

THE CITY OF TUTTLE

COMMUNITY DEVELOPMENT

WATER WELL PERMIT APPLICATION

82 OS 1020.21 of the Oklahoma Statutes allows communities to adopt rules and regulations regarding the use and operation of private water wells. Sections 4-26 and 16-14 of the Tuttle Code of Ordinances establishes the rules and regulations for private water wells within Tuttle. A water well permit is required any time a new water well is drilled. Rehabilitation of existing wells does not require a permit.

Any water well that is not used solely for domestic use is required to first receive a permit from the Oklahoma Water Resources Board (OWRB). 82 OS 1020.1 of the Oklahoma Statutes defines "Domestic Use" as use for household purposes, for farm and domestic animals up to the normal grazing capacity of the land and for the irrigation of land not exceeding a total of three (3) acres in area for the growing of gardens, orchards and lawns, and for such other purposes.

OWRB and the Oklahoma Department of Environmental Quality (ODEQ) have rules requiring all water wells to be located certain distances away from certain points of possible contamination, including creeks, septic tanks, and sewer lines. For this reason, we also need a diagram of the property showing the items listed on the next page.

If you are drilling more than one well on your property, please fill out an application for each well.

The fee for wells drilled on properties served by a public water system is \$325. The fee for wells drilled on properties not served by a public water system is \$55.

Water Well Diagram

A diagram showing the following must be attached to this application:

- layout of the property
- location of buildings and driveways
- location of ponds, creeks, and other water features
- location of floodplains
- location of easements
- location of sewer lines and/or septic tanks
- current and proposed public water lines
- current and proposed private water lines
- location of the proposed water well and existing or abandoned water wells
- location of current and abandoned oil/gas wells

Based on the size of your property and where the well is proposed to be drilled, it may also be necessary to include information for the surrounding properties on this diagram.
