Deceuninck North America Introduces Polymer Compounding Solutions

Now Offering Compounding, Additives, Consulting and Design Services

[Deceuninck North America](#) is pleased to announce the company's compounding expertise is now made available through a variety of capabilities and services. Deceuninck's precision polymer compounding goes beyond blending to proprietary additive chemistry, patented processes, advanced engineering and complete solutions that create real market advantage.

"Our deep expertise and understanding of additive systems, their chemistries and how they interact together work to optimize efficiencies for our customers in their extrusion operations and in final product performance," said Filip Geeraert, president and CEO of Deceuninck North America. "The experience of our Material Science team working together with some of the world's most innovative additive manufacturers result in compounds that create true value, manufacturing efficiencies and lasting product attributes."

Deceuninck holds more than 200 active patents on designs, processes, technologies and the material science that defines high-performance compounding for extrusion, injection molding and blow molding applications. With the company's 160-million pound annual compounding capacity and a half-century of expertise, Deceuninck offers a series of solutions to meet exacting manufacturing requirements for processing, heat stability, weatherability, color consistency and application.

"Quality assurance is a major component of our precision polymer compounding solutions," Geeraert added. "Rigorous testing protocols provide on-going quality control operations, as well as certificate of assurance documentation."

For a full range of service options, call 877-563-4251 and speak to a material science representative.

About Deceuninck

Deceuninck North America, LLC is part of the Deceuninck Group, an integrated global organization specializing in compounding, tool fabrication, design, development, extrusion, finishing of uPVC window systems and composite applications for the building industry. Deceuninck employs 3,400 people in 25 countries. Deceuninck has production facilities in Belgium, Chile, Czech Republic, France, Germany, Poland, Russia, Thailand, Turkey, UK and US. Deceuninck sales in 2014 were € 552.8 million (with a net positive result of € 10.5 million), approximately \$608.08 million USD. In 2014, Deceuninck strengthened its top 3 market position through the acquisition of 'Pimapen,' the most recognized brand for PVC windows in Turkey adding approximately \$75 million of annual sales. Deceuninck North America encompasses fully-integrated design, compounding, tooling, extrusion and quality assurance disciplines for the production of vinyl window and door systems and decking/railing applications for the building industry at its corporate headquarters in Monroe, Ohio.
