

# **Town of Caton Highway Dept. Monthly Report**

## **January 2015**

The Highway Department has been busy despite the vacation and other "time – off" requests Cutting up Trees, checking and clearing ditches of limbs and trees. From high winds. Crusher run gravel is continually being added where necessary. All of the guys have been Plowing, Salting and Sanding. There has been some shop clean-up and general maintenance.

Highway Dept.

## Town of Caton Monthly Report February 2015

The Highway department has been plowing, sanding and salting roads pretty much of the time this month. We have been picking up tree limbs and branches also. We have several frozen pipes in the area that we will be attending too as soon as we get a break in the weather. Attached you will find two estimates attached, these are for the four dump trucks that were never ordered with the trucks. Review them and E-Mail me with your decision. Also note! At this time we are on back order for salt.

# Town of Caton Monthly Report

## March 2015

The Highway Department has been dealing with extreme weather conditions this month. We have been plowing, sanding and salting pretty much this month. We also rented a steam jenny and thawed out pipes on Mathews road, Martin Hill and Hurd Cross roads. Between the weather and some minor break downs the crew has been staying busy. It is my understanding that some complaints are being made at the board meetings about roads? If there is some issues that need to be addressed, please see the town clerk for the complaint forms that I had given her last year, fill one out, I will look over it and contact you. If that is not good enough please contact the Highway Department At 607-524-6757 or stop by at 1180 Riff road. It seems to me that the same old issue is brought up every month? But nobody takes the proper steps. If you have an actual complaint please contact me. I am not or do I intend to be a mind reader

# Town of Caton Monthly Report

## April 2015

The Highway Department has been de-icing culvert pipes around town. They have begun filling in potholes on various roads in town. We have installed one new crossover pipe on Thurber Road. We also have been performing maintenance on equipment when needed. They have also been hauling crusher run from T.M.T to stock pile at our pit. For your information the tarps for the dump trucks has almost been completed, they have on truck left to do.

# Town of Caton Monthly Report

## May 2015

Despite of all the sick time and vacation time that is being used the Highway Department has managed to install some more pipes. We have begun mowing on Browntown Rd. We have started grading on the East side of town. And been hauling material on bad days. Our 1987 GMC water truck would not pass inspection because of a crack in the driver side windshield, we have been trying to locate a new or used window for this, but because it is a two piece windshield the manufacture said that it is obsolete now. I have called several junk yards and have two of our outside service departments looking for one. The water truck will not be in-service until this problem is resolved.

# Town of Caton Monthly Report

## June 2015

The Highway Department has been grading roads, and it will continue until we have completed all dirt roads. Dust control oil will only be applied when the roads are graded and the supplier can get to us, I have no control on when the supplier can do this. I call them and let them know when we are ready for dust oil, and when they have a truck available they call me and let me know which day. The 1987 GMC water truck is now back in service. I have contacted John Balch about some electrical issues we have at the Highway Department, he is going to repair these problems, you all have been informed of the issues.

## Monthly Report July 2015

The Highway Department is a little behind on the grading schedule due to the rain and wetness of the roads. There are numerous old culvert pipes all over town that are starting to blow apart, which we will be installing new ones. The road side mowing is at a standstill because our John Deere 2955 mowing tractor has a bad hydraulic slave cylinder, for it to be repaired the tractor has to be split in half. We do not have time to do this at this time. We are going to get some outside pricing to see what the cost would be to have it repaired, and we may be renting a mower to mow road sides until it is repaired.

## Monthly Report August 2015

The highway Department has been keeping up with basic maintenance. We are almost finished with grading, the road sides have been mowed and some brush removal has been done. Truck #2 and truck #5 are needing new lift cylinders for the dump box, the old ones are beyond rebuilding, we have ordered two new ones for these units. Next week we will start to work on Sloan Road. Dust oil on the dirt roads is still being done.

## September 2015 Monthly Report

The Highway Department has been working on Caton Crest, they have also been trying to finish up the dust oil when there is a truck available from Suite Cote. They have been filling pot holes as needed. The 1989 Auto Car dump truck will be going to the Steuben County auction in October, this unit is getting to the age were the up keep and maintenance is costly. I will be putting a specs sheet together for bids on a new dump (plow truck) with a plow and benching wing. Dana's truck #2 will then be moved to our back up truck.

## Monthly Report October 2015

The highway department has been hauling material from the Hawbaker Pit to the job site. They have also been repairing pot holes threw out the town as needed. We have been having many issues with broken springs on our dump trucks, they have also been repairing oil leaks on these units. It has come to my attention that the town board wants to keep and repair the 1989 Auto Car dump truck Per Kate Hughes for our back up truck. For your information, this unit will be taking to Beam Mack for a estimate to see what the cost will be to put this unit back in service by the federal transportation requirements for everyone's safety. They have also have been hauling sand.
