## What's New?

**Navigation v6.17.4** contains the following updates:

- Improved highway exit information on device displays and in spoken directions. The following screenshots show how exit information was displayed before this update, and how the information is displayed now.

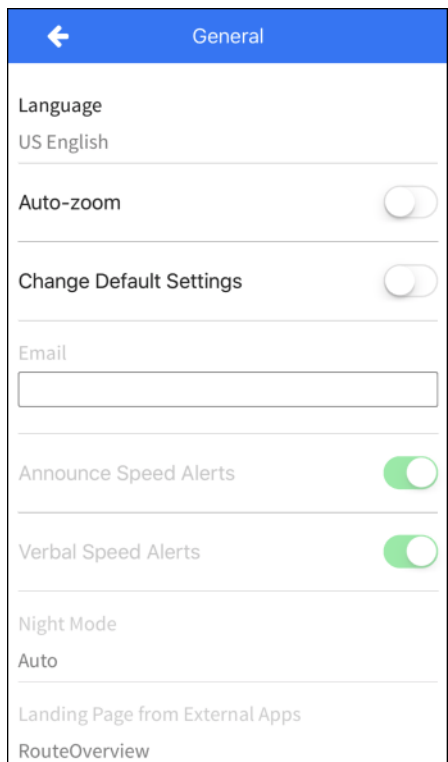

Before update

After update

- By default, the **Settings > Vehicle** screen on the NavGE application lets drivers change vehicle settings. This screen can now be disabled on the platform. If you do not require driver control, email support to request that the option be disabled. If the option is disabled, drivers see a message on the **Settings > Vehicle** screen that says "Your administrator has specified that these settings cannot be changed".

- Added auto-zoom functionality to the map, so that the next maneuver is always displayed. The level of auto-zoom depends on the distance to the next maneuver. Auto-zoom is a beta feature, and is set to "Off" by default. The following screenshot shows the new auto-zoom control on the **Settings > General** screen.

- Made performance, stability, and usability improvements.

## Release Date and Time

Updates for the Navigation v6.17.4 mobile application will be released to the Google Play and iTunes Store in January 2019.

## Get Help

Use the following resources to download the NavGE mobile application and to get help using or troubleshooting NavGE.

<b>Navigation app download</b>	<a href="#">Google Play store</a> (Android) or the <a href="#">Apple App store</a> (iOS)
