EOS® PATIO DOOR

eos® is a versatile, high-performing patio door system aimed at renovation and remodeling applications, as well as new construction. The eos Patio Door is available as a two-panel, sliding patio door or direct-set offered in two, three or four lite configurations. With the ability to add side lites and/or a transom, eos provides a wide array of design options. eos also reaches a maximum size of 16 feet wide (four, 4-foot panels) by 8 feet high to create wide-open spaces.

eos meets the criteria for ENERGY STAR 6.0 by outperforming standard ENERGY STAR requirements.

- Air infiltration 0.09
- .27 U-factor in double pane configuration without foam
- .20 U-factor in a triple pane configuration without argon gas or foam filled frames (.17 U-factor with argon)
