IBS, Crohn's & Celiac Diseases: Case Presentation & Discussion

NEW

Presented by Dickson Thom DDS ND

Wednesday, October 19, 2016

5:00 PM – 6:30 PM PST | 8:00 PM – 9:30 PM EST

A vast number of patients with GI problems are diagnosed with IBS because no physical findings are present. However, increasing numbers of patients are diagnosed with inflammation, malabsorption, dysbiosis, gluten enteropathy and IBD. IBD is at least two, separate disorders that cause inflammation and ulceration of the small and large intestines. These two disorders are ulcerative colitis and Crohn's disease. Crohn's disease can occur anywhere in the digestive tract but is common in the lower small bowel (ileum) or large bowel.

This teleconference will outline these conditions; provide knowledge and understanding on how to approach diagnosis and case management.

CLINICAL DISCUSSION INCLUDES:

- IBS
- Crohn's
- Celiac (gluten enteropathy)
- Ulcerative colitis

KEY LEARNING HIGHLIGHTS

- Diagnostic criteria
- Lab tests
- Typical presentation
- Dietary and Nutritional recommendation

Seminars, teleconferences and webinars are for educational purposes only and are intended for licensed health care practitioners. These therapies are not substitutions for standard medical care. Practitioners are solely responsible for the care and treatment provided to their own patients.
