Deceuninck North America Decking Customer, Builder's First Source, Adds Clubhouse Railing to Product Offering

Partnership Expands Availability of Deceuninck's Decking Products in the Southeast

[Deceuninck North America](#), a leading designer and manufacturer of high-quality systems for windows, doors and outdoor living, is pleased to announce that decking customer Builder's First Source (BFS) has expanded its product offering to include Clubhouse Railing. The Dallas-based supplier of structural building materials and services to homebuilders is now offering both Deceuninck's Clubhouse Decking and Clubhouse Railing to its customers in the Southeast.

"As a customer of ours for several years, we are pleased that Builder's First Source has expanded their product offering to include railing," said Filip Geeraert, president and CEO of Deceuninck North America. "With Builder's First Source focusing primarily on the professional builder, our partnership will enable Deceuninck products to be even more readily incorporated into residential and multifamily projects."

"Deceuninck North America's high-quality vinyl rail system, coupled with quick and efficient service, will enable us to gain market share as we work to further expand the BFS business throughout the Southeast," said David Conner, partner, Gemroi Company.

Deceuninck's Clubhouse Elite Railing System is engineered to be longer-lasting than painted wood and is backed by a limited lifetime warranty with 25-year fade and stain coverage. It is 100-percent recyclable and the low-maintenance nature of the product means no chemical cleaning, painting or staining is necessary. Available in white, walnut, and black, Elite Railing's low-gloss, low-maintenance finish means that the product never needs to be painted. For extra protection, Deceuninck North America's exclusive SunShield® technology provides time-tested color retention with superior stain, mold and mildew resistance.

Clubhouse Plus Railing System with SunShield® Technology features a limited lifetime warranty with 25-year fade and stain coverage. It is 100-percent recyclable and water-resistant, which means no chemical cleaning, painting or staining, and is available in white, clay and sandstone.

Clubhouse Decking and Railing has achieved code compliance with the International Building Code (IBC) and International Residential Code (IRC) for structural and product performance.
