

ARTIFICIAL INTELLIGENCE IS CHANGING OUR WORLD. TOGETHER, WE DECIDE HOW. JOIN US AS A PARTNER SITE.

Introducing Technovation Families

The Artificial Intelligence Family Challenge is one of Technovation's global programs. This unique family program introduces participants to AI concepts and tools via hands-on sessions.

What's the goal?

Each family works together to identify a problem in their community and build a solution with AI technology that solves it. Families can share their ideas with the world by submitting them to the Technovation Championship. The prize? An all-inclusive trip to Silicon Valley, CA to pitch their idea to industry professionals. Some of our corporate partners include Nvidia and Google.

Bring this global movement to your community!

We take pride in offering this curriculum to communities around the world at no cost! All materials for this program are intentionally low-cost items you probably have lying around. Families who participate will need access to computers or tablets with WIFI.

Ready to learn? Enjoy teaching families? Join us!

PARTNER TIMELINE

What is the community site's commitment?

- Identify 1-2+ coaches. **We will train them at no cost to you or them!** Anyone can be a program leader! You do not need a computer science or engineering background.
- Recruit families for the program and launch
- **Lead the 20 hour program with families** anytime between August 2019 and February 2020. We have slide decks, worksheets, and other resources for leading the program prepared for you already! So you don't have to worry about hours of prep time.
- Ensure each family has access to computers or laptops with WiFi
