

# MODULAR BACKDROP SYSTEM

WORLDWIDE SOLUTION

V.2

## MODULAR **BACKDROP** SYSTEM

AV-Drop Modular Backdrop is a revolutionary scenic solution that allows you to build stage sets, divider walls, projection screens, surrounds, step & repeats and branded backdrops. This system also can be used for tech masking, actual projections screens and much more, all from the same set of components.

Quickly becoming the world standard, AV-Drop is deployed across Europe, The Middle East, Asia, Australia and the Americas. Born in Barcelona, with European design and engineering, AV-Drop stands alone in the marketplace.

The AV-Drop System is scenic made simple. Gone are the cumbersome fixed size, wooden Hollywood-style hard flats. Instead, this system includes basic frames, extensions, unions and easy to use clamps. That's it. A sustainable robust extruded aluminum frame system built to last for years. Frame perimeters are covered with Velcro™ to accept a multitude of fabric skins and or prints to create an amazing flat-wall solution.

By combining frames, extensions and clamps, AV-Drop is a compact and fully reusable system, designed for quick setup and easily disassembled.

European quality brought to you exclusively by Drape Kings. Available for rental or purchase.

# WHY AV-DROP?

## EASY CONFIGURATION

The modular frame system adapts to your set up needs, combining an endless combination of frames, fabric skins, branded fabric prints, projection screens and LED surrounds.

## COMPACT & LIGHTWEIGHT

Since the largest aluminum piece is only 6' long or a full A frame at 4'x5', AV-Drop is ideal for shipping or easily storing on a pallet. A 16'h x 100'w set breaks down into two large pallets, and can make its way into any venue through tight quarters or even onto an elevator.

## FAST INSTALLATION

The re-usable modular design allows you to pre-assemble large frames or breakdown to pallet size for quick installations and strikes. Fitted Velcro™ fabric skins or prints can be installed on-site which protects them during the shipping process.

It's so simple. Frames click together, clamps hold them in place, and Velcro'd™ fabric skins are stretched on the frames. That's it! Scenic made simple!

## APPLICATIONS

- Branded backdrops
- Step & Repeats
- Endless Hollywood flats
- Front & rear projection screen surrounds
- Borderless full white front projection screens
- Flat walls to divide or build rooms

## FEATURES & BENEFITS

- Stacks on a pallet, stores in a closet, fits in an elevator
- Scenic shop quality without the shop, tools or traditional wood
- No tools required: Frames snap & clamp together
- Ground supported up to 20' high
- Green Solution: Re-Usable frames and Velcro'd™ fabric skins
- Cost effective & time saving
- Ease of installation saves both labor and venue rental times
- Offers less framing, parts and weight than traditional solutions
- 16'h x 100'w set can ship and store on two large pallets

AV-Drop allows for easy integration of your existing projection screens or use AV-Drop frames with Velcro'd™ front and rear skins to create standard or custom size screens that fit your needs.

It is the ultimate solution for Industrial or Traditional Theatre applications, exhibitions, trade shows, temporary rooms, press events or wherever a premium modular backdrop is needed.
