## HMH ¡Arriba las Ciencias!®

Science programs should be student-centered, easy to implement, supportive, and flexible enough to fit into an already busy instructional day.

To meet those needs and more, *HMH Into Science®* and *HMH ¡Arriba las Ciencias!®* for Grades 6–8 delivers a flexible solution that streamlines the support, strategies, inspiration, and rigorous content you need to successfully engage your students in doing and learning science.

# Science Equipment Kits for Grades 6–8

Teachers know that students learn science by doing science—by asking questions, gathering evidence, trying different solutions, and reasoning about which solution is the best. With Hands-On Labs, students get to actively “do science” while thinking critically about their observations, gathering evidence, and defending their claims. The labs in *HMH Into Science* and *HMH ¡Arriba las Ciencias!* were built with teachers’ busy schedules in mind—they’re quick and easy to conduct and the Equipment Kits add convenience by streamlining planning and setup!

## Consumable Equipment Kits

These kits provide most of the consumable materials you need to complete the Hands-on Labs in the Student Activity Workbooks. A Consumable Kit contains enough materials for 14 groups. Each year, it’s best to order one Consumable Equipment Kit for every 2–3 sections taught.

- Integrated
- Engineering Design
- Life Science
- Earth and Space Science
- Physical Science

## Non-Consumable Equipment Kits

These kits contain most of the non-consumable items you need to complete the Hands-On Labs in the Student Activity Workbooks. A non consumable kit contains enough materials for 7 groups. It is recommended to order one Non-Consumable Equipment Kit per teacher for the life of the adoption.

- Integrated
- Engineering Design
- Life Science
- Earth and Space Science
- Physical Science

Many non-consumable items are shared between activities. These are labeled Common Materials. Items that are exclusive to an activity are labeled by unit. In order to provide yearly refills, if purchased, consumable items are packaged loosely within the shipping box. Use the materials list on *Ed*, the HMH learning platform to help determine what materials are needed for each activity.
