

MacArthur Blvd. Loop

- 0.0 Begin at Iwo Jima, go through Rosslyn, and across the Key Bridge.
- 1.0 Take a sharp right after bridge down to the river side of C&O Canal, down steps to K St. and trailhead of Capital Crescent Trail
- 6.4 Follow Capital Crescent Trail until Massachusetts Avenue. The turnoff is just before mile marker 5.0 and about a mile past the tunnel. Turn right to head up Mass. Ave. toward the D.C. line.
- 7.2 At the top of the hill, you will be at Westmoreland Circle. Go halfway around the circle and continue on Mass. Ave.
- 7.6 Continue on Mass. but make a quick right onto 49th St. It is the third right you can possibly make after the circle (and is after 50th St.!).
- 7.8 From 49th St., make the fourth right onto Tilden St. Continue on Tilden St.--it curves around after Fordham Rd.--until it ends at an intersection with Rockwood Parkway.
- 8.3 Make a left onto Rockwood Parkway and take that up the hill
- 8.9 Make a right onto Indian Lane and you will soon come to a big intersection. This is Nebraska Avenue.
- 9.0 Cross Nebraska Avenue and bear right down Chain Bridge Road. It is a narrow, shady road with a very steep downhill slope.
- 9.8 Turn left on MacArthur Blvd, at the base of the Battery Kemble Loop. Take MacArthur back toward Georgetown.
- 10.5 Take care to remain on MacArthur Blvd near the Dalecarlia Reservoir (do not take Reservoir Rd). If you are near the fence next to the water, you are in the right place.
- 11.4 When MacArthur Blvd ends at Foxhall Rd in Georgetown, turn right on Foxhall, after crossing to the far side of the road (left side). Stay on the left as Foxhall Rd. turns into Canal Road and then M St.
- 12.0 Use the crosswalk at 35th St. to cross M St. and go over the Key Bridge on the right side. After crossing, go to Lee Hwy, turn left (briefly on the Custis Trail), then right on Lynn St.
- 13.1 Follow Lynn St. through Rosslyn and back to Iwo Jima.
