Deceuninck North America Partners with FP Supply Indianapolis to Offer Clubhouse® PVC Decking and Elite Railing to its Customers

[Deceuninck North America](#), a leading designer and manufacturer of high-quality systems for windows, doors and outdoor living, is pleased to announce its partnership with FP Supply Indianapolis, a division of Forest Products Supply, a leading wholesale distributor of lumber and building materials in the Midwest. Deceuninck will work with FP Supply Indianapolis to offer Clubhouse® PVC Decking and Clubhouse Elite Railing to its customers in the Indianapolis, Ind. and surrounding market areas.

“As a large two-step distributor, FP Supply Indianapolis has a deep history in servicing premium building products. We are pleased to partner with them to enable more builders, contractors and homeowners to specify and order Clubhouse Decking and Railing products throughout the Midwest,” said Filip Geeraert, president and CEO of Deceuninck North America. “Clubhouse’s performance separates it from me-too products, enhancing the value proposition for those seeking to take their outdoor living space to the next level.”

“Deceuninck North America has an excellent PVC decking product in its Clubhouse Deck & Rail products, and we are excited about the opportunity to represent the product line. Clubhouse has engineered a two-sided deck board with a different color available on each side. This limits the number of SKU’s that our dealers will need to stock by offering the customer greater options to accent their deck in coordinating colors,” said Dave Worthington, general manager of FP Supply Indianapolis. “Another advantage of using Clubhouse is that we are supporting a manufacturer that is only 90 miles from Indianapolis, giving our customers access to their complete product line.”

Deceuninck North America’s Clubhouse Decking is 100-percent PVC and contains no wood or wood fillers. It is formulated to be up to 25 percent lighter than most wood and composites, and its dense cell structure offers superior strength and solid underfoot feel with Deceuninck’s Korelite™ technology. Korelite also helps to keep moisture out and helps reduce the opportunity for degradation from mold, mildew, freezing and thawing. SunShield® technology helps protect Clubhouse from the harsh effects of the sun, including UV resistance and fade protection, resistance to cracking and brittleness, and surface degradation.

Clubhouse Decking does not require painting or staining. It features a limited lifetime warranty with 25-year fade and stain protection backed by Deceuninck.

Deceuninck's Clubhouse Elite Railing System is engineered to be longer-lasting than painted wood and is backed by a limited lifetime warranty with 25-year fade and stain coverage. It is 100 percent recyclable and the low-maintenance nature of the product means no chemical cleaning, painting or staining is necessary. Available in white, walnut and black, Clubhouse Elite Railing's low-gloss, low-maintenance finish means that the product never needs to be painted. For extra protection, Deceuninck North America's exclusive SunShield® technology provides time-tested color retention with superior stain, mold and mildew resistance.

Clubhouse Deck & Rail has achieved code compliance with the International Building Code (IBC) and International Residential Code (IRC) for structural and product performance.
