SEIKAKU

SEIKAKU TECHNICAL GROUP LIMITED

SEIKAKU stands as a prominent company in the P.A. System industry. Our assembly factory in China, established in 1990, reflects our commitment to quality. With over 40 years of experience in P.A., our robust quality management system ensures excellence throughout the manufacturing and testing processes. We take pride in offering a comprehensive product line that adheres to environmentally friendly standards, including ISO9001: 2000, ISO/TS 16949: 2002, and ISO14000 regulations. Our test laboratory, endorsed by TUV Company following ISO guide 25, ensures compliance with safety and EMC regulations in the destination countries. Many of our SHOW products have successfully met European, USA safety, and EMC regulations such as CE, EMC & R&TTE, GS, CB, FCC, MFi, cTUVus, and cETLus. Together, we are dedicated to achieving excellence, sustaining progress, and striving for perfection.

DMC16.6

Professional Digital Mixer

bracket

- Digital gain control
- Phantom power control
- 32 digital inputs and outputs
- 24-bit, 48K/96KHz sampling rate
- Digital noise gate / Limiter / Digital compressor
- Digital 4-band full parametric EQ and 31 segment GEQ
- Pan / Phase reverse / Time delay
- 8 DCA for fader group / mute group
- Auto mix / RTA / FBC / Matrix
- Program, save, load & copy functions
- Lock and unlock function / Change the password
- 12 XLR +4 comb inputs
- 10 XLR and 6 MIX bus outputs
- 9 Channels 100mm motorized faders
- 10.1" touch screen with resolution 1024x600
- Bluetooth player, Type-C USB interface, support OTG protocol high-fidelity

SPECIFICATIONS

Model		DMC16.6	
Microphone input	Electronically balanced	Noise gate	-84dBu~ +19dB
Frequency response to main output	22Hz~20KHz at 0dBu ±2dB	Threshold range	0mS~250mS
Distortion (THD & N) to main output	<0.03% at 0dBu 1KHz	Release time	5mS~2S
Digital gain	0dBu~50dBu	Compressor	
SNR (signal to noise ratio)	108dB	Threshold range	-83dBu~ +20dB
Maximum input level	+20dBu ±0.5dBu	Attack time	0mS~250mS
Phantom power (+/-3V)	+48VDC	Release time	5mS~2S
Line inputs		Ratio	1:1 to 40:1, inf:1
Frequency response to direct output	22Hz~20KHz at 0dBu ±2dB	Gain	0dBu - +12dB
Distortion (THD & N) to main output	<0.03% at 0dBu 1KHz	EQ	
Gain	-20dBu~+30dBu	Low (lowpass or lowsshelf)	20Hz~20KHz ± (15dBu ±2dBu)
Maximum input level (gain at 0dBu)	+20dBu	Low mid	20Hz~20KHz ± (15dBu ±2dBu)
USB stereo input/output		High mid	20Hz~20KHz ± (15dBu ±2dBu)
Frequency response to main output	22Hz~20KHz	High (highpass or highshelf)	20Hz~20KHz ± (15dBu ±2dBu)
Distortion (THD & N) to main output	<0.3% at 0dBu 1KHz	Digital audio	
Maximum input level	+20dBu	ADC dynamic range	113dB
Bus output 1-6		DAC dynamic range	113dB
Maximum outputs level	+20dBu	Internal processor	32bit, floating point
Main outputs		ADC bit depth	32bit
Maximum outputs level	+20dBu	DAC bit depth	24bit
Control room outputs		LCD	10.1" (1024x600)
Maximum output level	+20dBu	Impedances	
Headphones outputs		Microphone input	6.8KΩ
Maximum output level	+20dBu	Line input	75KΩ
System crosstalk		All output	120Ω
Input to output (at +0dBu 1KHz)	-88dBu	Dimension (HxWxD)	148 x 349 x 456 (5.83" x 13.74" x 18")
Adjacent channels (at +0dBu 1KHz)	-87dBu	Weight	6.7 kg (14.77 lbs)
Noise (bus noise)	<-90dBu		

DMC24.12

Professional Digital Mixer

- 32 digital inputs and outputs
- 24-bit, 48K/96KHz sampling rate
- Digital gain control
- Phantom power control
- Digital noise gate / Limiter / Digital compressor
- Digital 4-band full parametric EQ and 31 segment GEQ
- Pan / Phase reverse / Time delay
- 8 DCA for fader group / 8 mute group
- Auto mix / RTA / FBC / Matrix
- Program, save, load & copy functions
- Lock and unlock function / Change the password
- 16 XLR +8 comb inputs
- 12 XLR and 8 MIX bus outputs
- 9 Channels 100mm motorized faders
- 10.1" touch screen with resolution 1024x600

Compatible with:

PC Control

DIO16

Digital Snake Box

16 x 8 - XLR I/O
Included Dante I/O

- 16 Channel microphone input (equipped with digital gain control +48V phantom power control + phantom power indicator)
- 8 Channel outputs
- AC 100V - 240V power input
- AES67-32 network audio module

Optional DANTE 、AES-67 and
USB multi-track recording module

E-1000.4

Digital Power Amplifier

Dante™

- 4-channel analog input and 4-channel digital input, 4-channel amplifier output
- Built in high-performance DSP
- Easy to operate by LCD touch Screen and Encoder
- High current switching power supply allowing high power output with low noise and low distortion
- Ethernet and type C ports for PC software control.
- The RS232 interface is to connect with third-party central control; RS-485 is for remote power function and also for connecting the third-party central control; GPI output supports defined functions: power/priority/mute control
- Built-in 4-in and 4-out DANTE modules can realize multi-amp Daisy chain (connection)
- Power amplifier backup automatic switching function.

SPECIFICATIONS

Model	E-1000.4
Power specifications	1000W x 4 digital amplifier
Stered mode (RMS)	4Ω: 900W x 4 / 8Ω: 500W x 4
Bridge mono mode	8Ω: 1600W x 2
Input sensitivity (limit off)	0.9-1.1V (0/-1dBv)
Input impedance	20KΩ balanced or 10KΩ unbalanced
Frequency response	20Hz~20KHz (0/-1dB)
THD+N	<0.05%
S/N rate	>100dB
Crosstalk (Below rated power)	>70dB
Power/Output circuitry	Switching power/Class-D
Protections	Shot circuit, overheating, overcurrent, DC output detection, power failure detection
Controls	Front: standby /power button, functions control knob, touch LCD
Connectors	Input: balanced/unbalanced COMB jacks Output: speak-on jacks
AC Power supply	110V-120V/220V-240V~50/60Hz
Dimension (WxDxH)	448x483x88 mm (17.64" x 19.02" x 3.47")
Weight	10.8 Kg / 23.81 lbs

T-FBK4 V2

Professional Feedback Suppressor

- 4 XLR & 4 TRS balanced inputs
- 2 XLR & 2 TRS balanced outputs
- Dual independent channel processing
- 24-bit, 48K/96KHz sampling rate
- Digital gain control
- Phantom power control
- Live and fixed filter modes
- Auto matic live filter release
- Auto matic noise reduction function
- 8 Danamic & 8 static suppression points configured in each channel
- LAN & USB port for PC remote control

SPECIFICATIONS

Model	T-FBK4 V2
Microphone input	Electronically balanced
Frequency response to main output	22Hz~20KHz at 0dBu +1/-2.5 dBu
Distortion (THD & N) to main output	<0.03% at 0dBu 1KHz
Gain	0dBu~36dBu
Phantom power	+48V DC
Line input	
Frequency response to main output	22Hz~20KHz at 0dBu +1/-2.5dBu
Distortion (THD & N) to main output	<0.03% at 0dBu 1KHz
Gain	-20dBu~+16dBu
SNR (Signal to noise ratio)	107dBu
System Crosstalk	
Adjacent Channels (at +0dBu 1KHz)	-87dBu
Noise (bus noise)	-87dBu
Digital audio	
AD/DA Dynamic range	114dBu
Internal processor	24-bit, floating point
ADC, DAC bit depth	24-bit
Impedances	
Microphone input	3.3KΩ
Line input	19KΩ
Output	120Ω
Operating temperature range	0~40°C
Storage temperature range	-20°C~60°C
Dimension (WxDxH)	483 x 195 x 44 mm (19.02" x 7.68" x 1.73")
Weight	3.1 kg (6.83 lbs)

AH SERIES

High Voltage Class-D Amplifier

AH150.1 / AH300.1 / AH500.1 / AH1000.1

AH500.1

AH150.1/AH300.1/AH500.1/AH1000.1 are class-D installation amplifier.
They are perfect solution for 70V/100V line installations (selectable through dip-switches).
The series is designed with indicators (signal, clip and protection).
The input and output connections are made through euroblocks.
1U rack 19" size is very appropriate for many types of installations.

- 70V / 100V
- 1Channel high voltage amplifier.
- 150Wx1; 300Wx1; 500Wx1; 1000Wx1
- Standard 19" 1U rack size design
- Euro-block connectors for input and output

SPECIFICATIONS

Model		AH150.1	AH300.1	AH500.1	AH1000.1
Rated Output Power	Sine wave 1KHz, THD≤1%	150W	300W	500W	1000W
Sensitivity / Impedances	Line (balanced)	0.9-1.1V (0±1dBv)			
Maximum input level	Line (balanced input to pre out)	+10dBv			
S/N ratio	Line (20-15KHz)	>85dB			
Bandwidth	Line @1/8RMS	120Hz-15KHz			
THD+N	1W / RMS	≤0.1%			
Noise	All VR max	<5mv			
AC Power supply		110~120V or 220V-240V~50/60Hz			
Dimensions		483 x 360 x 44 mm (19.02" x 14.17" x 1.73")			
weight		5.0 kg (11.02 lbs)			

AH SERIES

High Voltage Class-D Amplifier

AH1000.2 / AH1500.2

AH1500.2

HIGH POWER CLASS-D AMPLIFIERS

As part of the AH series, AH1000.2 and AH1500.2 offer both low impedance and high voltage outputs. Featuring high power, the amplifiers can be used as powerful sources to drive large speaker systems in various working modes.

SPECIFICATIONS

Model	AH1000.2	AH1500.2
Stereo mode	4Ω (EIAJ) 2000Wx2	2Ω (EIAJ) 2800Wx2
(All channels drive)	4Ω (RMS) 900Wx2 / 8Ω (RMS) 600Wx2	4Ω (RMS) 1500Wx2 / 8Ω (RMS) 900Wx2
CHA/B (All channels drive)	70V-1000W load / 100V-1000W load	70V-1500W load / 100V-1500W load
Bridge mono mode	4Ω (EIAJ) 4000W / 8Ω (RMS) 1800W	4Ω (EIAJ) 18000W / 8Ω (RMS) 1000W
Input sensitivity (limiter off)	0.9-1.1V (+0/-1dBv)	
Input impedance	20KΩ balanced or 10KΩ Unbalanced	
Voltage gain	37 (+0/-0.5dB)	38 (+0/-0.5dB)
Frequency response (4Ω)	20Hz~20KHz (0+/-1dB)	
THD+N	<0.1% (ref. 1K 1/8 rated power, A weighted)	
S/N ratio	>100dB	
Crosstalk	>70dB	
Protections	full short circuit, open circuit, thermal, ultrasonic, and RF protection stable into reactive or mismatched loads, turn ON/OFF, muting, tried crowbar.	
Controls	Front: on/off power switch, volume channel A, B, rear: stereo-parallel-bridgt-70/100V-Mute selector	
Indicators	Signal: 2 green LED / clip:2 red LED / power: green LED / protection:1 red LED / bridged: 1 red LED	
Connectors	Input: neutrik combo XLR / TRS /output: speak-on jacks	
Power supply	AC: 110-120V or 220~240V 50/60Hz	AC: 220-240V 50/60Hz (only)
Dimensions (WxDxH)	483 x 360 x 44 mm (19.02" x 14.17" x 1.73")	
Weight	5.7 kg (12.57 lbs)	6.1 kg (13.45 lbs)

CM-2

Chime Microphone

- Equipped with a high quality condenser microphone
- 4-stage chime configured
- Support balanced outputs or unbalanced outputs.
- Enable to control the volume of CHIME or MIC separately
- Equipped with the "push to talk" button to control the microphone easily.
- An external TYPE-C port built to support 5V DC power and operate conveniently.

SPECIFICATIONS

Model	CM-2
Power Voltage	AC 100~240V / DC:5V, 550mA
Chime	440Hz, 554Hz, 659Hz, 880Hz four stage musical
Microphone	Condenser microphone cartridge
Balanced output	230mV
Unbalanced output	110mV
Frequency response	20Hz-20KHz
Noise	≤1mV
Signal / noise	≥100dB
Input sensitivity	-50dB
Dimensions (WxDxH)	196 x 158 x 83 mm (7.72" x 6.22" x 3.27")
Weight	0.6kg (1.32 lbs)

SHMeter

Audio Level Meter

Features

- 2-channel line level indicator with LED chains
- Control attenuation speed
- Sensitivity separately adjustable per channel
- Level display from green through yellow to red
- BAR and DOT display modes
- 2 x RCA in and outputs (through-connected)
- 2 x XLR in and outputs (balanced, through-connected)
- Provides brightness control switch
- For 19" rack mounting and desktop use
- 19" format / 1 RU
- Demo mode for LED checking without signal

SPECIFICATIONS

	SHMeter
Power input	100-240V AC~ 50/60Hz Fuse T1.6AL
Power consumption	10W
Dimensions (HxWxD)	44 x 483 x 82 mm (1.73" x 19.02" x 3.23")
Weight	1.25 kg (2.58 lbs)

SPC-PLUS⁺

RACK-MOUNT POWER DISTRIBUTION

Features

- Eight switched, rear panel, IEC outlets that allow you to power an entire rack's worth of gear from one source. In addition, an unswitched front panel convenience outlet is provided for temporary power needs (such as plugging in a guitar amplifier, soldering iron, etc.).
- 3-point surge protection, spike clamping protection and RF filtering enables all connected equipment to operate with maximum efficiency and minimal noise
- Front panel , re-settable, 10 amp circuit breaker protects all connected gear.
- 19" format / 1 RU
- An independent dedicated switch with status light for powering the rear panel switched outlets

SPECIFICATIONS

	SPC-PLUS ⁺
Number of outlets	8 switched , 1 unswitched
Current rating	max, 10 amps (circuit breaker protected)
Input voltage	230V
Spike protection mode	hot to neutral, hot to ground, and neutral to ground
Clamping Voltage (@50A)	max. 340V AC
Response time	1 nanosecond
Maximum surge current	6,000 amps (8 x 20 s pulse)
Maximum spike energy	70 joules per leg
Noise attenuation	>20dB, 1.5MHz-200MHz
Power cord	permanently attached, grounding type plug
LED Life	100,000 h (typical)
Dimensions (HxWxD)	44 x 483 x 190 mm (1.73" x 19.02" x 7.5")

BR-1

Bluetooth Audio Receiver

Bluetooth audio receiver for all purposes

The BR-1's signal range of up to 100 ft makes it the perfect tool for receiving wireless Bluetooth audio on mixing consoles and active PA speakers for weddings, dance parties, and any kind of event that requires music. The versatile, easy-to-use BR-1 will convince users in just about every situation thanks to its integrated XLR output that always ensures a reliable wireless connection to professional audio systems without any adapters. This compact Bluetooth audio receiver is also an excellent choice for all musicians who want to stream backing tracks from a mobile device to their practice amplifier or to the PA system at a venue. One BR-1 allow a stereo signal to be received, whereas in TWS model requires two BR-1 units to be linked.

- Add Bluetooth to any speaker or mixer
- Link two together for cable-free stereo playback
- Dual XLR outputs for wired stereo playback
- XLR on top and bottom
- Switch for on/off, TWS-Link, Bluetooth pair, stereo/mono
- LEDs for battery charge and operating status

SPECIFICATIONS

Model	BR-1
Top / Bottom output port	Balanced XLR male
Maximum output level	+6dBu
Signal-to-noise ratio	95dB
Frequency range	20~20KHz
Bluetooth range	Up to 100 feet (30.5m)
Bluetooth frequency range	2402~2480MHz
Free-air operating temp range	-20°C~45°C
Battery life	Up to 8 hours
Recharging time	Less than 2 hours
USB-C power input	DC 5V / 300mA
Battery specifications	Built in battery, 3.7V / 500mAh / 1.85Wh
Bluetooth profile	Bluetooth 5.3 A2DP
Dimension (LxWxH)	24 x 27 x 116 mm (1.06" x 1.06" x 4.56")
Weight	0.051 kg (0.112 lbs)

2.4G Digital Wireless Microphone System

D2400R / D2400H / D2400P (1 CH)
D2402R / D2400H / D2400P (2 CH)

D2400R digital wireless system is the perfect solution for musicians and speakers who want to confidently and easily use wireless technology.

It adopts advanced RF selection algorithm with 2.4GHz wireless technology, while intelligently avoiding interference, Achieving completely reliable performance and dropout free audio, and can coexist with Wi-Fi and bluetooth

D2402R works as a digital dual-channel wireless MIC. system which is the perfect solution for musicians and speakers who want to confidently and easily use wireless technology. Equipped with colorful TFT display and simple & fast adjustment menu, it enables your operations more smoothly and conveniently.

Adopting advanced RF selection algorithm with 2.4GHz wireless technology while intelligently avoiding interference, To achieve completely reliable performance and dropout free audio, and can coexist with Wi-Fi and bluetooth.

Features

- RF frequency: 2.4GHz license-free bands
- High resolution 24bit/48KHz sampling rate uncompressed audio
- Extremely low 3.6ms wireless system audio latency
- Working distance up to 50 meters
- Low power consumption, the transmitter can work for more than 10 hours using 2 x AA batteries
- Compliant with EMC regulations (FCC/CE)

MATRIX SYSTEM

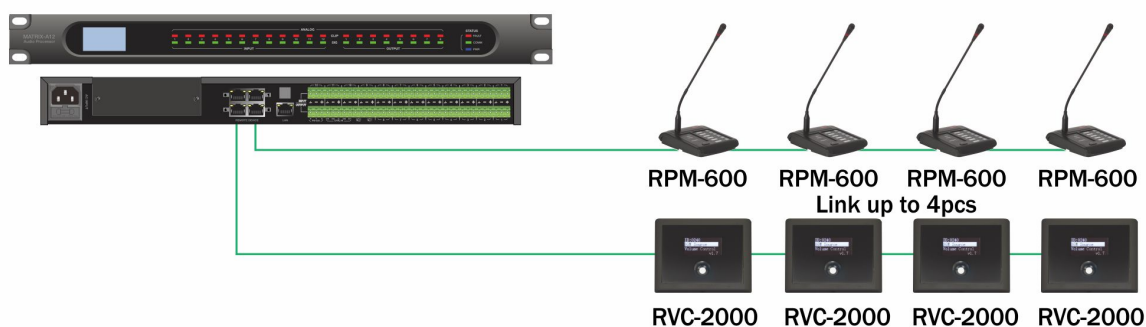

Matrix Multi-Processor

MATRIX-A6/MATRIX-A8/MATRIX-A12 Digital Audio Matrix System / Configuration

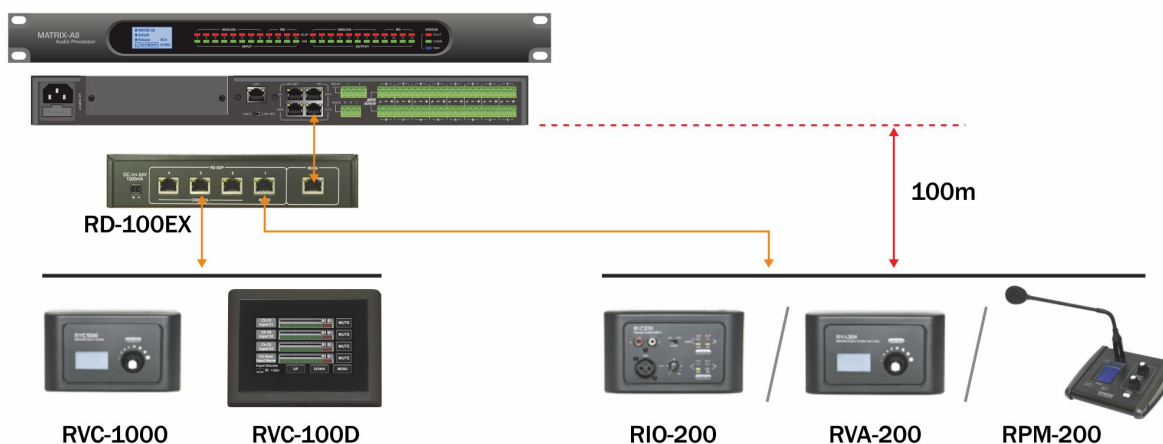

MATRIX-A6 / MATRIX-A12

1. Up to 16 sub-devices can be connected to a single system of A6 or A12 .
2. Up to 4 RVC-2000 / RPM-600 / RPM-300 / RVC-200D can be supported by the LINK of each RD port.
3. The max. distance supported is 100 meters based on CAT-5e or more advanced network cable.

MATRIX-A8

1. Up to 8 sub-devices can be connected to each single system.
2. One unit of RD-100EX is allowed for each single system.
3. Connected to the RD port directly.
4. Audio Device: 1 PC selected from any of RPM-200/RIO-100/RVA-200.
5. Control Device: up to 4 PCS can be connected to RVC-100D/ RVC-1000.
- If mutual link applied, the first device connected should be RVC-100D.
6. The max. distance supported is 100 meters based on CAT-5e or more advanced network cable.

MATRIX SYSTEM

Matrix Multi-Processor

Dante-based network digitally processed audio system

The MATRIX system is one of the world's integrated network audio and distribution platform.

It is completely open to setting with no restrictive predetermined signal flow.

The MATRIX system provides a powerful set of tools to create extraordinary audio experiences.

This pioneering architectural design is used for room combinations, paging and distributing audio to several zones in an installation.

By using PC and APP management software, even novice users can complete complex tasks in awhile.

Room composition and paging does not require complex matrix mixes or presets.

The MATRIX system can assign pages and background music to multiple zones without complicated wiring.

The MATRIX system can be connected to either small or large installations simultaneously by using PC or APP management software controls. Various connected peripherals include matrix multi-processor, remote volume control and expanders, remote audio I/O devices and advanced paging stations. In addition, the matrix multi-processor with PC and APP software controls helps to check the system status, location, CAT 5e wiring integrity and ensure audio flow through all peripherals.

MATRIX-A6 / MATRIX-A12

MATRIX-A8

MATRIX SYSTEM

Matrix Multi-Processor

Digital Audio Matrix / System Features

Basic Introduction

The MATRIX System is the core of a music distribution, paging, discussion and zone management for commercial and fixed installations.

Fix Architecture

MATRIX system is designed for non-expert customers looking for quick and easy operation. The intuitive GUI utilizes a familiar hardware-like layout to enable a short programming time and rapid hardware implementation.

Digital Connectivity

MATRIX system uses four types of CAT-5e compatible connections:

- RCNET port is based on RS-485 transfer protocol for MATRIX link
- RD port is based on AES3 transfer protocol for point to point digital audio transfer with RS-485 for panel control
- Optional Dante card for multi-channel digital audio transport
- Ethernet TCP/ IP for LAN

Applications

- Shopping mall
- Bar / Restaurant
- Fitness center
- Hotel
- Transportation terminal
- Factory
- Hospital
- Conference hall
- Exhibition hall
- Power station

MATRIX SYSTEM

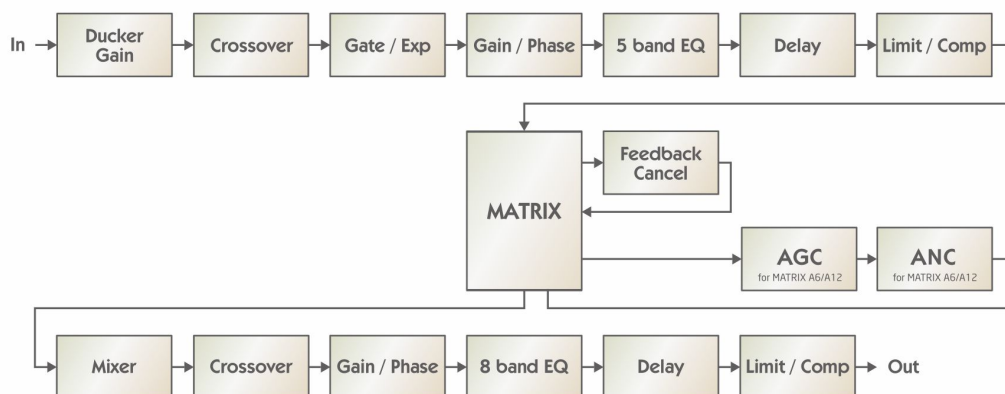

Matrix Multi-Processor

Digital Audio Matrix / System Features

DSP Functions

Gain, Limiter / Compressor, Ducker, Matrix, Gate / Expander, Feedback Canceller, Parametric EQ, Bandpass Filters, Delay, Crossover Filters, Auto Mixer.

Software Editor

The friendly editor makes any setting or modification easy. It reports the control status in real time with clear graphic indications for all functions.

Matrix Multi-Processor

The diagram illustrates a complex audio system setup with the following components and connections:

- Top Left Section:** Includes a laptop, a microphone on a stand (RPM-200), an Ethernet Switch, and a BGM-99 device. The laptop and Ethernet Switch are connected to the BGM-99 via CAT-5e cables (orange lines).
- Top Right Section:** Features an RVC-100D, an RVA-200, and an AH-500.4 processor. The RVC-100D is connected to the RVA-200 and the AH-500.4 via CAT-5e cables. The RVA-200 is connected to the AH-500.4 via an Audio cable (green line).
- Middle Section:** Contains two MATRIX-A8 devices and an RD-100EX. The Ethernet Switch is connected to both MATRIX-A8 units via CAT-5e cables. The BGM-99 is connected to the RD-100EX via CAT-5e cables. The RD-100EX is connected to the AH-500.4 via CAT-5e cables.
- Bottom Left Section:** Includes a microphone (UDM525), a RIO-200, and an RVC-1000. The UDM525 is connected to the RIO-200 via an Audio cable. The RIO-200 is connected to the RVC-1000 via CAT-5e cables. The RVC-1000 is connected to the AH-500.4 via CAT-5e cables.
- Bottom Right Section:** Features an AH-500.4 processor and a set of speakers. The AH-500.4 is connected to the speakers via Audio cables. The speakers include NPB-6, NCL-6, and NWB-8 models.

Dimensions (WxHxD)	483 x 44 x 256 mm (19.02" x 1.73" x 10.08")
Weight	3.9 kg (8.60 lbs)

RVC-100D/RVC-1000

Matrix A8 System

Remote Volume Control

RVC-100D

RVC-1000

COLOR

Features

- 1 input / 1 link output
- LCD display the control in real time, also can control the MATRIX-A8 through the touch screen
- Direct power supply by network cable, no external power supply, communication length is 100M
- Touchscreen, 4.3" LCD display
- Input / output audio control
- Audio routing
- Scene switch

Features

- Volume control of MATRIX-A8 output channels
- Input / Output signal routing
- LCD screen with output level display
- RD port in, for connection to MATRIX-A8
- RD port link for daisy chain connection
- 100m CAT-5e cable

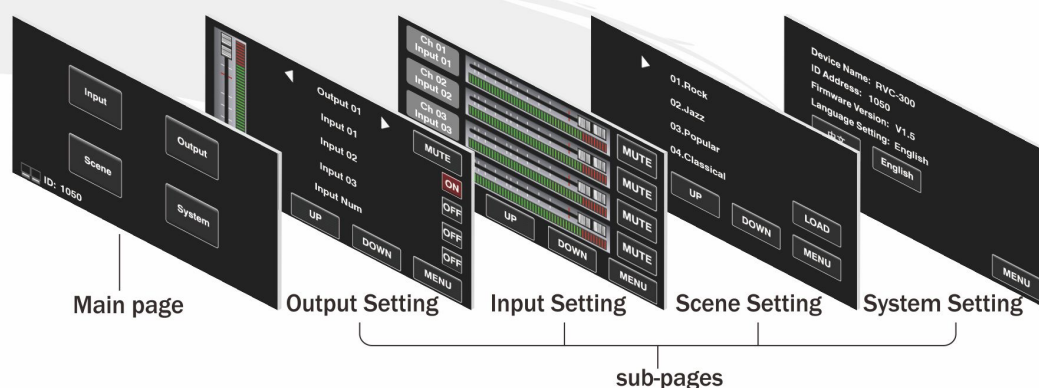

SPECIFICATIONS

Model	RVC-100D	RVC-1000
Adjustable volume range		- ∞ \pm 15dB
RD net to Matrix	RJ45, 100m CAT-5e cable	RJ45, 100m CAT-5e cable
RD net link	RJ45, 100m CAT-5e cable	RJ45, 100m CAT-5e cable
Dimensions (LxHxD)	145 x 110 x 47 mm (5.71" x 4.33" x 1.85")	145 x 110 x 47 mm (5.71" x 4.33" x 1.85")

RVC-100D

Matrix A8 System

Remote Volume CONTROL

Control Interface Introduction

RVC-100D main page

Connecting the RD port of MATRIX-A8 to the in port of RVC-100D. After the MATRIX-A8 has been successfully recognized and connected to RVC-100D, the indicator on the lower left will flash, and the device address MATRIX-A8 assigned to the RVC-100D also will be displayed. You can enter four sub-pages respectively by clicking the corresponding buttons on the main interface, namely "output setting" / "input setting" / "scene setting" / "system setting".

RVC-100D sub-pages

Output setting

You can adjust the output volume or mute it, and the changes of the output volume can be seen through the volume indicator in this page; You can switch the output channel by the "left and right arrow", and the "up and down button" to switch the input channel; Switch "ON" / "OFF" to customize the input channel routing to the selected output channel.

Input setting

You can adjust the input volume, mute and the changes of the input volume can be seen through the volume indicator in this page; The input channel can be switched by the "up and down button".

Scene setting

Click the "up and down button" to switch to the previous page or next scene, and then click on the desired scene to load (The default scenes loaded in this page are set and saved on the MATRIX-A8 software).

System setting

It shows the device name device; device address that MATRIX-A8 assigned to RVC-100D and the firmware version in this page; All pages can be switched to Chinese language or English language through the "Chinese" / "English" buttons.

RIO-200/RVA-200

Matrix A8 System

Remote Audio I/O Device

RIO-200

COLOR

RVA-200

Features

- Channel A and B line inputs
- MIC input
- RD port, for connection to MATRIX-A8
- 2 x D/A channel line outputs
- 100m CAT-5e cable

SPECIFICATIONS

Model	RIO-200
Inputs	
Connectors	3-pin female XLR, RCA
Input Impedance	5.1K Ω
THD+N	<0.01% typ 20-20KHz, +4dBu
Maximum Input	20dBu
Frequency Response	20-20KHz, +0, -0.5dB
Dynamic Range	-126dB max, A weighted
Crosstalk	-87dB max, A weighted
Outputs	
Connectors	Euroblock 2x3-pin, 5mm pitch
Impedance	240 Ω
Maximum Output	+20dBu
Frequency Response	20Hz-20KHz
Dynamic Range	-107dBu Max, A weighted
Crosstalk	104dB
Signal	-30dBu green LED, peak-reading
Overload	+17dBu red LED, peak-reading
RD net to MATRIX	RJ45, 100m CAT-5e cable
Dimension (LxHxD)	147x86x47 mm (5.79"x3.39"x1.85")

Features

- Volume control of MATRIX-A8 output channels
- Input / output signal routing
- LCD screen with output level display
- RD port, for connection to MATRIX-A8
- 2 x D/A channel line outputs
- 100m CAT-5e cable

SPECIFICATIONS

Model	RVA-200
Adjustable volume range	$-\infty$ +15dB
Connectors	Euroblock 2x3-pin, 5mm pitch
Impedance	200 Ω 1%
Maximum Output	+20dBu
Frequency Response	20Hz-20KHz, 0dB+/-1.5dB
Dynamic Range	107dBu max, A weighted
Crosstalk	-87dBu max, A weighted
RD net to MATRIX	RJ45, 100m CAT-5e cable
Dimension (LxHxD)	147x86x47 mm (5.79"x3.39"x1.85")

RPM-200/RD-100EX

Matrix A8 System

RPM-200 Paging Station RD-100EX Remote Expander

RPM-200

RD-100EX

Features

- 12 x paging zones
- Up to 64 group zones with MATRIX-A8
- Zone LCD display
- Status and communication indicators
- Zone selector with volume control
- Push-to-talk gooseneck microphone
- USB port to load chime sound files
- RD port, for connection to MATRIX-A8
- 100m CAT-5e cable

Features

- 3 remote control terminals, each control terminal can connect up to 8 controllers
- LED lights display the working status of ports in real time
- 1 audio+control terminal, 192 zones can be controlled and called by connecting to RPM-200

SPECIFICATIONS

Model	RPM-200	RD-100EX
MIC Input		
Connector	3-pin female XLR	
Phantom power	+12VDC 26mA	
Indicators and switch		
LCD Display	Zone activation	
LEDs	Signal status	
Switch	Push to talk	
Ports		
RD net to MATRIX	RJ45, 100m CAT-5e cable	
USB	For MP3 Chime sound file (4 seconds)	
1 x RD net to Matrix		RJ45, 100m CAT-5e cable
3 x RD net link to RVC-1000 & RVC-100D		RJ45, 100m CAT-5e cable
1 x RD net link to RVA-200, RPM-200 & RIO-200		RJ45, 100m CAT-5e cable
Power supply		24V / DC
Dimension (LxHxD)	166 x 53 x 162 mm (6.54" x 2.09" x 6.38")	196 x 45 x 128 mm (7.72" x 1.77" x 5.4")

MATRIX-A6

Matrix Multi-Processor

Digital Audio Matrix Processor

MATRIX-A6 is at the heart of a music distribution, paging, discussion and one management system for commercial and fixed installations. It has 6 inputs and 6 outputs in a single device powered by a state-of-the-art DSP

Features

- 6 anglog in x 6 analog out
- 8 Dante in x 8 Dante out
- 4 Volume controller ports
- Fix architecture for easy and quick operation
- Intuitive GUI with PC and Apps software editor
- DSP: phase / delay / comp / anc / agc

Accessories

- RPM-600: microphone with zone selector
- RVC-2000: touch screen volume control
- Dante-32S: Dante module
- RPM-300: paging station
- RVC-200D: remote volume control
- DIO-202: audio interface

SPECIFICATIONS

Model	MATRIX-A6
Connectors	Euroblock 3 x 6-pin, 5mm pitch
CODEC	32-bit, 48K/96K
Mic / line inputs	Active balanced
Gain settings	+10 to +60dB, 1dB steps
Input impedance	6.8K Ω
Phantom power ($\pm 3V$)	+48VCD
THD+N	<0.03%, typ 20Hz-20KHz, 0dBu A Weight
Maximum input	+20dB
Frequency response	20Hz-20KHz, at 0dBu ± 1.5 dB A Weight
Dynamic Range	108dB
Crosstalk	<-88dB, at 20Hz-20KHz, 0dB, CH to CH
Digital gain range	0~48dB steps=12dB
Outputs	Active balanced
Impedance	200 Ω
Maximum output	+20dBu
Frequency response	20Hz~20KHz at 0dBu ± 1.5 dB A Weight
Dynamic range	108dB
Crosstalk	<-88dB, at 20Hz-20KHz, 0dB, CH to CH
Indicators	
Signal	-40dBu green LED
Overload	+19dBu Max, A Weight
DSP	
Processor	32/64-bit floating point
Power supply	100-240V / 50~60Hz
Dimension (WxHxD)	483 x 44 x 256 mm (19.02" x 1.73" x 10.08")
Weight	4.14 kg

RPM-600

Matrix A6/A12 System

Paging Station

Features

- Up to 4 remote paging microphones can be configured for each RD port
- Built-in 16m flash can be used to save voice messages such as various alarms, tips sounds, etc
- With RPM-600EX, it enables to extend additional 12 zone address-selection buttons
- User can customize the functionalities of zone selection button such as zone selection, voice playback etc.
- Enable to realize broadcasting to output zones

Optional Accessory

- RPM-600EX: 12 zones select expander

RPM-600EX

RPM-600

SPECIFICATIONS

Model	RPM-600
Power	24V DC (Operation range: 15-40V DC Powered by Matrix)
Rated current	120mA (remote emergency MIC), 250mA (Connected to 3pcs of zone-selection expander)
Frequency response	200Hz-15KHz
THD	1%
SNR	55dB
Volume control	Microphone volume control, voice volume control
MAX cable connection distance	CAT-5e 150m in total length
The number of zone selection expander connected	3pcs
Operation temperature	-5°C~45°C
Dimension (LxWxH)	243 x 170 x 53 mm (9.57" x 6.70" x 2.09")
Weight	0.66kg (0.15 lbs)

RPM-300/DIO-202

Matrix A6/A12 System

ER SERIES

Hand Grip Megaphone

ER-55Plus / ER-55MB / ER-66Plus / ER-66MB

The series is an upgraded version of ER-55S/66S, designed with Class-D new technology. It has the advantages of light weight, low power consumption, long use time, strong directivity, clear and bright speech sound quality, and strong sound penetration. In order to facilitate consumers to use, it is also equipped with multi-function options such as MP3+BT+AUX. Just insert the U disk into the USB port, press the play button to play; switch the function button to BT, and press the play button to play.

AUX (Φ3.5) can be connected to external signal input, MP3 (red LED) / BT (green LED), so that the player can be more intuitively identified by users. It also supports DC 12V power supply. The series can be used in gatherings, tourism, tour guides, publicity, and other public places.
