

I'm your advanced in-home medication dispenser, and seriously connected health partner.

I'm here to support you with your daily health routines, including managing your medicines and health data while helping you keep motivated and on track.

With me by your side, you're never alone when it comes to your health.

how do I do it? well, i'm one of a kind

i'm better connected

I connect you to your caregiver— and certified spencer pharmacist—in a unique and totally integrated way.

I keep everyone informed with everything from helpful reminders to alerts and messages of support, so we can all help.

I let you make a virtual visit to your pharmacist or participating doctor, so they can answer any questions you may have.

i'm proactive and personal

I dispense the right pills, exactly when they are needed.

I show pictures of the pills, to avoid confusion if your pills are changed.

I'm a great communicator. My advanced audio system lets me share insights from your spencer pharmacist.

I can dispense medications in advance. So if you're on the go, your pills go with you.

i'm insightful and helpful

I'm a medication calendar and reminder. I help you stay on track with medications that keep you healthy.

I record taken or missed doses. And if you need a little support, with the pharmacist's help, I can notify your caregiver and help get you back on track.

I also dispense wisdom. The data I gather—everything from blood pressure to blood sugar—can lead to useful insights. I can share this with your pharmacist or caregiver to help keep you on the path to better health.

"spencer has been a great companion."

Mary, 72-year-old-patient with heart disease

i'm spencer. i'm the future of connected care
