Navigation Release

Verizon Connect regularly issues software updates to improve the technical quality and overall user experience of our products and services. These release notes provide information about updates that might directly impact you following the update to **Navigation v6.18**.

What's New?

Navigation v6.18 contains the following updates:

• Added the "Last Mile to Marker" feature that gives drivers verbal and on-screen information, such as access paths and arrival notes, when arriving at and departing from their destination.

• The map's auto-zoom functionality, which was introduced in a previous release and was set to "Off" by default, is now set to "On" by default.

• The "Color Turn Notifications" setting has been renamed to "Enhanced Turn Notifications", and now includes a "blinking and clicking" feature for the **Turn** icon. When "Enhanced Turn Notifications" are enabled, and the driver is less than 400 meters from their next maneuver, the **Turn** icon blinks and a clicking sound is repeated at regular intervals (if the driver's device is not muted). Note that this feature may not work as expected for some LG models.

• Made performance, stability, and usability improvements.

Release Date and Time

Updates for the Navigation v6.18 mobile application will be released to the Google Play and iTunes Store in March 2019**.**

Get Help

Use the following resources to download the NavGE mobile application and to get help using or troubleshooting NavGE.

Navigation app download	Google Play store (Android) or the Apple App store (iOS)
Navigation mobile app help	Sign in to the app, then tap **Menu** ☰ **> Help**.
Help website	https://help.telogis.com
Troubleshooting	Submit a support request.
Best practices	Check the Resources page on the Verizon Connect website for best practices and insider tips for fleet management, navigation, and routing.
