THE PRSB
AN INTRODUCTION TO THE WORK OF THE PRSB

NOVEMBER 2017
VISION AND MISSION

To optimise the health and wellbeing of UK citizens through the wide spread adoption of high quality, standardised records.

To become the authoritative voice for the development and widespread use of standards that ensure all digital health and social care records are of the highest quality.

WHAT IS A STANDARDISED RECORD?

A record is the information that health and care professionals, and increasingly patients themselves, capture for their ongoing care.

Standardising the information will make sure the records are of a consistently high quality and the same information is captured every time.

High quality records are about good patient care – we all need to be interested in that.
We work with member organisations who represent more than 750,000 frontline clinicians and care professionals as well as patients and the public.

PRSB MEMBERS

Academy of Medical Royal Colleges
Royal College of Nursing
Royal College of General Practitioners
Royal College of Paediatrics and Child Health
Royal College of Pathologists
Royal College of Physicians
Royal College of Psychiatrists
Royal College of Surgeons of England
Royal College of Obstetricians & Gynaecologists
Royal College of Emergency Medicine
Royal College of Anaesthetists
Royal College of Midwives
Royal College of Radiologists
Royal College of Occupational Therapists
Royal College of Speech and Language Therapists

Tech UK
DEVELOPING A STANDARD

1. In consultation the PRSB identify a priority area

2. PRSB puts together an expert group

3. Work collaboratively to develop a standard
   - Online surveys (UK wide)
   - Professional standards authoring
   - Workshops
   - Literature review

4. NHS Digital creates technical messaging

5. PRSB independent assurance committee

6. Member organisations sign off and endorsement ✔

7. Implementation and support

8. Keeping standard up to date – revision process
WHY STANDARDS MATTER

FOR PATIENTS AND PUBLIC
- Only need to give details once
- Access to personal health information
- Take control of their own records

FOR CLINICAL PRACTICE
- Professionals jointly agree best practice
- No more fragmented systems and free text
- Better access to shared information

FOR INTEGRATED CARE
- Information needs are agreed by all involved: clinicians/professionals/patients
- Accessible by everyone who needs it

FOR SAFETY
- Reduce risk of medical errors
- Full and immediate access to complete information

FOR RESEARCH
- Structured, standardised care records enabling access to greater quantity and far higher quality data to improve research potential

FOR PERSONALISED CARE
- Care can be created for a specific individual using genotype and phenotype data

Video - CCIO Keith McNeil - the benefit of using standards
CURRENT RECORD STANDARDS

PUBLISHED RECORD STANDARDS

✓ Standards for the clinical structure and content of patient records
✓ Revised e-discharge summary
✓ Emergency care discharge summary
✓ Ambulance handover process
✓ Mental health discharge summary
✓ Crisis care (Healthy London)
✓ Outpatient letters
✓ Child health events

IN DEVELOPMENT/PLANNING

○ Care home information flows
○ Digital care and support plans
○ Referrals
○ Maternity
○ SNOMED/DM+D/GS1
### Putting Standards into Practice – Changing the Culture

#### How Are We Doing This?

<table>
<thead>
<tr>
<th>Engaging frontline professionals and leaders</th>
<th>Supporting frontline implementation</th>
<th>Aligning system levers and incentives</th>
<th>Build into education and training</th>
<th>Raise public awareness</th>
</tr>
</thead>
</table>

#### How Does That Help?

| Promoting the changes to happen nationally and locally ‘Pull from users’ | Support providers to implement using evidence of what works from trusted peers | Make it easier to do the right thing | Shape how next generation will work | Unleash people power |
# Seven Work Priority Areas

1. **Person centred care & shared decision-making**
2. **Supporting integrated care**
3. **Standardising key data flows and transfers of care**
4. **Prioritising social care**
5. **Enabling audit, research and precision medicine**
6. **Improving Safety**
7. **Getting the right foundations in place**
DIGITAL CARE AND SUPPORT PLANNING STANDARD

Integrated care planning

- Co-ordinated care
- Multi-disciplinary care
- Across health and care sectors
- Real time access to information
- Across geographical boundaries
- System agnostic
THE JOURNEY TO WIDER RECORD SHARING

- Organisational systems
- Local Data sharing HIE
- More granular data sharing
- Multi-authored records
- Data repositories
- Open platforms
- Apps for clinicians and patients
- Clinical
- Technical
- Information Sharing & consent
• Essential to engage appropriately
• Difficult to get right
• Role of CCIOs
• Clinical Interface
• Presentation of data
ISSUES AND CHALLENGES

• Start at small scale and build up
• Need to be agile
• Clinical pull and technical push
• Consent
• Data overload
• Local, regional and national solutions
• Tactical vrs strategic solutions
• Complex journey
• Many of the building blocks are in place
• Need clear vision for future AND steps along the pathway
