.

£3,356 on Personal Security in connection with Life Policies.

£11,259 on Mortgages, &c., or Reversions.

Cash at Bankers, £23,000.

The amount immediately available to meet claims is much beyond what any experience has shown to be necessary.

Finally—

The Books and Accounts are, and always have been subjected to a continuous audit, in detail, by a public auditor appointed by the Shareholders.

SEYSSSEL ASPHALTE COMPANY.

"CLARIDGE'S

PATENT."

FLOORS, ROOFS, AND TERRACES.

COMMITTEES OF PUBLIC WORKS will find the "PYRIMONT" SEYSSSEL ASPHALTE the most useful and economical material for Paving

GARDEN WALKS AND HOUSES,
BATHS AND WASH-HOUSES,
HOSPITAL CORRIDORS & OUT OFFICES,
LAVATORIES,

ABBATOIRS AND MARKETS,
LANDING PIERS,
RAILWAY AND STEAM BOAT STATIONS,
BARRACKS—CAVALRY AND INFANTRY,

and every work where WET WALLS are to be provided against, and FLOORS AND ROOFS executed. Vermin of every description excluded, and the highest sanitary status attained.

Orders must describe the class of work for which the material is wanted, and the superficial area in each class of work, that the shipment may embrace the proper qualities and quantities. Payment in England is required to ensure attention to an order.

NOTICE TO SHIPPERS.

Merchants and others requiring the Shipment of ASPHALTE from London for use ABROAD should instruct their correspondents to obtain it DIRECT from the "PYRIMONT" SEYSSSEL ASPHALTE COMPANY, as many complaints have reached the Company that, when the order expressed only "Asphalte," or "Seyssel Asphalte," bituminous material, unsuited for the purpose, has been received; and, beside much damage done to other portions of the cargo, in consequence of the blocks becoming soft, *even at a moderate temperature*, and forming one mass in the hold of the vessel, all such fictitious and spurious "Asphaltes" are utterly valueless for any description of work, more especially in India and all tropical climates.

ALL BLOCKS of ASPHALTE shipped by this Company are IMPRESSED on TWO opposite SIDES with the words

PYRIMONT
SEYSSSEL.

A LIST OF WORKS to which the genuine PYRIMONT ASPHALTE of SEYSSSEL has been successfully applied, with their respective thicknesses, and also full instructions for its application, can be had at the

Offices: PARLIAMENT ST., LONDON, S.W.

I. FABRELL, Secretary.

HUBBUCK'S PATENT WHITE ZINC PAINT.

By their process, which is patented, the Pure White Zinc Paint is cheaper than White Lead.

For internal and external painting, HUBBUCK'S Zinc Paint is the most durable and beautiful, and does not stain or discolour with the London atmosphere, or in the neighbourhood of Gas and Chemical Works. In all climates it is superior to other Paint for the inside and outside of Houses, Ships, Light-houses, Iron Roofing, and Bridges.

ADULTERATIONS.

Some Paint Grinders have been selling adulterated Zinc Paint. No Workman can produce good work with such material. Those who have had HUBBUCK'S Patent white Zinc Paint will not use any other Paint for their best work.

To prevent the prejudice which the inferior article must produce, each cask of pure White Zinc Paint is stamped—

"HUBBUCK, LONDON PATENT."

Adulterated Zinc Paint, so marked, having been shipped to Foreign Markets, the Patentees offer a reward of FIFTY POUNDS for information which shall lead to the conviction in an English or Colonial Court, of those who have pirated their mark.

Grinders, Exporters, and Retailers are all liable for its sale.

THOMAS HUBBUCK & SON,
WHITE LEAD, OIL, PAINT, AND VARNISH WORKS,
24, LIME STREET, LONDON.

"For public schools, and all rooms occupied by children, there will now be no excuse for using poisonous paints. Parents have remarked that their children, on returning to newly painted houses, have suffered in health. The reason is evident; the breath extracts the poison from White Lead, and the lungs draw in the deadly vapour."

"Among other tests to which it has been subjected, has been that of painting the hold of a sugar vessel, which after a voyage to St. Kitts and back, was found, after washing, to be as white as the first day the paint was applied."—*John Bull*, September 14th, 1860.

HUBBUCK'S ANTI-CORROSIVE PAINTS,

The most valuable protection to Iron Roofs, Bridges, Piers, Ships and Buildings, exposed to stormy weather and scorching sun; they soon become extremely hard, do not blister, and are very durable.

They are made Stone, Slate, Copper, White, Blue, Green, or any other colour that is desired.

HUBBUCK'S ANTI-OXIDATION COMPOSITION,

For Coating Iron and Wood Ships' Bottoms: a preservative against fouling and corrosion. This composition is ready for immediate use, and obviates the waste of carrying unmixed Paints, Oils, Driers, &c. It is also applicable to all the purposes of other Paints.

HUBBUCK'S PALE BOILED OIL

A quick, hard and certain drier, has less colour than Raw Linseed Oil, and is the only Boiled Oil that can be used with White and Light Coloured Paints.

PAINTS AND OILS PROPERLY PACKED FOR EXPORTATION.

Silver Medal Awarded, Paris Exhibition,

DR. J. COLLIS BROWNE'S CHLORODYNE,

THE ORIGINAL AND ONLY GENUINE.

ADVICE TO INVALIDS.—If you wish to obtain quiet refreshing sleep, free from headache, relief from pain and anguish, to calm and assuage the weary aching of protracted disease, invigorate the nervous media, and regulate the circulating systems of the body, you will provide yourself with that marvellous remedy discovered by Dr. J. COLLIS BROWNE (late Army Medical Staff), to which he gave the name of

CHLORODYNE,

and which is admitted by the Profession to be the most wonderful and valuable remedy ever discovered.

CHLORODYNE is the best remedy known for Coughs, Consumption, Bronchitis, Asthma, Neuralgia.

CHLORODYNE acts like a charm in Diarrhœa, and is the only specific in Cholera and Dysentery.

CHLORODYNE effectually cuts short all attacks of Epilepsy, Hysteria, Palpitation and Spasms.

•• Earl RUSSELL communicated to the College of Physicians that he had received a despatch from Her Majesty's Consul at Manilla, to the effect that Cholera has been raging fearfully, and that the **ONLY** remedy of any service was **CHLORODYNE**.—See *Lancet*, Dec. 31, 1864.

"Lord FRANCIS CONYNHAM, Mount Charles, Donegal, who this time last year bought some of Dr. J. COLLIS BROWNE'S **CHLORODYNE** from Mr. DAVENPORT, and has found it a most wonderful Medicine, will be glad to have half-a-dozen bottles sent at once to the above address."

CAUTION.—Vice-Chancellor Sir W. PAGE WOOD stated that Dr. J. COLLIS BROWNE was undoubtedly the Inventor of **CHLORODYNE**; that the story of the Defendant FREEMAN, was deliberately untrue, which he regretted to say, had been sworn to.—See *Times*, 13th July, 1864.

Sold in Bottles at 1s. 1½d., 2s. 9d., 4s. 6d., and 11s. each. None is genuine without the words "Dr. J. COLLIS BROWNE'S **CHLORODYNE**" on the Government Stamp. Overwhelming Medical Testimony accompanies each bottle.
