Deceuninck North America Partners with FastenMaster to Provide Line of Hidden Fasteners for its Clubhouse PVC Decking

Clubhouse ConnectClip and Cortex Plug Products Deliver Enhanced Performance, Durability and Aesthetic Appeal

[Deceuninck North America](#), a leading designer and manufacturer of high-quality systems for windows, doors, and outdoor living, is pleased to announce its recent partnership with FastenMaster®, the creator of a unique line of hidden deck screws for a variety of structural fastener applications. Builders and contractors installing Deceuninck's Clubhouse™ PVC Decking can utilize FastenMaster's TC-G Clip and Cortex Plugs, which are labeled privately as Clubhouse ConnectClip and Clubhouse Cortex Plug products. The clips and plugs offer enhanced quality, aesthetic appeal and ease of installation, enabling the installer to fasten up to 400 square feet of Clubhouse Decking in one hour. Made of stainless steel, the clips are coated with material similar to what is used in the automotive industry and come with a 25-year corrosion warranty. Cortex enables the installation of a completely hidden deck project. Ideal for stairs, first boards, last boards and board replacements, Cortex comes in a 100-lineal-foot package and is available in eight colors.

"At Deceuninck North America, we are pleased to be working with FastenMaster, whose products offer one of the fastest installation methods of grooved decking materials on the market," said Filip Geeraert, president and CEO of Deceuninck North America. "By utilizing ConnectClip and Cortex, contractors and builders will be able to work even more efficiently, saving them time and money. The aesthetic appeal of the fastener system also greatly enhances the appearance of Clubhouse Decking, increasing the deck's durability and delivering even greater quality."

Clubhouse Decking is 100-percent PVC and contains no wood or wood fillers. It is formulated to be up to 25-percent lighter than most wood and composites while offering superior strength and a solid underfoot feel with Deceuninck's Korelite™ technology. Korelite also helps to keep moisture out and reduces the opportunity for degradation from mold, mildew, freezing and thawing. Clubhouse Decking is also 100-percent recyclable and colors and wood grains do not require painting or staining. Clubhouse Decking features a limited lifetime warranty with 25-year fade and stain protection backed by Deceuninck.
