

# CONTRACTOR PARKING PERMIT

## APPLICATION

### CONTRACTOR

#### Downtown Parking Permit

The purpose of Contractor Procedures is to provide guidance for contractors working in the downtown area. It is recognized that contractors need to be able to operate and work in the building during renovating with ease of access to contractor's vehicles. It is also recognized that the downtown businesses need access to their businesses for their customers and/or clients.

### PROCEDURE

1. At any one time a contractor may have a **maximum of two (2) work vehicles parked on-street** in front of, to the side of or in the rear of the building where work is ongoing. The vehicle must contain tools and equipment used for the job such as plumbing, heating and air, and electrical.
2. Other persons working at the site are encouraged to park at the site only long enough to load or unload their tools or equipment needed for the day. The vehicle must then be relocated to all-day-parking arranged by the Contractor and/or Parking Officer. Carpooling of employees is encouraged. Vehicles not complying with this provision are subject to the 2 hour parking ordinance and will be ticketed.
3. Contractors and their employees may not block crosswalks at any time. They may not park in areas that are not properly marked as "parking spaces." Including, but not limited to yellow curbs.
4. Contractors are requested to inform all workers at their site of these policies.
5. Permit must be displayed in the vehicle at all times.

The Parking Enforcement Officer is the point of contact and is available to coordinate activities regarding contractors, material deliveries, and employee parking. Phone 706-236-4458 for assistance or
