Price	$11,900.00
Sale Price	$8,900.00

Description

Our Wedge style car trailers are state of the art and have become the standard of the industry. Kaufman Wedge car trailers make up about 2/3rds of the 3 and 4 car trailers on US highways. Our standard 4-car trailer model weighs 6,300 lb. and will carry 4 small cars. It is constructed with a lightweight, hi-tensile tubing frame and lightweight, ridged, mesh runners which reduce weight and wind drag, while giving good loading traction in inclement weather. Flipouts - front and rear - give 56′ of usable load area. Frame upgrades are included over the 3-car model to carry the extra load of a fourth vehicle. Standard running gear on this model is 3-7,000 lb. axles with slipper spring suspension and 16″ radial tires. This durable 4-car car trailer works well with today's 1-ton pickups.

We offer a Heavy Duty Mesh Floor Option with Tire Tie Down Ratchet and Straps. The heavier mesh is sized to hook the ratchet tie downs directly into the floor. This tie down system ties the tires of the vehicles being hauled directly to the floor of the trailer. This is superior to the wheel loop tie down system which exerts side pressure on the tires and suspensions of the vehicles being hauled.
