

Setting Navigation as Map/Navigation Default (Android)

This document is for users who want to set Navigation as the default map/navigation app on an Android device.

You can set Navigation as your default map or satnav app on an Android device.

1. On the phone or tablet, go to **Settings**.
2. Tap **Apps**. If Google Maps (or any other map app) is set as default, find it in the list on the **Apps** screen and tap it.
3. Tap **Open by default**.
4. Tap **Open Supported Links**, and then tap "Always ask".
5. Go back to the **Apps** screen, find "Navigation" in the list, and tap it.
6. Tap **Open by default**.
7. Tap **Open Supported Links**, and then tap "Always ask".

Note: The options described in the steps above might be slightly different depending on the make and model of your Android device.

Getting Help

For additional instructions and tips on using the Navigation mobile app, see the following resources:

- [Navigation PDF guides](#)
- [Navigation online help](#)
- **Navigation in-app help:** If you need help while you are using the Navigation mobile app, tap the **Menu** icon  > **Help**.
