<p>Number of buildings:</p> <p>Auditors should count all buildings that are part of the facility, whether residents are formally allowed to enter them or not. In situations where temporary structures have been erected (e.g., tents) the auditor should use their discretion to determine whether to include the structure in the overall count of buildings. As a general rule, if a temporary structure is regularly or routinely used to hold or house residents, or if the temporary structure is used to house or support operational functions for more than a short period of time (e.g., an emergency situation), it should be included in the overall count of buildings.</p>	1
<p>Number of resident housing units:</p> <p>Enter 0 if the facility does not have discrete housing units. DOJ PREA Working Group FAQ on the definition of a housing unit: How is a "housing unit" defined for the purposes of the PREA Standards? The question has been raised in particular as it relates to facilities that have adjacent or interconnected units. The most common concept of a housing unit is architectural. The generally agreed-upon definition is a space that is enclosed by physical barriers accessed through one or more doors of various types, including commercial-grade swing doors, steel sliding doors, interlocking sally port doors, etc. In addition to the primary entrance and exit, additional doors are often included to meet life safety codes. The unit contains sleeping space, sanitary facilities (including toilets, lavatories, and showers), and a dayroom or leisure space in differing configurations. Many facilities are designed with modules or pods clustered around a control room. This multiple-pod design provides the facility with certain staff efficiencies and economies of scale. At the same time, the design affords the flexibility to separately house residents of differing security levels, or who are grouped by some other operational or service scheme. Generally, the control room is enclosed by security glass, and in some cases, this allows residents to see into neighboring pods. However, observation from one unit to another is usually limited by angled site lines. In some cases, the facility has prevented this entirely by installing one-way glass. Both the architectural design and functional use of these multiple pods indicate that they are managed as distinct housing units.</p>	Redacted

<i>Targeted Resident/Resident/Detainee Interviews</i>

<p>33. Enter the total number of TARGETED RESIDENTS who were interviewed:</p> <p><i>As stated in the PREA Auditor Handbook, the breakdown of targeted interviews is intended to guide auditors in interviewing the appropriate cross-section of residents who are the most vulnerable to sexual abuse and sexual harassment. When completing questions regarding targeted resident/resident/detainee interviews below, remember that an interview with one resident may satisfy multiple targeted interview requirements. These questions are asking about the number of interviews conducted using the targeted resident protocols.</i></p> <p><i>For example, if an auditor interviews a resident who has a physical disability, is being held in segregated housing due to risk of sexual victimization, and disclosed prior sexual victimization, that interview would be included in the totals for each of those questions. Therefore, in most cases, the sum of all the following responses to the targeted resident interview categories will exceed the total number of targeted residents who were interviewed.</i></p> <p><i>If a particular targeted population is not applicable in the audited facility, enter "0".</i></p>	<p>0</p>

Site Review and Documentation Sampling

Site Review

PREA Standard 115.401(h) states, "The auditor shall have access to, and shall observe, all areas of the audited facilities." In order to meet the requirements in this Standard, the site review portion of the onsite audit must include a thorough examination of the entire facility. The site review is not a casual tour of the facility. It is an active, inquiring process that includes talking with staff and residents to determine whether, and the extent to which, the audited facility's practices demonstrate compliance with the Standards. Note: discussions related to testing critical functions are expected to be included in the relevant Standard-specific overall determination narratives.

Where there is a collection of records to review—such as staff, contractor, and volunteer training records; background check records; supervisory rounds logs; risk screening and intake processing records; resident education records; medical files; and investigative files—auditors must self-select for review a representative sample of each type of record.

Dismas Charities, Inc. - Corpus Christi Facility provided the following documents to assist the auditor in determining compliance with the standard:

1. Dismas Charities, Inc. PROGRAMS Searches and Contraband Procedure
2. Dismas Charities, Inc. SEARCHES AND CONTRABAND
3. Dismas Charities, Inc. SECURITY AND ACCOUNTABILITY Searches and Contraband Procedure 11.D

Interviews:

1. Random Resident Interviews
2. Resident Monitor Interviews

During resident interviews, residents reported being able to use the restroom, take a shower and change clothing with privacy from staff and other residents. The process for exiting and returning to the facility was discussed with residents. They indicated that when they return to the facility from either work or other passes they go through a process which includes a property search and pat search. All residents reported that male staff search male residents and female staff search female residents and if necessary staff conduct searches using a hand-held metal detector.

During Resident Monitor interviews, they reported that when doing counts and routine rounds that female staff rarely go in male dorms and male staff rarely go in female dorms. They also indicated that when necessary to do so they knock and announce and wait before entering areas where residents may be undressed. The process for exiting and returning to the facility was also discussed with Residents Monitors. They indicated that when residents return to the facility from either work or other passes there is a process which includes a property search and pat search. All reported that male staff search male residents and female staff search female residents. If same gender staff is not available, staff is trained to use a "wand" style metal detector to conduct searches. Resident Monitor stated they have received training on how to conduct cross-gender pat-down searches, and searches of transgender and intersex residents if needed.

Site Review Observations:

1. Observations during on-site review of physical plant

- (a) The Dismas Charities Corpus Christi Facility does not allow “opposite sex” pat searches, strip searches or body cavity searches. All staff is trained in various searches and search techniques. Dismas Charities utilized the “Guidance in Cross-Gender and Transgender Pat Searches” training module from the PREA Resource Center. This was confirmed during documentation review and staff interviews.

Dismas Charities Corpus Christi Facility reported the number of cross-gender strip or cross-gender visual body cavity searches of residents were (0) zero.

- (b) Dismas Charities does not permit cross-gender pat-down searches of female residents absent exigent circumstances.

Dismas Charities Corpus Christi Facility reported the number of pat-down searches of female residents that were conducted by male staff were (0) zero.

- (c) The Corpus Christi Facility has sufficient staff available to conduct searches when needed. If same sex staff is not available, cross gender staff is trained to use a “wand” style metal detector to conduct searches.
- (d) Dismas Charities policies and procedures enable residents to shower, perform bodily functions, and change clothing without nonmedical staff of the opposite gender viewing their breasts, buttocks, or genitalia, except in exigent circumstances or when such viewing is incidental to routine cell checks. Policies require staff of the opposite gender to announce their presence when entering an area where residents are likely to be showering, performing bodily functions, or changing clothing.

Both a review of policies and interviews with staff and residents confirmed that staff knock and announce their presence and wait before entering into dorms.

During the tour and review of cameras in the CMO it was found that none of the cameras view the dorms, toilet, shower or other areas where residents may be undressed. All toilets have doors on stalls and all showers have curtains.

- (e) Dismas Charities policy prohibits searching or physically examining a transgender or intersex resident for the sole purpose of determining the resident’s genital status.

Dismas Charities reported zero (0) searches or physical examinations of transgender or intersex resident for the purpose of determining the resident's genital status.

- (f) Dismas Charities reported 100% of staff have been trained in how to conduct cross-gender pat-down searches, and searches of transgender and intersex residents, in a professional and respectful manner, and in the least intrusive manner possible, consistent with security needs.

The Auditor concluded staff had been appropriately trained to conduct cross-gender searches if necessary. Staff make opposite gender announcements when entering resident living units. Residents are able to shower, change clothing, and use the restroom without nonmedical staff of the opposite gender seeing them do so. Staff has been trained to treat transgender and intersex inmates professionally and respectfully. The Auditor reviewed the agency’s policies and

procedures, training documents, shift rosters, made on site observations, and interviewed staff and resident. Based upon the review and analysis of all of the available evidence, the auditor has determined that the agency is fully compliant with this standard.

Instructions for Overall Compliance Determination Narrative

The narrative below must include a comprehensive discussion of all the evidence relied upon in making the compliance or non-compliance determination, the auditor's analysis and reasoning, and the auditor's conclusions. During interviews with Resident Monitors who conduct the initial intake screening and education they explained how accommodations can be made if needed. Specifically, information may be read to individuals who are blind or cannot read the information themselves. They also stated that materials were available in Spanish and that interpretive services are available if needed. Interviews with Counselors who conduct the reassessments and provide additional PREA education indicated the same availability of accommodations.

Random residents were asked during interviews if they knew of any other residents that are disabled, unable to speak English or may have trouble understanding the information provide to them during the intake and orientation process. None were aware of any at the facility during the onsite audit.

Site Review Observations:

1. Observations during on-site review of physical plant

Dismas Charities has a policy which states: *“Assistance will be provided to those residents who have limited English proficiency, are deaf, visually impaired, or otherwise disabled as well as residents who have limited reading skills. Other residents may not be used as interpreters, readers or assistants except in limited circumstances in an exigent situation. The director will seek guidance from the RVP in these cases.”*

The Corpus Christi Facility takes steps which ensures residents with disabilities have an equal opportunity to participate in or benefit from all aspects of the agency’s efforts to prevent, detect, and respond to sexual abuse and sexual harassment. Dismas Charities provided a Memo for clarification. It states:

The agency (Dismas Charities) shall take reasonable steps to ensure meaningful access to all aspects of the agency’s efforts to prevent, detect, and respond to sexual abuse and sexual harassment to residents who are limited English proficient, including steps to provide interpreters who can interpret effectively, accurately, and impartially, both receptively and expressively, using any necessary specialized vocabulary.

The Dismas facility will first use an in-house staff member having the necessary skills if none is available, the director will reach out to other Dismas facilities for assistance. If no Dismas employee is available, the director with assistance of the assigned Regional Vice-President will reach out to the local community. The Supervising Authority for the client will be informed for assistance if needed.

The Corpus Christi Facility provides residents an orientation, handouts for the local rape crisis center, and posters which are available in English and Spanish. Additionally, the facility has access to interpretive services if needed.

In the past 12 months, the number of instances where resident interpreters, readers, or other types of resident assistants have been used and it was not the case that an extended delay in obtaining another interpreter could compromise the resident's safety, the performance of first-response duties under § 115.264, or the investigation of the resident's allegations was zero (0).

The Auditor concluded the agency provides information that ensures equal opportunities to residents who are disabled. The agency takes reasonable steps to provide residents who are limited English proficient meaningful access to all aspects of the agency's prevention, detection and response policies towards sexual abuse and sexual harassment. Instructions for Overall Compliance Determination Narrative

The narrative below must include a comprehensive discussion of all the evidence relied upon in making the compliance or non-compliance determination, the auditor’s analysis and reasoning, and the auditor’s conclusions. This discussion must also include corrective action recommendations where the facility does not meet the standard. These recommendations must be included in the Final Report, accompanied by information on specific corrective actions taken by the facility.

3. Dismas Charities Sexual Abuse/Harassment/Misconduct Prevention Intervention Statement For Residents

Interviews:

1. Facility Director/PREA Compliance Manager
2. Agency PREA Coordinator
3. Resident Monitor Interviews

Interviews with administrative staff confirmed that residents (victims) of sexual abuse receive timely and unimpeded access to emergency medical treatment and crisis intervention services. Facility staff indicated that services begin immediately upon notification of a victim of sexual abuse from the supervisor or any other staff to contact the hospital and medical practitioner. All notifications are completed to the appropriate individuals and to follow the medical staff's directive regarding any forensic examination. Random staff interviews indicated the scope of services is in accordance to their professional judgment, policy and any physician orders or protocols. All orders are documented in the residents' health record.

Random staff interviews also indicated that a referral could be made to the hospital to begin any sexually transmitted infection prophylaxis treatment/services and orders for follow-up services. Mental health services would begin when the victim is available once the forensic examination has been completed at the hospital. Random staff interviews indicated mental health staff would see the victim no later than 24 hours of an incident and provide one-on-one counseling and make available outside emotional support services and follow-up care.
