## Prerequisites

This plugin requires the Konica-Minolta Range Viewer software and a Geomagic product listed in the heading. To verify the installed version, launch the Geomagic application and select **Help > About Geomagic ProductName**. The text box at the top of the dialog indicates the current software version.

## New Features

- Supports 64-bit version only.
- Supports Geomagic Studio 11 and Geomagic Qualify 11.
- Supports RangeViewer 1.33

## Installation

1. Verify installation of a Geomagic product listed in the heading.
2. Log in to Windows as a user with administrative privileges.
3. Verify installation of the newest drivers that come with the Minolta equipment.
4. [Download the setup program](#) from the Geomagic Support web site
5. Run the installer.
6. Follow other on-screen prompts and click **Finish** when installation is complete.
7. Start the Geomagic application and verify that Konica-Minolta appears on the Plugins menu.

## User Instructions

1. Launch Konica-Minolta's Range Viewer and complete the scanning process.
2. Launch the Geomagic application.
3. Choose **Plug-ins > Konica-Minolta Range7 Plug-in** or click the plugin icon.
4. Click **Connect**.
5. In the Range Viewer software, change to the Edit mode tab and click the **Export Elements to Other Applications** icon on the left toolbar to send the data to the Geomagic product.
