Smart legal contracts: towards conflict prevention and resolution

Ph.D. Aura Esther Vilalta
Chair in Civil Law
Law and Political Science Dept.
Universitat Oberta de Catalunya (UOC).
Life cycle of a Smart legal contract
New challenges
Smart legal contracts in high volume transactions

- There are a number of limits on the use of smart legal contracts.
- **Offer made by means of eplatforms and standard terms:** Legal implications stemming from the applicable legal framework.
- **Double acceptance for SLC?** Distinguishing between self-implementation and self-execution.
- **Implementation in the pre-established terms, automatically:** Reduction of traditional conflicts.
- **Traditional remedies challenged:** Right of withdrawal vs inmutability
- **Payments with cryptocurrencies**
- **Self-performance with inbound/outbound oracles**
- **Disputes and execution: ODRs**
Thank you
