Press ReleaseSeptember 10, 2015

Deceuninck North America to Launch New Window and Door Innovations at GlassBuild America

Company Will Also Host Customer Appreciation and Industry Networking Event near Convention in Atlanta

[Deceuninck North America](#) is excited to announce it will unveil a suite of new products and services at this year's GlassBuild America.

"Part of our core purpose as a company is to build sustainable structures because we believe in the power of innovation, design and sustainability," said Filip Geeraert, president and CEO of Deceuninck North America. "These new products and services were developed with that purpose in mind, and what better place to introduce them to the world than at GlassBuild, the industry's most important gathering of innovators."

The company will introduce four new initiatives—the .eos™ Patio Door, ICON 8650: Multitrack Sliding Door System, .27 Window and Deceuninck Commercial—at booth #1703 at the event, which takes place **September 16-18** at the Georgia World Congress Center in Atlanta.

- **eos Patio Door:** Designed to complement Deceuninck's eos window system, the patio door has been designed to be easy to manufacture and highly energy efficient, meeting the criteria for ENERGY STAR® 6.0. The patio door also contains Deceuninck's Innergy Rigid Thermal Reinforcements, advanced fiberglass reinforced resin inserts designed to slide easily into window and door frame chambers for greater support and insulation. The eos doors are available in a range of solid or laminated colors and styles, including a two-panel sliding patio door and a direct set offered in two, three or four lite configurations.
- **ICON 8650: Multitrack Sliding Door System:** A multitrack sliding door system with flexible design, two track base and flexibility to add additional single tracks as required. ICON Windows & Doors are a collection of proven Deceuninck systems classified based on performance ratings. For complete design flexibility, the ICON 8650 features a two-track base and the ability to add additional single tracks as required. Perfect for indoor/outdoor spaces, the panels stack neatly to create an ultra-wide opening with clean sight lines.
- **.27 Window:** This residential window applies world-class engineering and advanced material science to create a new standard for performance, providing an economical way to get a U-factor of 0.27 – which is required to meet Energy Star 6.0 in the Northern zone. The .27 Window is designed for Residential DP50 rating and is available in multiple styles, including single hung, double hung, single slider, double slider and picture window.

- Deceuninck Commercial:** An integrated fabricator member program comprised of technical, engineering, marketing and sales support that helps fabricators take advantage of commercial opportunities using Deceuninck's line of products, which can be customized to uniquely enhance any commercial building project with minimal maintenance. The program offers three levels of support—Commercial PRO, Commercial ALLIANCE and Commercial PLUS—providing the right solution for every fabricator.

Deceuninck North America will also host an Emerging Markets area of its booth, sharing Deceuninck innovations from around the world and also featuring the windows and doors from the Zendow series from Deceuninck Turkey. Representatives from 13 countries will be in attendance, including Argentina, Australia, Brazil, Chile, Columbia, Ecuador, Honduras, Mauritius, Mexico, Peru, Thailand, Turkey and Qatar.

"Deceuninck is truly committed to our sustainable footprint, not only in North America but all over the world," said Moez Mohamediali, business development manager, Deceuninck Emerging Markets. "As we watch these international markets grow, it's fascinating to watch Deceuninck grow and evolve with them to suit their unique needs."

On **Thursday, September 17**, Deceuninck invites its guests to "Blues in the Night—A Deceuninck Brand Experience" with a hospitality event at Ventanas Rooftop (275 Baker Street) in Atlanta. At the event, guests are invited for an evening of cocktails, hors d'oeuvres and an opportunity to learn more about Deceuninck.

Now in its 13th year, GlassBuild America is the gathering place for the glass, window and door industries in North America. Organized by the National Glass Association, GlassBuild America showcases glass processing equipment, window and door manufacturing equipment, and the latest technologies for all types of glass and fenestration products in North America.

EDITORS/REPORTERS: Filip Geeraert, president and CEO of Deceuninck North America, will be available for interviews during GlassBuild at Deceuninck's booth. Attending media are also invited to attend Deceuninck's hospitality event at Ventanas on September 17. To schedule an interview with Filip at the booth and/or to RSVP for the hospitality event, please contact Elizabeth Bacheson at 412.642.7700 or elizabeth.bacheson@elias-savion.com.

End of Press Release

About Deceuninck

Deceuninck North America, LLC is part of the Deceuninck Group, an integrated global organization specializing in compounding, tool fabrication, design, development, extrusion, finishing of uPVC window systems and composite applications for the building industry. Deceuninck employs 3,400 people in 25 countries. Deceuninck has production facilities in Belgium, Chile, Czech Republic, France, Germany, Poland, Russia, Thailand, Turkey, UK and US. Deceuninck sales in 2014 were €552.8 million (with a net positive result of €10.5 million), approximately \$608.08 million USD. In 2014, Deceuninck strengthened its top 3 market position through the acquisition of 'Pimapen,' the most recognized brand for PVC windows in Turkey adding approximately \$75 million of annual sales. Deceuninck North America encompasses fully-integrated design, compounding, tooling, extrusion and quality assurance disciplines for the production of vinyl window and door systems and decking/railing applications for the building industry at its corporate headquarters in Monroe, Ohio.
