Deceuninck North America Recognized by *DWM Magazine* with 2014 Green Award

Company's Rovex Technology among Innovations Featured in November Issue

[Deceuninck North America](#), a leading designer and manufacturer of high-quality systems for windows, doors and outdoor living, was selected as 2014 Green Award winner by *DWM Magazine*. Recognized for a prototype balcony door co-developed with Inoutic, a member of the Deceuninck Group NV, the window frame was pultruded by Deceuninck North America using its Rovex technology and polyurethane raw materials from Bayer MaterialScience LLC. Featured in the publication's November issue, the award highlights Deceuninck North America for this innovation, emphasizing the strength and thermal efficiency of Rovex that can be difficult to achieve with current material technologies.

"We are honored to be recognized by a leading industry publication with this award. The excellent thermal properties that can be achieved by using our Rovex polyurethane-glass composite technology can translate into energy savings for our customers," says Filip Geeraert, president and CEO of Deceuninck North America. "At the same time, the strength of the Rovex material is close to that of aluminum which creates opportunities for energy efficient and high performing window designs."

Developed by Deceuninck North America, Rovex is an advanced fiber glass reinforced resin designed to serve as a high-performance alternative to conventional materials like concrete and metal. Strong yet lightweight, Rovex products are non-corrosive, non-conductive and offer superior structural, thermal and environmental performance.

DWM Magazine's Green Award categories included projects, products and overall companies which embody green principles. Suppliers, dealers, distributors and door and window manufacturers were invited to submit entries.

The Deceuninck logo consists of the word "deceuninck" in a white, lowercase, sans-serif font, centered within a solid blue rectangular background.

About Deceuninck

Deceuninck North America, LLC is part of the Deceuninck Group, an integrated global organization specializing in compounding, tool fabrication, design, development, extrusion, finishing of uPVC window systems and composite applications for the building industry. The company is active in more than 75 countries, and is supported by 2,700 personnel worldwide. In 2013, Deceuninck Group achieved consolidated sales of €536.5 million Euros worldwide (approximately \$710 million USD). In 2014, Deceuninck strengthened its top 3 market position through the acquisitions of 'Pimapen,' the most recognized brand for PVC windows in Turkey adding approximately \$75 million of annual sales. (Turkey is Europe's 2nd largest PVC window market.) Deceuninck North America encompasses fully-integrated design, compounding, tooling, extrusion and quality assurance disciplines for the production of vinyl window and door systems and composite applications for the building industry at its corporate headquarters in Monroe, Ohio.
