Prerequisites

The following prerequisites must be verified prior to installing the plugin:

- **Geomagic Software Version:** This plugin requires a Geomagic product listed in the heading above.
To verify your current version, launch the application and select **App Button**  > **About**. The About dialog box displays the current software version (2012.X.X).
- **Supported Operating Systems:** This plugin supports *only* the 64-bit versions of Microsoft Windows XP, Windows Vista, and Windows 7. 32-bit versions of these operating systems are *not* supported.

Installation

To install the plugin:

1. Verify the installation of the supported Geomagic product (as listed above).
2. If necessary, log in to your system as a user with administrative privileges.

3. Verify that the newest drivers that come with the Minolta equipment are installed.

For more information, contact your local Minolta administrator.

4. From the [Plugins Page](#) of the [Geomagic Support](#) web site, download the plugin installer (**MinoltaRange750_64.exe**).

Important: Only 64-bit installations are supported.

5. Run the plugin installer (**MinoltaRange750_64.exe**).
6. Reboot your system.
7. Start the Geomagic application and verify that the plug-in appears in the **Scanning Plug-In** drop-down list under **App Button**  > **Options** > **Hardware** > **Digitizers**.

Known Issues

If you attempt to autofocus while streaming a live preview image, the plugin will stop functioning (become “frozen”). You need to turn off streaming before attempting to autofocus.
