Deceuninck North America Expands West, Innovates for Continued Growth

A Dynamic 2015 Featured Ground-Breaking for Facility near Reno, Nev., Unveiling of Innovative Products, Recognition of Sustainability Efforts

As Deceuninck North America looks toward continued growth in 2016, the past year featured several milestones for the company, a leading designer and manufacturer of high-quality systems for windows, doors and outdoor living. Deceuninck North America continued its strong performance, with double-digit sales growth at the end of the third quarter, double the market growth. Full-year 2015 financials will be reported in the first quarter of 2016.

“Our performance in 2015 was made possible by our strong customer relationships and our company-wide focus on innovating market-leading products,” said Filip Geeraert, president and CEO of Deceuninck North America.

Following is a brief recap of Deceuninck North America’s key 2015 milestones.

Going West

With growth patterns indicating that its Monroe, Ohio, facility will be full by the end of 2016, Deceuninck North America broke ground in the fenestration industry with a new facility to serve its customers across the western United States. The company is building a 150,000 square-foot facility near Reno, Nev., that can accommodate up to 24 extrusion lines. The facility, which sits on a 28-acre site, will accommodate extrusion, manufacturing support, offices and a warehouse. The new plant reinforces Deceuninck’s commitment to existing customers in the west and also meets market need for window systems, profiles and tools designed for the western market and climate.

Innovating

Deceuninck demonstrated its innovative spirit through market-leading services and products.

- Deceuninck unveiled new products in 2015.
 - The **eos™ Patio Door** was designed to be easy to manufacture and is highly energy efficient and contains Deceuninck’s Innergy Rigid Thermal Reinforcements, advanced fiberglass reinforced resin inserts.
 - The **650.650: Multitrack Sliding Door System** has a flexible design, two track base and flexibility.
 - The **0.27** is a residential window that applies world-class engineering and advanced material science to create a new standard for performance.

- Deceuninck expanded its **polymer compounding solutions**. The company offers compounding, additives, consulting and design services. Deceuninck’s precision polymer compounding goes beyond blending to proprietary additive chemistry, patented processes, advanced engineering and complete solutions that create real market advantage.

The Deceuninck logo consists of the word "deceuninck" in a white, lowercase, sans-serif font, centered within a solid blue rectangular background.

- A new support program, **Deceuninck Commercial**, is an integrated fabricator member program comprised of technical, engineering, marketing and sales support. The program helps fabricators take advantage of commercial opportunities using Deceuninck's line of products, which can be customized to uniquely enhance any commercial building project with minimal maintenance. The program offers three levels of support – Commercial PRO, Commercial ALLIANCE and Commercial PLUS – providing the right solution for every fabricator.

Award-winning Sustainability

Deceuninck also received industry recognition for its sustainability efforts. **GreenCircle Certified, LLC**, a third-party analyst that provides independent evaluations of sustainable products and operations, recertified Deceuninck for "Recycled Content" and "Closed Loop Products" for the fourth year. Deceuninck North America is the only window lineal provider certified by GreenCircle.

"In 2016 we will continue leveraging our innovation and investments to foster growth," Geeraert said.
