Deceuninck North America to Introduce New Deck Lighting, Baluster and Curved Rail Products at JLC LIVE Northwest

Company to Highlight Partnership with Clubhouse Distributor Vandermeer Forest Products

[Deceuninck North America](#), a leading designer and manufacturer of high-quality systems for windows, doors and outdoor living, will highlight its new deck lighting, baluster and curved rail options for Clubhouse® Decking and Railing at JLC LIVE Northwest 2014. The show will take place December 4-5 at the Oregon Convention Center in Portland, OR.

Deceuninck's booth (#1020) features the work of Dr. Decks. The Tacoma, Wash.-based deck builder constructed the booth to showcase these innovative new products available through Deceuninck's regional distribution partner, Vandermeer Forest Products. Vandermeer offers Clubhouse Decking and Railing products to customers across the Pacific Northwest.

Deceuninck is also serving as a sponsor for the Deck Building Workshop, one of the JLC LIVE BUILDING CLINICS, which are live, interactive demonstrations presented by top industry experts. Throughout the show, the Deck Building Workshop will feature Clubhouse Decking in its decking product demonstration.

"Our Clubhouse Decking and Railing products offer a single source for innovative decking and railing solutions, and we are pleased to serve as an exhibitor at this important show in an area in which we continue to expand our footprint," said Filip Geeraert, president and CEO of Deceuninck North America. "We are also pleased to support Vandermeer Forest Products, a well-established two-step distributor in the Pacific Northwest, and partner with Dr. Decks on the creation of our booth, which highlights the versatility of our decking and railing products."

The Clubhouse lighting is designed to match Clubhouse railing finishes, including black and white with a matte finish or contrasting bronze. Deceuninck will feature a host of these new lighting options at the show, including post cap lights with matching standard post caps, down lights for deck posts and step lights that can be used on posts or steps. Recessed deck lights will also be available for use on stairs, walkways and perimeters to create an additional design

feature. All lights come with full installation instructions, warranty and are available with timers and dimmer switches.

Deceuninck North America's Clubhouse Decking is 100-percent PVC and contains no wood or wood fillers. It is formulated to be up to 25-percent lighter than most wood and composites, and its dense cell structure offers superior strength and solid underfoot feel with Deceuninck's Korelite™ technology. Korelite also helps to keep moisture out and reduces the opportunity for degradation from mold, mildew, freezing and thawing. SunShield® technology helps protect Clubhouse from the harsh effects of the sun, including UV resistance and fade protection, resistance to cracking and brittleness, and surface degradation. Clubhouse Decking is also 100-percent recyclable and does not require painting or staining. It features a limited lifetime warranty with 25-year fade and stain protection backed by Deceuninck.

Deceuninck's Clubhouse Elite Railing System is engineered to be longer-lasting than painted wood and is backed by a limited lifetime warranty with 25-year fade and stain coverage. It is 100percent recyclable, and the low-maintenance nature of the product means no chemical cleaning, painting or staining is necessary. Available in white, walnut and black, Elite Railing's low-gloss, low-maintenance finish means that the product never needs to be painted. For extra protection, SunShield is also included.
