ABOUT THE MENTORSHIP EXCHANGE

Disability:IN empowers business to achieve disability inclusion and equality. The Disability:IN Mentorship Exchange is a six-month career mentoring opportunity for college students and recent graduates with disabilities, including veterans, whom we call NextGen Leaders.

In 2018, there were 220 NextGen Leaders in the Mentoring Program; many were STEM-focused. Through the Mentoring Program, mentees benefit from a network of business connections.

Approximately 85% of NextGen Leaders participating in the Mentorship Exchange have gained employment since the program's inception.

More information at:
www.DisabilityIN.org

NextGen Leader Benefits

- Meet with corporate executive mentor at least twice a month (can include email exchange, phone chat, video call or in person), review your resume and set career goals.
- Attend monthly webinars to learn more about how to transition from school to work.
- Participate in program for 6-month period (upcoming: March-August 2019)

My mentorship with Bob V. was life-changing and not just because he got me an internship which led to my current job with Northrop Grumman. He made me a better person by helping me to see the value I had even as my disability progressed and showing me how to be a successful, despite a disability like he has been able to do.
