# Deceuninck North America Partners with Hood Distribution/McQuesten Group to Offer Clubhouse® PVC Decking and Clubhouse Elite Railing to the New England Market

## *Partnership Expands Availability of Clubhouse Decking and Railing*

[Deceuninck North America](#), a leading designer and manufacturer of high-quality systems for windows, doors, and outdoor living, is pleased to announce its partnership with Hood Distribution/McQuesten Group, a distributor of quality hardwoods and specialty softwood products, to offer Clubhouse® PVC Decking and Clubhouse Elite Railing to its customers.

“At Deceuninck, we are pleased to partner with Hood Distribution to enable more builders, contractors and home owners to specify and order Clubhouse Decking and Railing products throughout New England,” said Filip Geeraert, president and CEO of Deceuninck North America. “It is an attractive, durable option that offers value for those seeking to take their outdoor living space to the next level.”

“We selected Clubhouse Decking and Elite Railing because it provides users with measureable performance advantages, and is not just a me-too product,” said Bob Lattanzi, branch manager, Ayer/Manchester at Hood Distribution.

Deceuninck North America’s Clubhouse Decking is 100-percent PVC and contains no wood or wood fillers. It is formulated to be up to 25-percent lighter than most wood and composites, and its dense cell structure offers superior strength and solid underfoot feel with Deceuninck’s Korelite™ technology. Korelite also helps to keep moisture out and helps reduce the opportunity for degradation from mold, mildew, freezing and thawing. SunShield® technology helps protect Clubhouse from the harsh effects of the sun, including UV resistance and fade protection, resistance to cracking and brittleness, and surface degradation. Clubhouse Decking is also 100-percent recyclable and does not require painting or staining. It features a limited lifetime warranty with 25-year fade and stain protection backed by Deceuninck.

Deceuninck's Clubhouse Elite Railing System is engineered to be longer-lasting than painted wood and is backed by a limited lifetime warranty with 25-year fade and stain coverage. It is 100-percent recyclable and the low-maintenance nature of the product means no chemical cleaning, painting or staining is necessary. Available in white, walnut, and black, Elite Railing's low-gloss, low-maintenance finish means that the product never needs to be painted. For extra protection, Deceuninck North America's exclusive SunShield® technology provides time-tested color retention with superior stain, mold and mildew resistance.

Late last year, Clubhouse Decking and Railing achieved code compliance with the International Building Code (IBC) and International Residential Code (IRC) for structural and product performance.
