**Deck Expo 2011 to Feature Two of Deceuninck North America's
Building Product Solutions in Exhibition's Product Showcase**
– Company to Join Industry Partner as a Co-Exhibitor at the Show from October 13-15 –

Monroe, Ohio, October 10, 2011 – [Deceuninck North America](#), a leading designer and manufacturer of high-quality systems for windows, doors, interiors and outdoor living, has been selected to contribute two building product solutions to the Product Showcase at Remodeling Show and Deck Expo 2011 (October 13-15 in Chicago), a trade event focusing exclusively on remodeling products including the deck, dock, porch and railing industry. Occupying a dedicated space at the exhibition, the Product Showcase enables attendees to review the industry's latest offerings and innovations. Deceuninck's Solstice® PVC Decking and Kodiak® Elite Railing Systems will be among the innovations featured.

“At Deceuninck, innovation is one of our key drivers, and both Solstice Decking and Kodiak Railing Systems demonstrate our commitment to serving as a change agent in the building products industry,” said Filip Geeraert, president and CEO of Deceuninck North America. “Our focus on material science has enabled us to design and manufacture products that offer unsurpassed durability while enabling contractors and homeowners to put their own signature on outdoor spaces.”

Deceuninck's **Solstice PVC Decking** offers the “best performance under the sun” and comes with a Limited Lifetime Warranty and a 25-year fade and stain warranty. Solstice decking features a dual color, dual embossed board that allows for design flexibility. The interior of the cellular PVC decking features Deceuninck's Korelite™ technology. The exclusive extrusion process creates a dense cell structure that minimizes imperfections, voids and water absorption while offering superior strength. In addition, SunShield® technology gives Solstice superior color retention while reducing heat build-up.

Engineered to stand up to harsh environments, **Kodiak Elite Railing Systems** offer superior weathering characteristics that provide years of natural beauty without the worry of refinishing. Kodiak resists water, mold and insect damage, never requires painting or staining, and will not rot, rust, crack, warp, pit, corrode, peel or blister. Advanced processes and smart technology craft a product that is seamless, versatile and durable with unsurpassed aesthetics. The innovative design provides for easier installation. The composite construction creates higher strength, and the railing system features a SunShield® cap for superior weather resistance and color retention. Kodiak Elite Railing Systems comes with a Limited Lifetime Warranty as well.

“Both of these products are also sustainable alternatives to traditional decking and railings, because offering sustainable products is one of our other key business drivers,” Geeraert added. “Both Solstice and Kodiak are 100-percent recyclable, and the water-resistant nature of the products makes chemical cleaning, refinishing or staining unnecessary.”

Launched in 2003, DeckExpo is an annual event that attracts deck builders, product dealers and builders who want to see the latest technologies and newest products geared specifically to the special building requirements of decks, railings, docks, porches and stairs.
