

9-1-1 ADDRESS SIGN

It has come to the attention of the Caton Volunteer Fire Department that there are several residences in the Town of Caton that do not have their assigned 9-1-1 numbers posted on their homes or structures or mailboxes. Posting these numbers is very important, as it may make a difference in saving your life or life of a loved one. Said 9-1-1 numbers displayed on a structure need to be in reflective material and must be no less than four inches in height. Mailbox and mailbox post 9-1-1 numbers also need to be reflective and no less than three inches in height. You can order a custom made, 100% reflective sign completely ready with numbers at a cost of \$15 each in a green or blue color through the Caton Fire Department. Order forms are at the Clerk's Office in the Caton Town Hall. Also note that there is a Local Law that was adopted in July of 2000 by the Caton Town Board requiring home owners to post assigned 9-1-1 structure numbers and is enforceable by any police officer or local constable or local code enforcement officer. **Please remember that if an emergency service of any kind cannot find you they also cannot help you.**
