## Sign In and Find a Stop

1. Sign in to Reveal Driver.

2. Tap a region (North America, Asia-Pacific, or Europe).

3. Select a vehicle, and then tap **Continue**.

4. On the **Today** screen, tap **Stops** to open the **Current** tab on the **Stops** screen.

   The numbered markers on the map show the location of each stop. The stops are listed in the lower part of the screen.

   ○ **Outstanding** - Complete these first. These are stops that should have been completed, but haven't yet.

   ○ **Today** - Stops that should be completed today.

5. Tap a stop to open the **Stop Details** screen and view more details about the stop.

Navigate to a Stop

1. On the **Stop Details** screen, tap **Directions** 🗺️.

2. From the list of options, tap "Navigation", and then tap **OK**.

   The Navigation app opens and calculates the route from your current location to the stop address.

3. On the **Route Overview** screen, review the route.

   You might want do one of the following:

   ○ Tap the **Hazmat** icon to review or edit the hazardous material settings, if they are defined for your vehicle:

   ○ Tap ⚙️ to review or edit other settings.

Note: To return to Reveal Driver, tap ←.

4. Tap 🔼 to start navigating to the stop. Turn-by-turn directions are displayed on the **Guidance** screen.

5. Follow the directions to the stop.

6. When you have arrived at the stop and want to return to Reveal Driver, tap **Menu** ☰, and then tap "Reveal Driver".

Change the Status of a Stop

1. On the Reveal Driver **Stops** screen, locate the stop and then swipe left to view the following options:

2. Tap an option to change the status of the stop.

   ○ **Complete** - tap this when a stop has been completed. Completed stops listed on the **History** screen.

   ○ **Refuse** - tap this to refuse a stop. Refused stops are listed on the **History** screen.

   ○ **In Progress** - tap this to give the stop the "In Progress" status.

3. Tap the white area to hide the options.

Edit Vehicle Settings In Navigation

1. In Navigation, tap **Menu** ☰.

2. Tap "Settings" > "Vehicle".

3. On the **Vehicle** screen, edit the vehicle settings.
