FAQs

What's different about an organization account?
A GitHub organization is a profile on GitHub that is managed from your personal account. Organizations are best suited for businesses who need to manage permissions for many employees. For more information, please read our [Help article](#).

Why don't I see any disk space limits?
See our [Help article](#).

5. You should receive a message on their GitHub dashboard.

6. **Next, go to <https://gh.io/copilot-free>** (This step is necessary after redeeming the coupon. You will not yet have access until you have signed up and configured your preferences).

GitHub Copilot

Your AI pair programmer

Use GitHub Copilot for free

🎉 Congratulations! You are eligible to use GitHub Copilot for free.

GitHub Copilot uses the Codex AI model to offer coding suggestions.

- ✓ Get code suggestions in more than a dozen coding languages including Python, JavaScript, TypeScript, Go, and Ruby
- ✓ Plugs into IDEs including VS Code, Visual Studio, Neovim, and JetBrains

Eligibility requirements

GitHub Copilot is free to use for open source maintainers, teachers and students. We check eligibility monthly, per our policies.

[Get access to GitHub Copilot](#)

7. Click **Get access to GitHub Copilot**.

Select your preferences

You can change these at any time from your account settings.

Suggestions matching public code

GitHub Copilot can allow or block suggestions matching public code. See [the GitHub Copilot documentation](#) to learn more.

Allow ▾

☒ **Allow GitHub to use my code snippets for product improvements ***

Allow GitHub, its affiliates and third parties to use my code snippets to research and improve GitHub Copilot suggestions, related models and product features. More information in [Privacy FAQ](#).

Save and get started

- Pick your settings that you need and click **Save and get started**.

GitHub Copilot is now ready to pair!

Add it to your editor and start building

Install the GitHub Copilot extension

To use GitHub Copilot, you first need to install the GitHub Copilot extension. To install for your preferred code editor, check out these Getting Started guides:

- [Visual Studio Code](#)
- [Visual Studio](#)
- [JetBrains](#)
- [Neovim](#)

 If you have the extension already installed for your code editor and have it open, please [restart your editor](#) in order to access GitHub Copilot.

Having problems installing? [Visit the Feedback forum](#).

Tip: Don't see your code editor? We currently only support the editors listed above. We're constantly looking to expand the editors we support, so stay tuned.

Go to [Billing and plans](#) in your account settings to manage your GitHub Copilot subscription.

9. Celebrate your success!
