## **Deceuninck's Custom Compounding Highlights Company's Leadership Position in Material Science**

***Manufacturing Customers Rely on Company for Customized Solutions***

[Deceuninck North America](#), a leading designer and manufacturer of high-quality systems for windows, doors, and outdoor living, is underscoring its leadership position in material science by offering its PVC material development and compounding capabilities for custom manufacturing applications to a wide variety of industry sectors.

Based on industry-leading and proprietary PVC material technologies for extrusion, injection molding and blow molding applications, Deceuninck customizes the design of compounded materials to meet each customer's exacting requirements for processing, heat stability, weatherability and color consistency.

"At Deceuninck North America, we are known for producing the highest-quality doors and windows, but our expertise does not end there," said Filip Geeraert, president and CEO. "We utilize our industry leading material science and material compounding equipment designed for pharmaceutical-grade blending for consistent quality so that we exceed our customers' needs. Additionally, some of our chemistries are made from renewable resources, which also makes this effort green."

Compounding product is available to ship in various forms (gaylords, super sacks and bulk truck loads) to meet individual customer needs.
