Gloucestershire local shared care record
A platform for the future

Una Rice and Matt Cox  |  11 July 2018
Just another interoperability project?

The right information, in the right place, at the right time.

End User led

Real time

Platform for the future

Our experience and a look to the future

Easy to Access

Easy to Configure

Easy to Use

The future
## Who’s involved?

<table>
<thead>
<tr>
<th>Real time or near real time</th>
<th>Not real time</th>
</tr>
</thead>
<tbody>
<tr>
<td>Gloucestershire GPs (Primary Care)</td>
<td>EMIS, Vision, TPP (SystemOne)</td>
</tr>
<tr>
<td>Glos County council (Social services)</td>
<td>Liquid Logic</td>
</tr>
<tr>
<td>2gether (Mental Health)</td>
<td>RIO</td>
</tr>
<tr>
<td>Glos NHS FT (Acute)</td>
<td>TrakCare</td>
</tr>
<tr>
<td>Glos community services (Community services)</td>
<td></td>
</tr>
<tr>
<td>TPP Community</td>
<td></td>
</tr>
<tr>
<td>Care UK (Out of Hours)</td>
<td>Adastra</td>
</tr>
</tbody>
</table>

---

Next:
- Adult Social Care
- Hospices?
- Additional Urgent Care services/Planned Care
- 999?
Ease of access

1. Importance of Partner ownership
2. Good local RA set-up and processes
3. Source supplier willingness
1. Data is messy
2. Variety of end user reps important
3. Strong clinical leaders and doers needed
4. Users and techies need to work closely
Challenges

1. Complexity and volume of primary care data - 3 different systems
2. Development project / New supplier
3. Competing priorities for suppliers/providers
Integrated Care – a platform for change

Developing national citizen services
- NHS app
- NHS.uk
- Wider Gov

Evolve Integrated Care

Evolve Electronic Medical Record
- 33 million patients

- CLOUD
- CONNECTORS
- FORMS
- FHIR
- GOVERNANCE
- IOT / DEVICES
- PROXIMITY
- ROLE-BASED SECURITY
- REPORTING
- ROLE-BASED
- SECURITY
- TELEHEALTH
- UNIFIED VIEW
- WORKFLOW
- DOCUMENT MANAGEMENT
- ENGAGEMENT
- WORKFLOW
- DOCUMENT MANAGEMENT
- ENGAGEMENT

33 million patients

- DOCUMENT MANAGEMENT
- ENGAGEMENT

33 million patients
What next?

- Review and refine data sets and displays - user feedback and enhancement
- Patient access and services
- Support multi-disciplinary, cross organisational working (e.g. workflow/notification)
