Prerequisites

- This plugin requires a Geomagic product listed in the heading. To verify your current version, launch the application and select **Help -> About Geomagic ProductName**. The text box at the top of the dialog indicates the current software version.

Installation

1. Verify installation of Geomagic product listed in the heading.
2. Log in to Windows as a user with administrative privileges.
3. Obtain the FARO device driver installer named **FaroArmUsbDriver5091.exe** from the Geomagic installation CD or website.
4. Obtain the installer named **FaroSetup765509.exe** from the Geomagic website.
5. Verify that the USB cable between the FARO equipment and the PC is disconnected.
6. Run the device driver installer.
7. Run the plugin installer.
8. Connect the USB cable.

User Instructions

See FARO Scanning Plugin, document version E.

New Features in this Geomagic FARO Plugin

1. Compatibility with *all* versions of the FARO ScanArm.
